Magical Classroom Exploring Science Language And Perception With Children:

The Magical Classroom Michael J. Strauss, 2013-05-01 Imagine amazing your students by sticking a knitting needle through a balloon without popping it Or bending a spoon completely in half with only the power of your mind They would think their teacher is a magician They would want to know how you did it and would start asking questions to understand the strange phenomenon Abracadabra You have just actively engaged them in the process of scientific reasoning close observation questioning hypothesizing experimenting and coming to a conclusion You have also shown them how descriptive language can color what they see and don't see The Magical Classroom is about the science of magic This book provides teachers with clear step by step instructions on how to perform magical effects and illusions includes detailed drawings to illustrate the effects explains scientific phenomena behind magic requires only everyday materials offers variations and further study of each phenomenon covers electrical forces atmospheric pressure solids liquids gases mass density physical properties of giant molecules and many other physical science topics The Magical Classroom closely examines how to help children experience and describe the world how to experiment and ask questions about it and how to make decisions about what is true and what isn't *Resources in Education*, 1998

The Mind at Hand Michael J. Strauss, 2013-01-01 The Mind at Hand explores how artists scientists writers and others students and professionals alike see their world record it revise it and come to know it It is about the rough drawn sketch diagram chart or other graphic representation and the focus these provide for creative work that follows from them Such work could involve solving a problem composing a musical score proposing a hypothesis creating a painting and many other imaginative and inventive tasks The book is for visual learners of all kinds for scientists as well as artists and for anyone who keeps a journal notebook or lab book in order to think and create visually It is also a book for teachers and educational administrators interested in learning about new active learning strategies involving drawing and possible outcomes of these in classrooms The formulas and symbols of chemistry the diagrams and features of the landscape in geology and the organisms and structures in biology are all represented as images on pages or screens Students create them when studying problem solving and learning Once in front of their eyes they can be reconsidered revised and reconstructed into new images for further consideration and revision It is how artists often create a painting or a sculpture and how scientists come up with new hypotheses This is how learning occurs not only across disciplines but in all kinds of creative endeavors through a continuing process of creation revision and re-creation It is drawing to learn *Inside the Classroom* Bobbi Fisher, 1996 Kindergarten and first grade have many similarities as far as classroom management organization and materials children are engaged in writing reading literature social studies and science Although each grade is unique many of the concepts and teaching strategies appropriate to one can easily be applied to the other Inside the Classroom is a collection of articles by Bobbi Fisher many of which first appeared in Teaching Pre K 8 Fisher who has taught both kindergarten and first grade is often asked by teachers where they can find her articles Inside

the Classroom is the answer Here elementary teachers will learn how to set up a classroom environmental conducive to learning how to create a positive classroom community how to use reading and writing throughout the curriculum how to assist emergent and initial readers answers to spelling questions and how to conduct a visitors day Look--and Learn!
