Adults' Mathematical Thinking and Emotions Jeff Evans,2000 The crisis around teaching and learning of mathematics and its use in everyday life and work relate to a number of issues These include The doubtful transferability of school maths to real life contexts the declining participation in A level and higher education maths courses the apparent exclusion of some groups such as women and the aversion of many people to maths This book addresses these issues by considering a number of key problems in maths education and numeracy differences among social groups especially those related to gender and social class the inseparability of cognition and emotion in mathematical activity the understanding of maths anxiety in traditional psychological psychoanalytical and feminist theories

how adults numerate thinking and performance must be understood in context The author s findings have practical applications in education and training such as clarifying problems of the transfer of learning and of countering maths anxiety

Learning Pleasure Mathematics C. Van Bosch,2003-12-01 *Mathematics without Apologies* Michael

Harris,2017-05-30 An insightful reflection on the mathematical soul What do pure mathematicians do and why do they do it Looking beyond the conventional answers for the sake of truth beauty and practical applications this book offers an eclectic panorama of the lives and values and hopes and fears of mathematicians in the twenty first century assembling material from a startlingly diverse assortment of scholarly journalistic and pop culture sources Drawing on his personal experiences and obsessions as well as the thoughts and opinions of mathematicians from Archimedes and Omar Khayy m to such contemporary giants as Alexander Grothendieck and Robert Langlands Michael Harris reveals the charisma and romance of mathematics as well as its darker side In this portrait of mathematics as a community united around a set of common intellectual ethical and existential challenges he touches on a wide variety of questions such as Are mathematicians to blame for the 2008 financial crisis How can we talk about the ideas we were born too soon to understand And how should you react if you are asked to explain number theory at a dinner party Disarmingly candid relentlessly intelligent and richly entertaining *Mathematics without Apologies* takes readers on an unapologetic guided tour of the mathematical life from the philosophy and sociology of mathematics to its reflections in film and popular music with detours through the mathematical and mystical traditions of Russia India medieval Islam the Bronx and beyond

The Pleasure of Thinking Tania Zittoun,2023-10-19

Tania Zittoun demonstrates that there is pleasure in thinking and that the pleasure of thinking plays a key role in our lives in the development of children in learning in adult life and in ageing Drawing on arts and philosophy exploring research in developmental psychology cultural psychology and psychoanalysis it highlights five modalities of thinking curiosity the functional pleasure of pursuing a task the pleasure of discovery the dialogical pleasure of thinking with others and a meta pleasure This book proposes a unique integrative model of thinking conceived as a situated activity following trajectories that combine modalities of pleasure Evolving with time the pleasure of thinking can take place as we reason make sense or daydream at school at work when we garden or do science Academics and graduate students in sociocultural critical developmental and cognitive psychology will benefit from *The Pleasure of Thinking* *Toward a Visually-Oriented School Mathematics Curriculum* Ferdinand Rivera,2011-01-06 What does it mean to have a visual representation of a mathematical object concept or process What visualization strategies support growth in mathematical thinking reasoning generalization and knowledge Is mathematical seeing culture free How can information drawn from studies in blind subjects help us understand the significance of a multimodal approach to learning mathematics *Toward a Visually Oriented School Mathematics Curriculum* explores a unified theory of visualization in school mathematical learning via the notion of progressive modeling Based on the author s longitudinal research investigations in elementary and middle school classrooms

the book provides a compelling empirical account of ways in which instruction can effectively orchestrate the transition from personally constructed visuals both externally drawn and internally derived into more structured visual representations within the context of a socioculturally grounded mathematical activity Both for teachers and researchers a discussion of this topic is relevant in the history of the present The ubiquity of technological tools and virtual spaces for learning and doing mathematics has aroused interest among concerned stakeholders about the role of mathematics in these contexts The book begins with a prolegomenon on the author's reflections on past and present visual studies in mathematics education In the remaining seven chapters visualization is pursued in terms of its role in bringing about progressions in mathematical symbolization abduction pattern generalization and diagrammatization Toward a Visually Oriented School Mathematics Curriculum views issues surrounding visualization through the eyes of a classroom teacher researcher it draws on findings within and outside of mathematics education that help practitioners and scholars gain a better understanding of what it means to pleasurably experience the symmetric visual symbolic reversal phenomenon that is seeing the visual in the symbolic and the symbolic in the visual
