Power and Passion in Shakespeare's Pronouns Penelope Freedman, 2017-03-02 In revealing patterns of you thou use in Shakespeare's plays this study highlights striking and significant shifts from one to the other Penelope Freedman demonstrates that understanding of the implications of you thou use in early modern English has been bedevilled by overconcern with issues of power and status and her careful research analysing all the plays reveals how a fuller understanding of Shakespeare's usage can provide a key to unlock puzzles of motive and character and a glass to clarify relationships and emotions The work focuses particularly on dialogue between men and women and sheds new light on male and female language use The scholarship presented in this volume is augmented with tables and a glossary of linguistic terms

Love, Like Pronouns Rosmarie Waldrop, 2003 With the title of her latest collection Love Like Pronouns Waldrop demonstrates with deft humor the relational aspects of any discourse And she implicitly suggests the similar slipperiness in human emotion and in human speech as both the love object and the pronoun's referent easily shift with even because of any attempt to articulate it The title also subtly resonates with Waldrop's admiration for other writers as well as demonstrates her awareness that each act of writing occurs in relation to and within the environment of other writings past and present In this collection poem cycles dedicated to other writers echo with subtle synchronisms of that writer's forms tones textures Yet from out of this synchronism Waldrop evolves her own unique mediums of address Each poem travels its own distinct and unrepeatable conduit between experience and language Waldrop is an accomplished and applauded writer of poetry fiction essays and translation

Triangulating Methodological Approaches in Corpus Linguistic Research Paul Baker, Jesse Egbert, 2016-06-10 Contemporary corpus linguists use a wide variety of methods to study discourse patterns This volume provides a systematic comparison of various methodological approaches in corpus linguistics through a series of parallel empirical studies that use a single corpus dataset to answer the same overarching research question Ten contributing experts each use a different method to address the same broadly framed research question In what ways does language use in online Q/A forum responses differ across four world English varieties India Philippines United Kingdom and United States Contributions will be based on analysis of the same 400 000 word corpus from online Q/A forums and contributors employ methodologies including corpus based discourse analysis audience perceptions Multi Dimensional analysis pragmatic analysis and keyword analysis In their introductory and concluding chapters the volume editors compare and contrast the findings from each method and assess the degree to which triangulating multiple approaches may provide a

more nuanced understanding of a research question with the aim of identifying a set of complementary approaches which could arguably take into account analytical blind spots Baker and Egbert also consider the importance of issues such as researcher subjectivity type of annotation the limitations and affordances of different corpus tools the relative strengths of qualitative and quantitative approaches and the value of considering data or information beyond the corpus Rather than attempting to find the best approach the focus of the volume is on how different corpus linguistic methodologies may complement one another and raises suggestions for further methodological studies which use triangulation to enrich corpus related research

Noun Phrase Structure in the Languages of Europe Frans Plank, 2008-08-22 The result of over five years of close collaboration among an international group of leading typologists within the EUROTYP program this volume is about the morphology and syntax of the noun phrase Particular attention is being paid to nominal inflectional categories and inflectional systems and to the syntax of determination modification and conjunction Its areal focus like that of other EUROTYP volumes is on the languages of Europe but in order to appreciate what is peculiarly European about their noun phrases a more comprehensive and genuinely typological view is being taken at the full range of cross linguistic variation within this structural domain There has been no shortage lately of contributions to the theory of noun phrase structure the present volume is however unique in the extent to which its theorizing is empirically grounded
