Los Angeles Magazine , 2000-12 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian

Private Landscapes Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind *Private Landscapes* profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists *Private Landscapes* provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere

The Urban Condition Ghent Urban Studies Team, 1999 What does the Western city at the end of the twentieth century look like How did the modern metropolis of congestion and density turn into a posturban or even postsuburban cityscape What are edge cities and technoburbs How has the social composition of cities changed in the postwar era What do gated communities tell us about social fragmentation Is public space in the contemporary city being privatized and militarized How can the urban self still be defined What role does consumer aestheticism have to play in this These and many more questions are addressed by this uniquely conceived multidisciplinary study *The Urban Condition* seeks to interfere in current debates over the future and interpretation of our urban landscapes by reuniting studies of the city as a physical and material phenomenon and as a cultural and mental arte fact The Ghent Urban Studies Team responsible for the writing and editing of this volume is directed by Kristiaan Versluys and Dirk De Meyer at the University of Ghent Belgium It is an interdisciplinary research team of young academics that further consists of Kristiaan Borret Bart Eeckhout Steven Jacobs and Bart Keunen The collective expertise of GUST ranges from architectural theory urban planning and art history to philosophy literary criticism and cultural theory

the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination of Koenig s Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles *Contemporary Architects* Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor s note **A History of Artificially Intelligent Architecture** Danyal Ahmed, 2023-10-23 A History of Artificially Intelligent Architecture Case Studies from the USA UK Europe and Japan 1949 1987 provides a comprehensive survey of architectural projects exhibiting intelligence since the Late First Century right up to the present day Tracing the social scientific and technological developments this book analyses case studies from both conceived and executed architectural projects by Architects and Cyberneticians from the United States United Kingdom Europe and Japan from 1949 87 From the Late First Century through to the Seventeenth Century the scientific endeavors of the Hero of Alexandria Ramon Llull Paracelsus Ren Descartes Jacques de Vaucanson Pierre Jacquet Droz and Charles Babbage have been presented in which they attempted to review analyse and conclude the notion of artificial intelligence Coming to the Twenty First Century and witnessing a period particularly from 1949 87 where nothing had been constant Architects and Cyberneticians whose architectural projects attempted to simulate intelligence include Cedric Price Richard Saul Wurman Nicholas Negroponte Kenzo Tange Arata Isozaki Charles Eames Ezra D Ehrenkrantz Richard Rogers Renzo Piano and Gordon Pask respectively This book asks How have Polymaths Architects and Cyberneticians simulated artificial intelligence in their scientific architectural projects Is it possible to define intelligence purely based on the history of architecture Or on a more extensive level is it possible to view artificial intelligence originating from the history of architecture instead of computational paradigm The transdisciplinarity of the book makes it of interest to researchers and students of technologically advanced architecture s history theory and criticism artificial intelligence cybernetics information and communications urban and sustainable design ergonomics computer applications and digital design and fabrication
