A Short Grammar of Contemporary Bulgarian Kjetil Rå Hauge, 1999 A Short Grammar of Contemporary Bulgarian Kjetil Rå Hauge, 1999 *A short grammar of contemporary bulgarian* Evgenia Antova, Ekaterina Bojčinova, Poly Benatova, 2001 *Bulgarian Grammar* Ruselina Nicolova, 2017-06-06 This Bulgarian Grammar is a semantically and functionally oriented type of academic grammar New semantic interpretations often based on logical analysis are offered in the area of determination pronouns verbs etc Morphological facts are related to syntax and pragmatics Theoretically and methodologically the description fits into the context of contemporary linguistics and is suitable for typological studies since Bulgarian offers rich and interesting material *The Cambridge Handbook of Slavic Linguistics* Danko Šipka, Wayles Browne, 2024-05-31 The linguistic study of the Slavic language family with its rich syntactic and phonological structures complex writing systems and diverse socio historical context is a rapidly growing research area Bringing together contributions from an international team of authors this Handbook provides a systematic review of cutting edge research in Slavic linguistics It covers phonetics and phonology morphology and syntax lexicology and sociolinguistics and presents multiple theoretical perspectives including synchronic and diachronic Each chapter addresses a particular linguistic feature pertinent to Slavic languages and covers the development of the feature from Proto Slavic to present day Slavic languages the main findings in historical and ongoing research devoted to the feature and a summary of the current state of the art in the field and what the directions of future research will be Comprehensive yet accessible it is essential reading for academic researchers and students in theoretical linguistics linguistic typology sociolinguistics and Slavic East European Studies

South Slavic Discourse Particles Mirjana N. Dedai?, Mirjana Miskovi?-Lukovi?, 2010 Discourse particles discourse markers and pragmatic markers refer to phenomena that linguists have begun to probe only since the mid 1980s Long ignored in traditional linguistics and textbook grammars and still relegated to marginal status in South Slavic these linguistic phenomena have emerged as invaluable devices for cutting edge theories of the semantics pragmatics interface This book which is a pioneering study in such linguistic phenomena in South Slavic languages is also among the first of its kind for a related group of languages It builds on the recent findings of some of the most influential linguistically oriented theories such as Relevance Theory Argumentation Theory and coherence based approaches to explain the meaning and use of certain discourse pragmatic particles markers in Bulgarian Macedonian Serbian Bosnian Croatian and Slovene These particles markers are part of the contemporary and historical lexicons of the South Slavic languages varying across regions and time but also differing in origin This book which draws from naturally occurring data written media and constructed examples aims at a wider audience including scholars working in semantics pragmatics and Slavic languages and applied specialists interested in this area of research The authors hope that this book will be conceived as a starting point for a structured inquiry into the flourishing field of discourse particles in South Slavic **Degrees of Explicitness** John

Leafgren,2002-07-26 This book explores factors relevant in the choices speakers and writers make in regard to explicitness of reference to the subjects and objects in their utterances Bulgarian is a particularly felicitous target language for this type of study since it possesses a rich inventory of available packaging techniques ranging from zero reference to various stressed and unstressed single forms to actual doubled reduplicated constructions The study systematically addresses the need to avoid referential and grammatical ambiguity and the crucial influence of emphasis Another and perhaps most interesting central factor is the status of what the communication is about which is assessed on two different levels The book makes use of data from both published Bulgarian fiction and naturally occurring oral conversations The fundamental similarities between these modes of communication with respect to noun phrase selection is demonstrated but explanations are also proposed for the observable differences Aktionsart and Bulgarian verbal aspect Anelia Stefanova Ignatova,2014-12-19

Annual Workshop on Formal Approaches to Slavic Linguistics Wayles Browne,2003 **Definiteness in Bulgarian** Olga M. Mladenova,2008-09-25 In its evolution from a synthetic to an analytic language Bulgarian acquired a grammaticalized category of definiteness The book presents the first attempt to explore in detail how this happened by comparing the earliest Modern Bulgarian texts with contemporary dialect and standard Bulgarian data The basic units of analysis are the various types of nominal structures headed by nouns or pronouns The analysis requires the strict terminological disentanglement of form from content and the adoption of a default inheritance model of definiteness that allow the exhaustive classification and tagging of nominal structures encountered in the texts Tagging makes it possible to apply quantitative analysis to nominal structure and to assess the types available in the early texts from a current native speaker perspective Based on an S curve model of language change the study establishes that overt markers of definiteness were first made available to identifiability based definites then to inclusiveness based definites quantitative generics and unique referents The overt markers of indefiniteness followed suit separating indefinites from non specifics and typifying generics This progression of definiteness was directed by variables such as person animacy gender number and noun class and started in contexts in which definiteness closely interacted with possessivity Such an analysis leads to the realization that the two dimensional S curve model does not account for all language change and that there is a need for a three dimensional model It also demonstrates that contrary to previous assumptions there is continuity between the early Slavic marker of definiteness long form adjectives and the Modern Bulgarian article This discovery in conjunction with geolinguistic arguments sheds new light on the role that relations inside the Balkan Sprachbund played in the grammaticalization of Bulgarian definiteness
