Barber, Michael J. Gargas McGrath, Art and politics are often regarded as denizens of different realms but few artists have been comfortable with the notion of a purely aesthetic definition of art The artist has a public and thus

political vision of the world interpreted by his art no less than the statesman and the legislator have a creative vision of the world they wish to make The sixteen original essays in this volume bear eloquent witness to this interpenetration of art and politics Each confronts the intersection of the aesthetic and the social each is concerned with the interface of poetic vision and political vision of reflection and action They take art in the broadest sense ranging over poets dramatists novelists essayists and filmmakers Their focus is on art and its political dilemmas not simply on the artist They consider the issues raised for politics and culture by alienation violence modernization technology democracy progress and revolution And they debate the capacity of art to stimulate social change and incite revolution the temptations of social control of culture and of political censorship the uncertain relationship between art and history the impact of economic structure on artistic creation and of economic class on artistic product the common ground between art and legislation and between creativity and control

Architecture, Power and National Identity Lawrence Vale, 2014-05-01 The first edition of Architecture Power and National Identity published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea *Saturday Review*, 1969 Class, Caste and Color Wilmot James, 2017-09-29 This volume is the first general social and economic history of the Western Cape of South Africa Until recently this region had been largely neglected by historians because it does not occupy a central place in the national political economy Wilmot G James and Mary Simons argue that a great deal about modern South Africa has been shaped by the distinctive society and economy of the Western Cape Its history also reveals striking parallels and contrasts with other regions of the African continent The Western Cape is the only region of South Africa to have experienced slavery In this sense the Western Cape has historical traditions more akin to colonial slave societies of the Americas than to those of the rest of Africa Moreover in contrast to the rest of South Africa a proletariat emerged in the Western Cape early in its history at the start of the eighteenth century There developed a much more stable and enduring system of class and labor relations In the twentieth century these became closely enmeshed with race and status Racial paternalism and the close correlation between class caste and color have their historical roots in the Western Cape The book is arranged thematically and explores the social and economic consequences of slavery and emancipation in the eighteenth and nineteenth centuries Issues of economy and labor such as economic underdevelopment in the Western Cape the labor market and trade union organization in the twentieth century are examined The authors also treat the role of the state in shaping Western Cape society Class Caste and Color is not only a groundbreaking work in the study of South Africa but provides an agenda for future researchers It will be essential reading for historians economists and Africa area specialists
