

# MARVELOUS MATH

by Rebecca Kai Dotlich

How fast does a New York taxi go?  
What size is grandpa's attic?  
How old is the oldest dinosaur?  
The answer's in Mathematics!

How many seconds in an hour?  
How many in a day?  
What size are the planets in the sky?  
How far to the Milky Way?

How fast does lightning travel?  
How slow do feathers fall?  
How many miles to Istanbul?  
Mathematics knows it all!

## Mathematics And Other Poems:

**Mathematics & Other Poems** William Wall, 1997 This collection has won two major awards the Patrick Kavanagh award 1995 and the American Ireland Fund Listowel Writers Week Poetry Prize 1996 The title poem Mathematics is a witty sonnet sequence which explores love and loss through the language and imagery of mathematics It sets the question Where is your Euclid now my love and in a book that ranges from the devastating elegy The Wake in the House to the tenderness of Sick Child this question provokes complex and subtle answers In the end though it is the emotional intensity of the writing that remains in the mind *Imagination's Other Place*, 1955 Topics range from the creation of the universe to a delicate medical operation in poetry that is not always reverent or serious

**The Poetry of Mathematics and Other Essays** David Eugene Smith (mathematics), 1947 X and other poems from A to Z Worth Bateman, 2012 With a keen eye for detail and in a way that is accessible and clear Worth Bateman describes the fullness of life through the lens of ordinary events and the hard truths pleasures foibles and follies familiar to us all He writes in a style that is thoughtful ironic good natured and wise as in these lines from the title poem on the parallels for a young teenager between learning algebra and the pull of sexual attraction I remember it was fun once we got the hang of it perhaps a little taste of power playing in this algebraic world solving for the unknown quantity not unlike the feeling I had a few years later close dancing at the Junior Prom after a little bit of trial and error learning how to do it right then having the fun of solving for x And in these lines on love s many facets lasting love seems like a set of skills like a trade or craft we slowly learn to make a work worth being part of only love makes our life worthwhile but love won t save us in the end He asks us to think outside the usual norms Time marches on but suppose it didn t Time waits for no man but suppose it did Coming to poetry late after another long successful and very different career Worth Bateman is an impressive new voice on the poetry scene For poetry a late bloomer

tone with humor and illustrating each chapter with countless examples Birken and Coon begin with patterns we can see hear and feel and then move to more complex patterns Number systems and nursery rhymes lead to the Golden Mean and sestinas Simple patterns of shape introduce tessellations and concrete poetry Fractal geometry makes fractal poetry possible Ultimately patterns for the mind lead to questions How do mathematicians and poets conceive of proof paradox and infinity What role does analogy play in mathematical discovery and poetic expression The book will be of special interest to readers who enjoy looking for connections across traditional disciplinary boundaries Discovering Patterns in Mathematics and Poetry features centuries of creative work by mathematicians poets and artists including Fibonacci Albrecht Dürer M C Escher David Hilbert Benoit Mandelbrot William Shakespeare Edna St Vincent Millay Langston Hughes E E Cummings and many contemporary experimental poets Original illustrations include digital photographs mathematical and poetic models and fractal imagery

**Mathematics, Poetry And Beauty** Ron Aharoni, 2014-12-23 What does mathematics have to do with poetry Seemingly nothing Mathematics deals with abstractions while poetry with emotions And yet the two share something essential Beauty Euclid alone has looked on beauty bare says the title of a poem by Edna St Vincent Millay A winner of the CHOICE Outstanding Academic Title 2015 Mathematics Poetry and Beauty tries to solve the secret of the similarity between the two domains It tries to explain how a mathematical argument and a poem can move us in the same way Mathematical and poetic techniques are compared with the aim of showing how they evoke the same sense of beauty The reader may find that as Bertrand Russell said Mathematics rightly viewed possesses not only truth but supreme beauty a beauty hold and austere like that of sculpture sublimely pure and capable of a stern perfection such as only the greatest art can show
