A Short History of Anaesthesia Geoffrey B. Rushman, N. J. H. Davies, Richard Stuart Atkinson, 1996 The exciting developments since the 1840s have been professionally collated in this historical textbook The 1870s saw advances in the surgical care of patients of which anaesthesia played a pre eminent part as did other advances such as antisepsis These were part of an explosion of new science and technology altering forever the direction of progress in medicine **The History of Oncology** D. J. Th. Wagener, 2009-07-13 The story of oncology is not only fascinating but also contains many accounts of dead ends chance discoveries illusions mistakes and disappointments alongside the few successes These words are taken from the introduction to this book The author professor emeritus of Medical Oncology reviews all aspects of the problem of cancer from a historical perspective from the oldest existing records to the latest scientific and medical advances It will interest the many people engaged in the treatment of cancer to read how the current therapeutic methods came about and the book may also provide inspiration for cancer researchers and for all those directly or indirectly involved with cancer The layman looking for background information on a particular treatment may find it useful too The various chapters can be read independently A glossary and a few explanatory diagrams augment the text This book grew out of an invitation the author received to lecture on the history of oncology During his background reading he discovered that there was no single volume dealing with the entire history of the subject Fortunately however a great deal of information could be found here and there in the literature As he read he was struck by the fascinating stories behind many discoveries and felt impelled to put them together in a single comprehensive account The results of his labors are presented in this remarkable volume The author Prof D J Th Theo Wagener was head of the department of Medical Oncology at the Radboud University Nijmegen Medical Centre in the Netherlands from 1982 to 2001 chairman of the Educational Committee of the European Society of Medical Oncology ESMO a member of the Educational Committee of the American Society of Clinical Oncology ASCO and a member of various international scientific working groups mainly of the European Organization for Research and Treatment of Cancer EORTC

'Black but Human' Carmen Fracchia, 2019-10-16 Black but Human is the first study to focus on the visual representations of African slaves and ex slaves in Spain during the Hapsburg dynasty The Afro Hispanic proverb Black but Human is the main thread of the six chapters and serves as a lens through which to explore the ways in which a certain visual representation of slavery both embodies and reproduces hegemonic visions of enslaved and liberated Africans and at the same time provides material for critical and emancipatory practices by Afro Hispanics themselves The African presence in the Iberian Peninsula between the late fifteenth century and the end of the seventeenth century was as a result of the institutionalization of the local and transatlantic slave trades In addition to the Moors Berbers and Turks born as slaves there were approximately two million enslaved people in the kingdoms of Castile Aragon and Portugal The Black but Human topos that emerges from the African work songs and poems written by Afro Hispanics encodes the multi layered processes through which a black emancipatory subject emerges and a black nation forges a collective resistance It is visually articulated by Afro Hispanic and Spanish artists in religious paintings and in the genres of self portraiture and portraiture This extraordinary imagery coexists with the stereotypical representations of African slaves and ex slaves by Spanish sculptors engravers jewellers and painters mainly in the religious visual form and by European draftsmen and miniaturists in their landscape drawings and sketches for costume books
