## Shoes Ships Sealing Wax:

*The Sciences and the Humanities* W. T. Jones,      [The Economics of Feasible Socialism](#) Alec Nove, 2013-11-05 The first part of *The Economics of Feasible Socialism* demonstrates why Marx's theories provide no guide to the issues that must face economists under any realistically conceivable Socialism. The experience of communist ruled countries especially the former Soviet Union is often negative economic inefficiency bureaucracy despotism. The causes of these defects and possible remedies and reforms are discussed. The problems of transition in the context of Western industrialized countries and of developing countries is also examined with particular attention centred on the errors of economic policy in Chile and China amongst other countries.      *Making Sense of Nonsense* Raymond Moody, 2020-01-08 What do the whimsical writings of Dr Seuss have in common with near death experiences? The answer is that nonsense writing and spiritual experiences seem to defy all logic and yet they both can make a powerful personal impact. In this book New York Times bestselling author Dr Raymond Moody shares the groundbreaking results of five decades of research into the philosophy of nonsense revealing dynamic new perspectives on language logic and the mystical side of life. Explore the meaningful feelings that accompany nonsense language and learn how engaging with nonsense can help you on your own spiritual path. Discover how nonsense transcends classical logic opening the doorway to new spiritual and philosophical breakthroughs. With dozens of examples from literature comedy music and the history of religion this book presents a unique new approach to the mysteries of the human spirit.

**Subject Analysis Methodologies** E. D. Dym, 1985-10-01 Your choice for a text in document analysis is no longer limited to books containing only one specific method. This workbook of Readings representing an introductory state of the art approach to document analysis combines a full range of subject analysis techniques into a comprehensive single source volume.      **Physics and Whitehead** Timothy E. Eastman, Hank Keeton, 2012-02-01 Featuring discussions and dialogue by prominent scientists and philosophers this book explores the rich interface of contemporary physics and Whitehead inspired process thought. The contributors share the conviction that quantum physics not only corroborates many of Whitehead's philosophical theses but is also illuminated by them. Thus though differing in perspective or emphasis the contributions by Geoffrey Chew David Finkelstein Henry Stapp and other scientists conceptually dovetail with those of Philip Clayton Jorge Nobe Yutaka Tanaka and other process philosophers.

[A Walk from the Sea](#) Laurel Lorraine Lancer Ph.D., 2014-01-27 This is a collection of poems written by Dr Lancer over many years. The topics are varied. There are chapters about nature people one on the golden years one about fairy folk and there are two chapters devoted to poems for children. These Dr Lancer wrote when she was teaching poetry writing to the gifted and talented students and later students in grades 3 through 5 with interest in creative writing. There is one chapter devoted to copying the format and rhyming styles of famous poets. The rewrites are often of different topics than the original but more updated and often humorous. Dr Lancer is also a painter and has included a painting with an accompanying poem to head each chapter.      **Institutions of Law** Neil

MacCormick, 2007-01-11 *Institutions of Law* offers an original account of the nature of law and legal systems in the contemporary world. It provides the definitive statement of Sir Neil MacCormick's well-known institutional theory of law, defining law as institutional normative order and explaining each of these three terms in depth. It attempts to fulfil the need for a twenty-first century introduction to legal theory, marking a fresh start such as was achieved in the last century by H. L. A. Hart's *The Concept of Law*. It is written with a view to elucidating law, legal concepts and legal institutions in a manner that takes account of current scholarly controversies but does not get bogged down in them. It shows how law relates to the state and civil society, establishing the conditions of social peace and a functioning economy. In so doing, it takes account of recent developments in the sociology of law, particularly system theory. It also seeks to clarify the nature of claims to knowledge of law and thus indicate the possibility of legal studies having a genuinely scientific character. It shows that there is an essential value orientation of all work of this kind so that valid analytical jurisprudence not merely need not but cannot be positivist as that term has come to be understood. Nevertheless, it is explained why law and morality are genuinely distinct by virtue of the positive character of law contrasted with the autonomy that is foundational for morality.

**The Universe Around Us** James Jeans, 1929

**From Hand to Mouth** Michael C. Corballis, 2020-11-10 A groundbreaking theory of how language arose from primate gestures. It is often said that speech is what distinguishes us from other animals. But are we all talk? What if language was bequeathed to us not by word of mouth but as a hand-me-down? The notion that language evolved not from animal cries but from manual and facial gestures that for most of human history actions have spoken louder than words has been around since Condillac. But never before has anyone developed a full-fledged theory of how, why and with what effects language evolved from a gestural system to the spoken word. Marshaling far-flung evidence from anthropology, animal behavior, neurology, molecular biology, anatomy, linguistics and evolutionary psychology, Michael Corballis makes the case that language developed with the emergence of *Homo sapiens* from primate gestures to a true signed language complete with grammar and syntax and at best punctuated with grunts and other vocalizations. While vocal utterance played an increasingly important complementary role, autonomous speech did not appear until about 50,000 years ago, much later than generally believed. Bringing in significant new evidence to bolster what has been a minority view, Corballis goes beyond earlier supporters of a gestural theory by suggesting why speech eventually but not completely supplanted gesture. He then uses this milestone to account for the artistic explosion and demographic triumph of the particular group of *Homo sapiens* from whom we are descended. And he asserts that speech like written language was a cultural invention and not a biological fait accompli. Writing with wit and eloquence, Corballis makes nimble reference to literature, mythology, natural history, sports and contemporary politics as he explains in fascinating detail what we now know about such varied subjects as early hominid evolution, modern signed languages and the causes of left-handedness. *From Hand to Mouth* will have scholars and laymen alike talking and sometimes gesturing for years to come.

**Applied Intermediate Macroeconomics** Kevin D.

Hoover, 2012 A complete course in applied macroeconomics at the intermediate level that emphasizes the application of economic theory to real world data and policy
