History, Memory, and the Literary Left John Lowney, 2006-10 In this nuanced revisionist history of modern American poetry John Lowney investigates the Depression era's impact on late modernist American poetry from the socioeconomic crisis of the 1930s through the emergence of the new social movements of the 1960s Informed by an ongoing scholarly reconsideration of 1930s American culture and concentrating on Left writers whose historical consciousness was profoundly shaped by the Depression World War II and the Cold War Lowney articulates the Left's challenges to national collective memory and redefines the importance of late modernism in American literary history The late modernist writers Lowney studies most closely Muriel Rukeyser Elizabeth Bishop Langston Hughes Gwendolyn Brooks Thomas McGrath and George Oppen are not all customarily associated with the 1930s nor are they commonly seen as literary peers By examining these late modernist writers comparatively Lowney foregrounds differences of gender and sexuality race and ethnicity and social class and region while emphasizing how each writer developed poetic forms that responded to the cultural politics and socioaesthetic debates of the 1930s In so doing he calls into question the boundaries that have limited the scholarly dialogue about modern poetry No other study of American poetry has considered the particular gathering of careers that Lowney considers As poets whose collective historical consciousness was profoundly shaped by the turmoil of the Depression and war years and the Cold War's repression or rewriting of history their diverse talents represent a distinct generational impact on U S and international literary history

The Edge of Memory Patrick Nunn, 2018-08-23 How much of the folk tales of our ancestors is rooted in fact and what can they tell us about the future In today's society it is the written word that holds the authority We are more likely to trust the words found in a history textbook over the version of history retold by a friend after all human memory is unreliable and how can you be sure your friend hasn't embellished the facts But before humans were writing down their knowledge they were passing it on in the form of stories The Edge of Memory celebrates the predecessor of written information the spoken word tales from our ancestors that have been passed down transmitting knowledge from one generation to the next Among the most extensive and best analysed of these stories are from native Australian cultures These stories conveyed both practical information and recorded history describing a lost landscape often featuring tales of flooding and submergence Folk traditions such as these are increasingly supported by hard science Geologists are starting to corroborate the tales through study of climatic data sediments and land forms the evidence was there in the stories but until recently nobody was listening In this book Patrick Nunn unravels the importance of these tales exploring the science behind folk history from around the world including northwest Europe and India and what it can tell us about environmental phenomena from coastal drowning to volcanic eruptions These stories of real events were handed down the generations over thousands of years and they have broad implications for our understanding of how human societies have developed through

the millennia and ultimately how we respond collectively to changes in climate our surroundings and the environment we live in
