101 WAYS TO BE LUCKY Richard de Meath, 2012-07-23 The challenge of this book is one that proved attractive to the writers eliciting quite a a wide variety of interesting thoughts that I urged them to keep to themselves and surprise me I feel confident the resulting views are not only appealing but quite possibly will also encourage you to think along more positive lines Many of the writers believe that luck is more of a state of mind rather than mere chance Others who claim that it is better to be born lucky than rich and I must say that I too think along these lines There are writers who write of the circumstances where they met their true soulmate after the breakup of an unhappy marriage Of course everyone is aware of lucky Lotto winners the fortunate few who appear with annoying regularity in our newspapers or even more irritatingly on our television screen smiling at the camera just to tell us that life will not change Who are they trying to kid

Brand New Justice Simon Anholt, 2006-08-11 Recently vilified as the prime dynamic driving home the breach between poor and rich nations here the branding process is rehabilitated as a potential saviour of the economically underprivileged Brand New Justice now in a revised paperback edition systematically analyses the success stories of the Top Thirteen nations demonstrating that their wealth is based on the last mile of the commercial process buying raw materials and manufacturing cheaply in third world countries these countries realise their lucrative profits by adding value through finishing packaging and marketing and then selling the branded product on to the end user at a hugely inflated price The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process Applying his observations on economic history and the development and impact of global marketing Anholt presents a cogent plan for developing nations to benefit from globalization So long the helpless victim of capitalist trading systems he shows that they can cross the divide and graduate from supplier nation to producer nation Branding native produce on a global scale making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the last mile benefits are key to this graduation and fundamental to forging a new global economic balance Anholt argues with a forceful logic but also backs his hypothesis with enticing glimpses of this process actually beginning to take place Examining activities in India Thailand Russia and Africa among others he shows the risks challenges
