The New Masters of Capital

Timothy J. Sinclair, 2014-07-31 In *The New Masters of Capital* Timothy J Sinclair examines a key aspect of the global economy the rating agencies In the global economy trust is formalized in the daily operations of such firms as Moody's and Standard Poor's which continuously monitor the financial health of bond issuers ranging from private corporations to local and national governments Their judgments affect unimaginably large sums approximately 30 trillion in outstanding debt issues according to a recent Moody's estimate The difference between an AA and a BB rating may cost millions of dollars in interest payments or determine if a corporation or government can even issue bonds Without bond rating agencies there would be no standard means to compare risks in the global economy and international investment would be problematic Most observers assume that the agencies are neutral and scientific and that they interpret their role in narrowly economic terms But these agencies by their nature wield extraordinary power and exert massive influence over public policy Sinclair offers a highly accessible account of these institutions their origins and the rating processes they use to judge creditworthiness Illustrated with a wide range of cases this book offers a fresh assessment of the role of an often overlooked institution in the dynamics of modern global capitalism

Modern U.S. Corporate Scandals Jerry W Markham, 2015-01-28 A definitive new reference on the major failures of American corporate governance at the start of the 21st century Tracing the market boom and bust that preceded Enron's collapse as well as the aftermath of that failure the book chronicles the meltdown in the telecom sector that gave rise to accounting scandals globally Featuring expert analysis of the Sarbanes Oxley legislation that was adopted in response to these scandals the author also investigates the remarkable market recovery that followed the scandals An exhaustive guide to the collapse of the Enron Corporation and other financial scandals that erupted in the wake of the market downturn of 2000 this book is an essential resource for students teachers and professionals in corporate governance finance and law

Europe and the Governance of Global Finance Daniel Mügge, 2014 The European Union EU has emerged as a central actor in financial governance Hardly any corner of European financial markets remains untouched by EU rules and key regulatory competences have been shifted from national authorities to supranational ones At the same time the global context has become ever more important for how and to what effect the EU regulates its financial markets On the one hand EU policymaking is embedded in global initiatives such as the Basel Committee on Banking Supervision On the other hand the EU now rivals the USA in its ability to shape global rules Scholars and practitioners cannot make sense of EU rulemaking without studying its links to global financial governance just as to understand how global initiatives evolve they have to appreciate the rise of the EU as a global regulatory force This book charts and analyses this centrality of the European global link in financial governance for the first time Its chapters written by experts in the specific fields cover the whole breadth of financial markets They range from banking auditing and accounting to derivatives trading money laundering and tax governance This book offers comprehensive coverage of how and why global and European financial governance have co evolved over time how global and European rules institutions and actors are linked today and what this implies for future global and European financial governance It is essential reading for anyone who wants to understand the dynamics of either global or European financial regulation

Conflicts of Interest in the Financial Services Industry Andrew Crockett, 2003 The fifth report in this series focuses on conflicts of interest that arise when a firm combines multiple lines of business creating multiple interests Conflicts between research and underwriting in investment banking and between auditing and consulting in accounting firms are investigated as are the problems that arise from rating agencies providing consulting services and from universal banks combining commercial and investment banking In the recent stock market collapse confidence in the financial industry was shaken by numerous scandals Beginning with Enron in 2001 scandals brought about the demise of prominent financial figures damaged the reputation of premiere firms and destroyed the global accounting giant Arthur Andersen Central to this crisis was the exploitation of conflicts of interest Research analysts at investment banks were found to be distorting information at the behest of underwriting departments eager to promote new issues Auditors appeared to sanction misleading accounting in order to gain business for the consulting side of their firms Policy response in the United

States was quick Large fines were levied and regulators compelled the separation of financial security function constraining financial conglomerates But are these new regulations and safeguards adequate protection What costs do they impose on the industry This fifth title in the ICMP CEPR series of Geneva Reports on the World Economy examines the problem of conflicts of interest in the financial system Conflicts of interest lead to a decrease in information that makes it harder for the system to provide savers with the accurate essential information that induces them to provide credit to borrowers This study focuses on conflicts of interest that arise when a firm combines multiple lines of business creating multiple interests Conflicts between research and underwriting in investment banking and between auditing and consulting in accounting firms are investigated as are the problems that arise from rating agencies providing consulting services and from universal banks combining commercial and investment banking Determining the appropriate remedy for a conflict is a challenge because the elimination of conflicts may also eliminate benefits from economies of scope This study examines five generic remedies market discipline regulation for increased transparency supervisory oversight separation of financial activities by function and socialization of the collection and distribution of information The authors apply this framework to assess critically the Sarbanes Oxley Act and the Global Settlement between American regulators and investment banks
