**Videophilosophy** Maurizio Lazzarato, 2019-02-12 The Italian philosopher Maurizio Lazzarato has earned international acclaim for his analysis of contemporary capitalism in particular his influential concept of immaterial labor and his perceptive writings on debt In *Videophilosophy* he reveals the underpinnings of contemporary subjectivity in the aesthetics and politics of mass media First written in French and published in Italian and later revised but never published in full this book discloses the conceptual groundwork of Lazzarato's thought as a whole for a time when his writings have become increasingly influential Drawing on Bergson Nietzsche Benjamin Deleuze and Guattari and the film theory and practice of Dziga Vertov Lazzarato constructs a new philosophy of media that ties political economy to the politics of aesthetics Through his concept of machines that crystallize time he argues that the proliferation of digital technologies over the past half century marks the transition to a new mode of capitalist production characterized by unprecedented forms of subjection This new era of the commodification of the self Lazzarato declares demands novel types of political action that challenge the commercialization and exploitation of time This crucial text by an essential contemporary thinker offers vital new perspectives on aesthetics politics and media and critical theory

**The Image in French Philosophy** Temenuga Trifonova,2007-01-01 The Image in French Philosophy challenges dominant interpretations of Bergson Sartre Lyotard Baudrillard and Deleuze by arguing that their philosophy was not a critique but a revival of metaphysics as a thinking pertaining to impersonal forces and distinguished by an aversion to subjectivity and an aversion of the philosophical gaze away from the discourse of vision and thus away from the image Insofar as the image was part of the discourse of subjectivity representation getting rid of the subject involved smuggling the concept of the image out of the discourse of subjectivity representation into a newly revived and ethically flavored metaphysical discourse a metaphysics of immanence which was more interested in consciousness rather than subjectivity in the inhuman rather than the human in the virtual rather than the real in Time rather than temporalization in Memory rather than memory images in Imagination rather than images in sum in impersonal forces de personalizing experiences states of dis embodiment characterized by the breaking down of sensory motor schemata Bergson s pure memory Sartre s image consciousness Deleuze s time image or more generally in that which remains beyond representation i e beyond subjectivity Lyotard s sublime Baudrillard s fatal object The book would be of interest to scholars and students of philosophy aesthetics and film theory

Anna Comnena Georgina Buckler,1929 **Being and Film** Christine Reeh-Peters,2021-03-16 This book develops the so called solaristic ontology of film by building a philosophical system based on an inquiry into the nature of film being and reality This solaristic system appropriates the aesthetic ideas and principles of thought present in the 1972 sci fi movie Solaris by Andrei Tarkovsky This movie is the main center of analysis here since it is highly symptomatic of the medium s philosophical self reflexivity and its intriguing correlation with reality and being The solaristic science is a fictional science introduced in the movie s diegesis and dedicated to the investigation of the planet Solaris an unattainable challenge In this sense the solaristic system closes the film s narrative by telling a philosophical story on the planet Solaris The book thus details a philosophical form of concept art and at the same time builds on previous results of film philosophy as well as the speculative turn in contemporary philosophy
