Principles Of Neo Plastic Art:

Principles of Neo-plastic Art Theo van Doesburg, 2020 Theo van Doesburg was a jack of all trades painter writer architect typographer and art theorist In this volume of the Bauhausb cher he attempts to make elementary concepts in the visual arts generally comprehensible He was addressing the modern artist of his day who had to deal with both shifting social paradigms and a changing understanding of art and art theory Van Doesburg describes theory as a necessary consequence of creative practice Artists he says do not write about art but from within art **Principles of Neo-plastic Art** ,1948 **Theo Van Doesburg** ,1966 Principles of Neo-plastic Art Theo van Doesburg,1968 **Theo Van Doesburg** Hans M. Wingler,1968

Theo Van Doesburg: Principles of Neo-Plastic Art Walter Gropius,László Moholy-Nagy,2021-01-12 The De Stijl protagonist s elucidation of the basics of neoplasticism Painter writer architect typographer art theorist and leader of the De Stijl movement Theo van Doesburg 1883 1931 was one of the great modernist polymaths and in this volume of the Bauhausb cher he attempts to make elementary concepts in the visual arts generally comprehensible for a broad audience Van Doesburg s book addresses the modern artist of his day who had to deal with both shifting social paradigms and a changing understanding of art and art theory Unifying a range of disciplines van Doesburg describes theory as a necessary consequence of creative practice artists he says do not write about art but from within art *Principles of Neo Plastic Art* is a revolutionary synthesis of practice and theory *Principles of neo-plastic art* Theo van Doesburg,1968 Principles of Neo-plastic art Theo van Doesburg,1969 **Towards Universality** Richard Padovan,2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier s creations was a self contained universe within a clear frame while Mies fluctuated between these two perspectives Artificial Intelligence and Architecture Stanislas Chaillou,2022-03-07 History and Panorama Artificial Intelligence s AI encounter with Architecture is still in its infancy However current experiments and applications already are a testimony to their gradual intersection This book provides an introduction to the topic through the triple lens of History Application and Theory A chronology of Architecture s technological evolution first puts AI back in the context of the discipline The author then presents a collection of AI s applications in Architecture The book finally gives the stage to contributors working at the forefront of this revolution From Harvard to Foster Partners their perspectives provide a panorama of the discourse surrounding AI s presence in the field

Halfway between research and practice this book offers to unveil the promise and challenges AI holds for Architecture
Artificial intelligence as a planning tool for architects From urban planning to floor plans Potential of a new way of working

Multidisciplinary Approaches to Visual Representations and Interpretations ,2004-12-09 The value of multi disciplinary research lies in the exchange of ideas and methods across the traditional boundaries between areas of study It could be argued that many of the advances in science and engineering take place because the ideas methods and the tools of thought from one discipline become re applied in another The topic of the visual has become increasingly important as advances in technology have led to multi media and multi modal representations and extended the range and scope of visual representation and interpretation in our lives Under this broad heading there are many different perspectives and approaches from across the entire spectrum of human knowledge and activity The editors and authors of this book aim to break down cross disciplinary barriers by bringing together people working in a wide variety of disciplines where visual representations and interpretations are exploited Contributions come from researchers actively investigating visual representations and interpretations in a wide variety of areas including art history biology clinical science cognitive science computer science design engineering linguistics mathematics philosophy physics psychology and sociology The book provides a forum for wide ranging and multi disciplinary contributions on visual representations and interpretations Contributors include researchers actively investigating visual representations and interpretations Content spans a wide variety of areas including but not limited to biology sociology and computer science Discusses how new technology has affected the visual representation of information

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak

Theoretical Approaches to the Archaeology of Ancient Greece Lisa Nevett, 2017-03-06 In the modern world objects and buildings speak eloquently about their creators Status gender identity and cultural affiliations are just a few characteristics we can often infer about such material culture But can we make similar deductions about the inhabitants of the first millennium BCE Greek world *Theoretical Approaches to the Archaeology of Ancient Greece* offers a series of case studies exploring how a theoretical approach to the archaeology of this area provides insight into aspects of ancient society An introductory section exploring the emergence and growth of theoretical approaches is followed by examinations of the potential insights these approaches provide The authors probe some of the meanings attached to ancient objects townscapes and cemeteries for those who created and used or inhabited them The range of contexts stretches from the early Greek communities during the eighth and seventh centuries BCE through Athens between the eighth and fifth centuries BCE and on into present day Turkey and the Levant during the third and second centuries BCE The authors examine a range of practices from the creation of individual items such as ceramic vessels and figurines through to the construction of civic buildings monuments and cemeteries At the same time they interrogate a range of spheres from craft production through civic and religious practices to funerary ritual

Truth Sean Cubitt, 2023-09-19 Ecologies of truth in a post truth era The problem

with Neo Nazis is not that they don't trust the media but that they trust them too much. White supremacists are absolutely convinced by their supremacy. They distrust technologies and climate change as much as the global poor because as white Europeans they believe they are exempt from exploitation. This book argues that the only truths possible in the 21st century are mobile inventive practices involving everything. European models of communication exclude technologies, nature, and leftover humanity. Tracing histories of their separation, Truth analyzes the struggle between the new dominance of information systems and the sensory worlds it excludes, not least the ancestral wisdom that the West has imprisoned in its technologies. The emergent cybernetics of the 1940s has become the dominant ideology of the 21st century. Truth opposes its division of the world between subjects and objects, signals and noise, emphasizing that there can be no return to some primal Eden of unfettered exchange. Instead, these divisions, which have fundamentally reorganized the commodity form that they inherited, are the historical conditions we must confront. Drawing on a wide range of aesthetic practices from literature, film, art, music, workplace, media, scientific instruments, and animal displays, Truth seeks out ways to create a new commons and a new politics grounded in aesthetic properties of creativity, senses, and perception that can no longer be restricted to humans alone.

The Chatter of the Visible Patrizia C. McBride, 2016-03-22. *The Chatter of the Visible* examines the paradoxical narrative features of the photomontage aesthetics of artists associated with Dada, Constructivism, and the New Objectivity. While montage strategies have commonly been associated with the purposeful interruption of and challenge to narrative consistency and continuity, McBride offers an historicized reappraisal of 1920s and 1930s German photomontage work to show that its peculiar mimicry was less a rejection of narrative and more an extension or permutation of it, a means for thinking in narrative textures exceeding constraints imposed by flat print media, especially the novel and other literary genres. McBride's contribution to the conversation around Weimar era montage is in her situation of the form of the work as a discursive practice in its own right, which affords humans a new way to negotiate temporality as a particular mode of thinking that productively relates the particular to the universal or as a culturally specific form of cognition.

Sensory Design Joy Monice Malnar, Frank Vodvarka, 2004. What if we designed for all of our senses? Suppose for a moment that sound, touch, and odor were treated as the equals of sight and emotion, considered as important as cognition. What would our built environment be like if sensory response, sentiment, and memory were critical design factors, the equals of structure and program? In *Sensory Design*, Joy Monice Malnar and Frank Vodvarka explore the nature of our responses to spatial constructs from various sorts of buildings to gardens and outdoor spaces to constructions of fantasy. To the degree that this response can be calculated, it can serve as a typology for the design of significant spaces, one that would sharply contrast with the Cartesian model that dominates architecture today. In developing this typology, the authors consult the environmental sciences, anthropology, psychology, and architectural theory, as well as the spatial analysis found in literary depiction. Finally, they examine the opportunities that CAVE and other immersive virtual reality technologies present in furthering a new

sensory oriented design paradigm The result is a new philosophy of design that both celebrates our sensuous occupation of the built environment and creates more humane design A revolutionary approach to the built environment that embraces all of our senses and modes of understanding **Good** Sean Cubitt,2025-04-01 What is the good life for me for us for the cosmos Good is an ecocritical enquiry into ethical and political dimensions of aesthetics Following Aristotle s lead it starts with ethics as the question concerning what is the good life for me moving on to politics as the good life for us Like Aristotle between ethics and politics it inserts the question of the good life for you and me the question of love In the end which is where we all live today it goes beyond Aristotle s human centred approach insisting that the good life cannot be thought or lived without including technologies and ecologies A truly cosmopolitan politics is a politics of the cosmos Learning from indigenous cultures it speaks from and with nature and machines in the form of gods and ancestors Packed with examples from banking apps to cave art economic manifestos to cookery passing through music painting poetry and film the book evokes critical traditions from across the world to present a lucid and accessible case for decolonial and ecocritical aesthetics

Realism, Rationalism, Surrealism Fer,Francis Haskell,Briony Fer,David Batchelor,Paul Wood,1993-01-01 This book begins by considering responses by French artists to the First World War showing how Purism Dada and early Surrealism are related to the ethos of post war reconstruction The authors then discuss the language of construction in places as dissimilar as France Germany and the Soviet Union the contrasting demands of the utility and decoration of objects and paintings and the relationship of surrealism to questions of sexuality and gender and to Freudian theory The book concludes by addressing the widespread debate over realism in art whether it represents an alternative to the elitism of the avant garde or whether avant garde art should play a role in the development of a modern realism *Primitivism, Cubism, Abstraction* Charles Harrison,Francis Frascina,Professor Francis Frascina,Gillian Perry,1993-01-01 On art in the early 20th century
