Depression and

Your Child Deborah Serani, 2013-09-05 Seeing your child suffer in any way is a harrowing experience for any parent. Mental illness in children can be particularly draining due to the mystery surrounding it and the issue of diagnosis at such a tender age. Depression and Your Child gives parents and caregivers a uniquely textured understanding of pediatric depression: its causes, its symptoms, and its treatments. Serani weaves her own personal experiences of being a depressed child along with her clinical experiences as a psychologist treating depressed children. Current research, treatments, and trends are presented in easy-to-understand language, and tough subjects like self-harm, suicide, and recovery plans are addressed with supportive direction. Parents will learn tips on how to discipline a depressed child, what to expect from traditional treatments like psychotherapy and medication, how to use holistic methods to address depression, how to avoid caregiver burnout, and how to move through the trauma of diagnosis and plan for the future. Real-life cases highlight the issues addressed in each chapter, and resources and a glossary help to further understanding for those seeking additional information. Parents and caregivers are sure to find here a reassuring approach to childhood depression that highlights the needs of the child even while it emphasizes the need for caregivers to care for themselves and other family members as well.

How Do You Hug a Cactus? Reflective Parenting with Teenagers in Mind Sheila Redfern, 2024-03-21 Have you ever wondered what's going on in your teenager's mind? This engaging book will give you the tools to understand just that to ultimately help you keep the close connection you both need during these tricky years. Following on from her acclaimed book for parents of younger children, Sheila Redfern brings the reflective parenting model to parents of teenagers. Teenagers can be experienced as prickly and hard to get close to like a cactus, but Dr Redfern shows us how this stage of your child's life can be more enjoyable and connected than you'd imagined. Rather than focusing on their behaviours, this book emphasises how we can teach teenagers to manage their feelings and relationships in safe ways. It advocates theories underpinning reflective parenting, mentalizing, attachment, and neuroscience as essential for building resilience and security in young people, which is crucial through the storm and stress of adolescence. Chapters are filled with everyday relatable scenarios and practical advice on pressing issues such as self-harm, social media, and gaming risk, and ASD. There is also a chapter devoted to adoptive parents and foster carers. This practical guide aims to help readers become more reflective and available as parents and understand what might be in their teenager's head. It also serves as an essential resource for clinicians working with families.
