A Short History of the Island of Butterflies Nicholas Christopher,1986 **A Short History of the Island of Butterflies** Nicholas Christopher,1986 **British and Irish Butterflies** Roger L H Dennis,Peter B Hardy,2018-07-13

Islands are special places they can be havens for unique plants and animals and refuges for wildlife This book investigates the biogeography of butterfly species over the British islands particularly the factors that influence their presence on the islands and that have made each island s butterfly fauna distinctive The book contains a full log of records of species on the islands and much supporting information The first three chapters set the scene illustrating the basics of island biogeography theory their changing circumstances during the current Holocene interglacial and studies of natural history of British butterflies that mark the islands as the most intensively studied region for wildlife in the world The book advances by increasing resolution downscale from a European continental perspective through patterns and changes on the British mainland a comparison of the two dominant islands of Britain and Ireland to a close inspection of the dynamics of species on the multitude of offshore islands Detailed investigations include contrasts in species richness on the islands and then of the incidences of each species Case studies highlight the continual turnover of species on islands Attention is then given to evolutionary changes since the time that glaciers enveloped Europe A powerful message is conveyed for the maintenance of butterfly species on the smaller British islands now experiencing population losses at a rate unprecedented since the spread of the last ice sheets the incontrovertible importance of maintaining populations of species on nearby mainland sources for islands as pools for future migrants *Poet's Choice* Edward Hirsch,2006 A collection of revised and expanded writings culled from the author s popular Washington Post Book World Poet s Choice column demonstrates how poetry responds to world challenges and introduces the work of more than 130 writers [The Good, Green Gold of Spring: A Conservation Sociology of the Island Marble Butterfly](#) Jon Dahlem,2022-10-31 This book presents a case study of Island Marble Butterfly IMB conservation from an environmental sociological perspective Using qualitative methods the study explicates various social components of a collaboration of stakeholders working together to protect the species from extinction Rediscovered in 1998 after being presumed extinct for nearly a century the IMB persists exclusively among the San Juan Islands WA where the efforts of scientists local conservationists government employees and non profit organizations have sustained the species even achieving a listing under the Endangered Species Act For these reasons and many others the IMB presents a case in some ways fascinating for its idiosyncrasies and in other ways indicative of broader trends in conservation work in an era of rapid global biodiversity loss From the study emerges a call for increased sociological research that contributes knowledge beneficial to conservation practice or what the book calls conservation sociology The book reviews existing literature in this space and provides a framework for constructing research theory and application in conservation sociology As the social components of IMB conservation are explored so too are components of conservation sociology The book describes

competing norms and beliefs among IMB stakeholders demonstrating the capacity of conservation sociology to describe and interpret social phenomena in conservation work explores power dynamics in the collaboration using sociological theory to interpret significant events in IMB conservation and analyzes the significance of time in IMB conservation while providing suggestions for applied conservation work based in sociological perspectives The book accomplishes three main goals First it provides an account of details and events in Island Marble Butterfly conservation Second it defines positions and develops conservation sociology Third it demonstrates original research in conservation sociology resulting in a deep look at the complexities of the social components of species conservation **Poetry** Harriet Monroe,1986 **Ceylon, an Account of**

James Cleaves II,2015-12-03 The epic story of the scientists through the ages who have sought answers to life s biggest mystery How did it begin In this essential and illuminating history of Western science Bill Mesler and H James Cleaves II seek to answer the most crucial question in science How did life begin They trace the trials and triumphs of the iconoclastic scientists who have sought to solve the mystery from Darwin s theory of evolution to Crick and Watson s unveiling of DNA This fascinating exploration not only examines the origin of life question but also interrogates the very nature of scientific discovery and objectivity
