Post-conflict Administrations in International Law Eric de Brabandere,2009-04-24 The concept of international administrations of territory in which comprehensive administrative powers are exercised by on behalf of or with the agreement of the United Nations has recently re emerged in the context of reconstructing parts of states after conflict Although in Kosovo and East Timor the UN was endowed with wide ranging executive and legislative powers in the subsequent operations in Afghanistan it was decided to principally rely on local capacity with minimal international participation and in Iraq administrative power was exercised by the occupying powers The objectives are however very similar This work first delineates the origins of the granting of administrative functions to international actors and analyses the context in which it has resurfaced namely post conflict peace building or reconstruction Secondly the book methodically establishes the legal framework applicable to post conflict administrations and peace building operations by taking into account the post conflict scenario in which they operate Based on these two analyses an enquiry into the practice of the reconstruction processes in Kosovo East Timor Afghanistan and Iraq is undertaken to analyse and understand the influence of the international legal framework and the different approaches on the implementation of the mandates Finally the book concludes with an analysis of questions on exit strategies local ownership the internationalisation of domestic institutions and the need for a comprehensive approach towards post conflict reconstruction
