Mathematics Society And Curricula:

Mathematics Education in Korea Jinho Kim, 2013 This book will introduce the history and practices of mathematics education in Korea How it has been influenced from Japan America and other countries and has developed into the unique Korean style of mathematics education The editors have planned to include most of the topics researchers outside Korea want to know mathematics education in Korea Rethinking the Mathematics Curriculum Celia Hoyles, Candia Morgan, Geoffrey Woodhouse, 2002-01-04 At a time when political interest in mathematics education is at its highest this book demonstrates that the issues are far from straightforward A wide range of international contributors address such questions as What is mathematics and what is it for What skills does mathematics education need to provide as technology advances What are the implications for teacher education What can we learn from past attempts to change the mathematics curriculum Rethinking the Mathematics Curriculum offers stimulating discussions showing much is to be learnt from the differences in culture national expectations and political restraints revealed in the book This accessible book will be of particular interest to policy makers curriculum developers educators researchers and employers as well as the general reader Schooling, Society and Curriculum Alex Moore, 2006-08-10 Schooling Society and Curriculum offers a much needed reassessment and realignment of curriculum studies in the UK and international contexts Comprising a collection of eleven original chapters by prominent nationally and internationally known experts in the field of curriculum studies the book leads and fosters critical generic debates about formal education and its relationships to wider society Focusing on key debates that have been present for as long as formal state education has been in existence the contributors contextualise them within a future orientated perspective that takes particular account of issues specific to life in the early years of the twenty first century These include globalisation and nationalism poverty and wealth what it means to be a good citizen cultural pluralism and intolerance and centrally what it is that young people need from a school curriculum in order to develop as happy socially just adults in an uncertain and rapidly changing world The book is organized into four sections issues and contexts values and learners school curricula in the digital age exploring the possible globalisation localisation and utopias *Handbook of International Research in Mathematics Education* Lyn D. English, David Kirshner, 2010-04-02 The second edition continues the mission of bringing together important new mathematics education research that makes a difference in both theory and practice It updates and extends the Handbook's original key themes and issues for international research in mathematics education for the 21st century namely priorities in international mathematics education research lifelong democratic access to powerful mathematical ideas advances in research methodologies influences of advanced technologies Each of these themes is examined in terms of learners teachers and learning contexts with theory development being an important component of all these aspects This edition also examines other catalysts that have gained increased import in recent years including a stronger focus on the teacher and teacher practice a renewed interest in theory

development an increased focus on the mathematics needed in work place settings and a proliferation of research designs and methodologies that have provided unprecedented opportunities for investigating and ultimately improving mathematical teaching and learning This edition includes ten totally new chapters all other chapters are thoroughly revised and updated

International Perspectives on Mathematics Curriculum Denisse R Thompson, Mary Ann Huntley, Christine Suurtamm, 2018-01-01 Curriculum can be defined in a variety of ways It might be viewed as a body of knowledge a product or a process Curricula can differ as they are conceptualized from various theoretical perspectives to address the needs of teachers students and the context of schooling One reason to study curriculum is to reveal the expectations processes and outcomes of students school learning experiences that are situated in different cultural and system contexts further studies of curriculum practices and changes are much needed to help ensure the success of educational reforms in the different cultural and system contexts Kulm Li 2009 p 709 This volume highlights international perspectives on curriculum and aims to broaden the wider mathematics education community s understandings of mathematics curriculum through viewing a variety of ways that curricula are developed understood and implemented in different jurisdictions countries Within this volume we define curriculum broadly as the set of mathematics standards or outcomes the messages inherent in mathematics curriculum documents and resources how these standards are understood by a variety of stakeholders and how they are enacted in classrooms The focus is on the written implied and enacted curriculum in various educational settings throughout the world

Subjectivity, Curriculum, and Society Tero Autio, 2006-05-15 In this book Tero Autio traces not only the key philosophical currents that structure traditional Anglo American instrumental curriculum theory and Didaktik theories of curriculum which are lesser known in the U S but also the divide between them and implicitly the opportunities for traversing this divide Using careful historical and theoretic

Sociocultural Research on Mathematics Education Bill Atweh, Helen Forgasz, Ben Nebres, 2013-03-07 This volume the first to bring together research on sociocultural aspects of mathematics education presents contemporary and international perspectives on social justice and equity issues that impact mathematics education In particular it highlights the importance of three interacting and powerful factors gender social and cultural dimensions Sociocultural Research on Mathematics Education An International Perspective is distinguished in several ways It is research based Chapters report on significant research projects present a comprehensive and critical summary of the research findings and offer a critical discussion of research methods and theoretical perspectives undertaken in the area It is future oriented presenting recommendations for practice and policy and identifying areas for further research It deals with all aspects of formal and informal mathematics education and applications and all levels of formal schooling As the context of mathematics education rapidly changes with an increased demand for mathematically literate citizenship an increased awareness of issues of equity inclusivity and accountability and increased efforts for globalization of curriculum development and research questions are being raised more than ever before about the problems of teaching and

learning mathematics from a non cognitive science perspective This book contributes significantly to addressing such issues and answering such questions It is especially relevant for researchers graduate students and policymakers in the field of mathematics education

Transforming Curriculum for A Culturally Diverse Society Etta R. Hollins,2013-10-18 The intention of this book is to engage educators in transforming the public school curriculum for a culturally diverse society This means more than including knowledge about diverse populations It means reconceptualizing school practices through debate deliberation and collaboration involving the diverse voices that comprise the nation Certain key questions must be addressed in this process What should be the purpose of schooling in a culturally diverse society Who should be involved in curriculum planning and what process should be employed How is the actualized curriculum differentiated What is the relationship between school practices and the structure of the larger society How should the curriculum be evaluated The authors of the essays in this book address critical perspectives from which a framework is constructed for a discourse on planning curriculum for a culturally diverse society In a substantive introduction Hollins presents the major themes and overall goals of the book and describes how the readings in each of the four parts are linked to each other and to these themes and goals Each part begins with critical questions and an overview to provide a framework and a focus for the readings that follow and concludes with suggested learning experiences
