Matters of Life and Death Tom L. Beauchamp, 1960 *Ethical Theory* Russ Shafer-Landau, 2007-07-30 In presenting this reader on ethical theory Shafer Landau philosophy U of Wisconsin has made sure to cover the standard topics of the day consequentialism deontology contractarianism and virtue ethics but has also sought to include areas that are less common in sections on moral standing moral responsibility moral knowledge and works that question the very possibility of systematic ethics He also includes a section that discusses ethics and religion and another that examines prima facie duties and particularism Rather than include critics views following the various theoretical presentations he has instead decided to include more works of allied thinkers in order to provide readers with a more nuanced view of the particular view in question Selections from classic writers such as Aristotle Thomas Hobbes Immanuel Kant and Plato are accompanied by more contemporary writings Annotation 2007 Book News Inc Portland OR booknews.com Distributed by Syndetic Solutions LLC

Morality and the Human Goods Alfonso Gomez-Lobo, 2002 A concise and accessible introduction to natural law ethics this book introduces readers to the mainstream tradition of Western moral philosophy Building on philosophers from Plato through Aquinas to John Finnis Alfonso G mez Lobo links morality to the protection of basic human goods life family friendship work and play the experience of beauty knowledge and integrity elements essential to a flourishing happy human life G mez Lobo begins with a discussion of Plato's Crito as an introduction to the practice of moral philosophy showing that it requires that its participants treat each other as equals and offer rational arguments to persuade each other He then puts forth a general principle for practical rationality one should pursue what is good and avoid what is bad The human goods form the basis for moral norms that provide a standard by which actions can be evaluated do they support or harm the human goods He argues that moral norms should be understood as a system of rules whose rationale is the protection and enhancement of human goods A moral norm that does not enjoin the preservation or enhancement of a specific good is unjustifiable Shifting to a case study approach G mez Lobo applies these principles to a discussion of abortion and euthanasia The book ends with a brief treatment of rival positions including utilitarianism and libertarianism and of conscience as our ultimate moral guide Written as an introductory text for students of ethics and natural law **Morality and the Human Goods** makes arguments consistent with Catholic teaching but is not based on theological considerations The work falls squarely within the field of philosophical ethics and will be of interest to readers of any background

Consequentialism and Environmental Ethics Avram Hiller,Ramona Ilea,Leonard Kahn,2013-12-04 This volume works to connect issues in environmental ethics with the best work in contemporary normative theory Environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent This book articulates and evaluates consequentialist responses to that challenge Contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues In particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation **Debating Health Care Ethics, Third Edition** Doran Smolkin,Patrick Findler,Warren

Bourgeois,2025-04-28 *Debating Health Care Ethics Third Edition* explores contemporary moral challenges in health care through a unique debate format providing students with the essential tools to understand and critically evaluate the leading arguments in the field and to develop their own arguments on important moral problems in health care The first three chapters explore the nature of arguments philosophical methodology and a range of leading normative ethical theories The remaining chapters introduce students to moral problems in health care through dramas that feature complex scenarios involving patients family members and health care providers Each drama is followed by a lively debate where the authors consider and evaluate rival arguments concerning the moral issues raised by the drama The dramas encourage students to start thinking about ethical issues in health care The debates then demonstrate how arguments are developed and criticized These debates also encourage students to develop and defend their own arguments on these topics This technique is more interactive and approachable than standard philosophical texts This third edition contains updated chapters and dramas that reflect recent changes in health care in Canada One such change is to the chapter on euthanasia which now includes a drama and a debate centred on the morality of legalizing Medical Assistance in Dying MAiD Other changes to the text are in

response to the Covid 19 pandemic These include updated chapters on the proper rules for prioritizing care in emergency situations triage and the moral limits of medical doctors administering unproven alternative medications to patients who request them The third edition also contains a drama and debate on autonomy and valid consent and a drama and updated debate on the justice of a two tier health care system where one level of health care is available to all regardless of means and another level of faster health care is available only to those with means *Being Ethical: Classic and New Voices on Contemporary Issues* Shari Collins,Bertha Alvarez Manninen,Jacqueline M. Gately,Eric Comerford,2016-12-19 This anthology takes a broad approach to ethics incorporating traditional topics and texts while bringing in voices and themes that are too often excluded A substantial section on ethical theory is provided as are readings on topics such as oppression sex identity the environment life and death war and terror and caring for others Accessible introductions and discussion questions are included throughout to contextualize material for the student reader without playing favorites among the positions at issue

Thomasma,David N. Weisstub,Christian Hervé,2013-04-17 PERSONHOOD AND HEALTH CARE This book arose as a result of a pre conference devoted to the topic held June 28 1999 in Paris France The pre conference preceded the Annual Congress of the International Academy of Law and Mental Health Other chapters were solicited after the conference in order to more completely explore the relation of personhood to health care The pre conference was held in honor of Yves Pelicier who led so many of our French colleagues in medicine philosophy and ethics as Christian Herve notes in his Tribute As health care is aimed at healing persons it is important to realize how difficult it is to construct a theory of personhood for health care and thus a theory of how healing in health care comes about or ought to occur The book is divided into four parts Concepts of the Person Theories of Personhood in Relation to Health Care and Bioethics Person and Identity and Personhood and His Relations Each section explores a critical arena in constructing the relation of personhood to health care Although no exploration of this nature can be exhaustive every effort was made to present both conflicting and

complementary views of personhood from within similar and different philosophical and religious traditions
