Targeting Maths for Victoria Katy Pike, 2006 **Insights into Teaching Mathematics** Anthony Orton, Leonard Frobisher, 2004-10-01 Providing essential guidance and background information about teaching mathematics this book is intended particularly for teachers who do not regard themselves as specialists in mathematics It deals with issues of learning and teaching including the delivery of content and the place of problems and investigations Difficulties which pupils encounter in connection with language and symbols form important sections of the overall discussion of how to enhance learning The curriculum is considered in brief under the headings of number algebra shape and space and data handling and special attention is paid to the topic approach and mathematics across the curriculum The assessment of mathematical attainment is also dealt with thoroughly Teachers will find this book an invaluable companion in their day to day teaching

Resources in Education, 2001 **Using Design Research and History to Tackle a Fundamental Problem with School Algebra** Sinan Kanbir, M. A. (Ken) Clements, Nerida F. Ellerton, 2017-10-28 In this well illustrated book the authors Sinan Kanbir Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school algebra represents a unidimensional trait

Kanbir Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce s triadic signifier interpretant signified theory which is in the realm of semiotics with Johann Friedrich Herbart s theory of apperception and Ken Clements and Gina Del Campo s theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes Practicing classroom teachers formed part of the research team This book appears in Springer s series on the History of Mathematics Education Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education The results of the well designed classroom intervention are sufficiently impressive that the study might have created and illuminated a pathway for future researchers to take *Building School and Home* , **Kindergarten Transition and Readiness**

Andrew J. Mashburn, Jennifer LoCasale-Crouch, Katherine C. Pears, 2018-06-09 This book presents a comprehensive overview of children s transitions to kindergarten as well as proven strategies that promote their readiness It presents theories and research to help understand children s development during the early childhood years It describes evidence based interventions that support children in developmental areas essential to school success including cognitive social emotional and self regulatory skills Chapters review prekindergarten readiness programs designed to promote continuity of learning in anticipation of the higher grades and discuss transitional concerns of special populations such as non native speakers children with visual and other disabilities and children with common temperamental issues The volume concludes with examples of larger scale systemic approaches to supporting children s development during the transition to kindergarten describing a coherent system of early childhood education that promotes long term development Featured topics include Consistency in children s classroom experiences and implications for early childhood development Changes in school readiness in U S kindergarteners Effective transitions to kindergarten for low income children The transition into kindergarten for English language learners The role of close teacher child relationships during the transition into kindergarten Children s temperament and its effect on their kindergarten transitions Kindergarten Transition and Readiness is a must have resource for researchers clinicians and related professionals and graduate students in child and school psychology educational psychology social work special education and early childhood education *Jacaranda Science Quest 8 Victorian Curriculum, 3e learnON and Print* Graeme Lofts, 2025-08-25 **Helping Children Learn Mathematics** Robert

Mansfield,N.A. Pateman,N. Bednarz,2013-03-09 Social constructivism is just one view of learning that places emphasis on the social aspects of learning Other theoretical positions such as activity theory also emphasise the importance of social interactions Along with social constructivism Vygotsky s writings on children s learning have recently also undergone close scrutiny and researchers are attempting a synthesis of aspects of Vygotskian theory and social constructivism This re examination of Vygotsky s work is taking place in many other subject fields besides mathematics such as language learning by young children It is interesting to speculate why Vygotsky s writings have appealed to so many researchers in different cultures and decades later than his own times Given the recent increased emphasis on the social nature of learning and on the interactions between student teacher and context factors a finer grained analysis of the nature of different theories of learning now seems to be critical and it was considered that different views of students learning of mathematics needed to be acknowledged in the discussions of the Working Group Proceedings of the Fourth International Congress on Mathematical Education M. Zweng,Green,Kilpatrick,Pollack,Suydam,2012-12-06 Henry O Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill New Jersey USA The Fourth International Congress on Mathematics Education was held in Berkeley California USA August 10 16 1980 Previous Congresses were held in Lyons in 1969 Exeter in 1972 and Karlsruhe in 1976 Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries at least half of these come from outside of North America About 450 persons participated in the program either as speakers or as presiders approximately 40 percent of these came from the U S or Canada There were four plenary addresses they were delivered by Hans Freudenthal on major problems of mathematics education Hermina Sinclair on the relationship between the learning of language and of mathematics Seymour Papert on the computer as carrier of mathematical culture and Hua Loo Keng on popularising and applying mathematical methods George Polya was the honorary president of the Congress illness prevented his planned attendance but he sent a brief presentation entitled Mathematics Improves the Mind There was a full program of speakers panelists debates miniconferences and meetings of working and study groups In addition 18 major projects from around the world were invited to make presentations and various groups representing special areas of concern had the opportunity to meet and to plan their future activities
