Shiva Descending Gregory Benford, William Rotsler, 1992-03-15 Science fiction roman **Shiva Descending-Can** Gregory Benford, 1980 When the Asteroid Hits Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded Wheels of Life Anodea Judith, 2012-12-08 As portals between the physical and spiritual planes the chakras offer unparalleled opportunities for growth healing and transformation Anodea Judith s classic introduction to the chakra system which has sold over 300 000 copies has been completely updated and expanded It includes revised chapters on relationships evolution and healing and a new section on raising children with healthy chakras Wheels of Life takes you on a powerful journey through progressively transcendent levels of consciousness View this ancient metaphysical system through the light of new metaphors ranging from quantum physics to child development Learn how to explore and balance your own chakras using poetic meditations and simple yoga movements along with gaining spiritual wisdom you ll experience better health more energy enhanced creativity and the ability to manifest your dreams Praise Wheels of Life is the most significant and influential book on the chakras ever written John Friend founder of Anusara Yoga **Cosmic Impact** Andrew May, 2019-02-07 As end of the world scenarios go an apocalyptic collision with an asteroid or comet is the new kid on the block gaining respectability only in the last decade of the 20th century with the realisation that the dinosaurs had been wiped out by just such an impact Now the science community is making up for lost time with worldwide efforts to track the thousands of potentially hazardous near Earth objects and plans for high tech hardware that could deflect an incoming object from a collision course a procedure depicted with little regard for scientific accuracy in several Hollywood movies Astrophysicist and science writer Andrew May disentangles fact from fiction in this fast moving and entertaining account covering the nature and history of comets and asteroids the reason why some orbits are more hazardous than others the devastating local and global effects that an impact event would produce and more optimistically the way future space missions could avert a catastrophe The Berlin Project Gregory Benford, 2017-11-21 A fictional alternate history of the creation of the atom bomb that explores what could have happened if the bomb was ready to be used by June 6 1944
