Mathematical development depends on children becoming confident and competent in learning and using key skills.

This area of learning includes counting, sorting, matching, seeking patterns, making connections, recognising relationships and working with numbers, shapes, space and measures.

The following images give ideas and examples of how early years practitioners around the country are supporting this area of learning in their outdoor environment.

*Text and captions sourced from Curriculum Guidance for the Foundation Stage*

Mathematical understanding should be developed through stories, songs, games and imaginative play, so that children enjoy using and experimenting with numbers.

**Transforming Teaching in Math and Science** Adam Gamoran, 2003-01-01 Teachers often want to learn new ideas and approaches to improve their teaching but their efforts are often blocked by structural constraints in their districts and schools How can schools overcome these barriers to provide more supportive environments

for change The authors answer this question through the study of six cases of schools and districts where teachers and researchers collaborated to develop teaching for understanding in math and science This new book features a new conceptual model of how school resources relate to teaching and learning focusing not only on material resources such as time and money but also on human and social resources methods that administrators can use to support teachers who want to improve their teaching of math and science elements that professional developers should look for in a school environment when they are considering working with staff on teaching improvements and answers to important questions including how schools operate as organizations how they control work how they respond to changes in their environment and how they improve classroom teaching and learning

**Spiritual Mathematics** John Dunne-Brady, 2014-02-13 This book opened an entirely new vista for organizing and using basic numbers It investigated standard linear numbers 1 2 3 4 5 and how they adversely affected our thinking and actions It carefully described a circular number system in which numbers were placed on concentric circles rather than on straight lines This new arrangement might very differently and beneficially affect our daily thought processes and activities The key discovery involved a series of ten mandalas circular patterns made from everyday numbers The book correlated these new breakthroughs with ancient spiritual patterns and practices found in the I Ching Yoga Kabala and in both Pagan and Christian mysteries These older teachings included the chakras tree of life tarot cards and sacraments Spiritual Mathematics gave a scientific explanation for many spiritual values and sacred phenomena It also emphasized the underlying spiritual realities encountered within modern scientific dogmas
