Natural Man The Life Of William Beebe:

Natural Man Robert Henry Welker, 1975 **Natural Man** Robert Henry Welker, 1975 **The Remarkable Life of William Beebe** Carol Grant Gould, 2012-09-26 When William Beebe needed to know what was going on in the depths of the ocean he had himself lowered a half mile down in a four foot steel sphere to see five times deeper than anyone had ever gone in the 1930s When he wanted to trace the evolution of pheasants in 1910 he trekked on foot through the mountains and jungles of the Far East to locate every species To decipher the complex ecology of the tropics he studied the interactions of every creature and plant in a small area from the top down setting the emerging field of tropical ecology into dynamic motion William Beebe s curiosity about the natural world was insatiable and he did nothing by halves As the first biographer to see the letters and private journals Beebe kept from 1887 until his death in 1962 science writer Carol Grant Gould brings the life and times of this groundbreaking scientist and explorer compellingly to light From the Galapagos Islands to the jungles of British Guiana from the Bronx Zoo to the deep seas Beebe s biography is a riveting adventure A best selling author in his own time Beebe was a fearless explorer and thoughtful scientist who put his life on the line in pursuit of knowledge The unique glimpses he provided into the complex web of interactions that keeps the earth alive and breathing have inspired generations of conservationists and ecologists This exciting biography of a great naturalist brings William Beebe at last to the recognition he deserves [The Maximum of Wilderness](#) Kelly Enright, 2012 Locating a new wilderness nature and conservation at the start of the twentieth century Tame adventures and wild homes encountering the jungle with Martin and Osa Johnson Discovering jungle peace the prolonged observations of William Beebe Ingesting the jungle the botanical experiences of David Fairchild and Richard Evans Schultes **Nature's Ghosts** Mark V. Barrow, 2024-05-31 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature s Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated

individuals who have studied and struggled to protect them Nature's Ghosts offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead *The Museum in America* Edward P.

Alexander,2000-01-01 The Museum in America captures the life stories of thirteen visionary museum leaders who helped transform the 19th century's collection of curios into today's institution of public service and education In the lively style of Museum Masters Alexander recounts the stories of pioneers in American history science art and general museums For anyone interested in the history of the museum this volume is the place to start *Biographies of Scientists* Roger

Zanglein,2021-03-02 Never tell a woman where she doesn't belong In 1932 Roy Chapman Andrews president of the men only

Explorers Club boldly stated to hundreds of female students at Barnard College that women are not adapted to exploration and that women and exploration do not mix. He obviously didn't know a thing about either. The Girl Explorers is the inspirational and untold story of the founding of the Society of Women Geographers, an organization of adventurous female world explorers, and how key members served as early advocates for human rights and paved the way for today's women scientists by scaling mountains, exploring the high seas, flying across the Atlantic, and recording the world through film, sculpture, and literature. Discover the untold narratives of fearless female adventurers who defied societal norms and ventured into uncharted territories as they crisscross continents, daringly explore remote landscapes, and conquer the skies. From the breathtaking expeditions in the dense Amazon rainforest to the heart-pounding aviation feats that broke barriers, this book sheds light on the remarkable achievements of trailblazing explorers. The Girl Explorers celebrates courage, resilience, and the indomitable spirit of these pioneers who paved the way for future generations. Immerse yourself in their extraordinary experiences, from the breathtaking discoveries of hidden civilizations to the thrilling encounters with exotic wildlife. Through meticulous research and riveting storytelling, this book brings to life the remarkable journeys of these women, revealing the hardships they faced, the victories they achieved, and the lasting impact they left on the world. Join us as we celebrate their extraordinary legacy. The Girl Explorers is an inspiring examination of forgotten women from history, perfect for fans of bestselling narrative history books like *The Radium Girls*, *The Woman Who Smashed Codes*, and *Rise of the Rocket Girls*.

Biographical Dictionary of American and Canadian Naturalists and Environmentalists George A. Cevasco, Lorne Hammond, Richard Harmond, Keir B. Sterling, 1997-12-09. Casting a wide net, this volume provides personal and professional information on some 445 American and Canadian naturalists and environmentalists who lived from the late 15th century to the late 20th century. It includes explorers who published works on the natural history of North America, conservationists, ecologists, environmentalists, wildlife management specialists, park planners, national park administrators, zoologists, botanists, natural historians, geographers, geologists, academics, museum scientists, and administrators, military personnel, travellers, government officials, political figures, and writers and artists concerned with the environment. Some of the subjects are well known; the accomplishments of others are little known. Each entry contains a succinct but careful evaluation of the subject's career and contributions. Entries also include up-to-date bibliographies and information concerning manuscript sources.

William Beebe Tim M. Berra, 1977. **Deep Time Analysis** Mark A.S. McMenamin, 2018-03-14. Using a series of case studies, the book demonstrates the power of dynamic analysis as applied to the fossil record. The book considers how we think about certain types of paleontological questions and shows how to answer them. The analytical tools presented here will have wide application to other fields of knowledge, as such, the book represents a major contribution to the deployment of modern scientific method, as it builds on author's previous book *Dynamic Paleontology*. Students and seasoned professionals alike will find this book to be of great utility for refining their approach to their ongoing and future

On a Farther Shore William Souder, 2013-09-03 A New York Times Notable Book of 2012 Rachel Carson loved the ocean and wrote three books about its mysteries But it was with her fourth book *Silent Spring* that this unassuming biologist transformed our relationship with the natural world *Silent Spring* was a chilling indictment of DDT and other pesticides that until then had been hailed as safe and wondrously effective It was Carson who sifted through all the evidence documenting with alarming clarity the collateral damage to fish birds and other wildlife revealing the effects of these new chemicals to be lasting widespread and lethal *Silent Spring* shocked the public and forced the government to take action despite a withering attack on Carson from the chemicals industry It awakened the world to the heedless contamination of the environment and eventually led to the establishment of the EPA and to the banning of DDT By drawing frightening parallels between dangerous chemicals and the then pervasive fallout from nuclear testing Carson opened a fault line between the gentle ideal of conservation and the more urgent new concept of environmentalism Elegantly written and meticulously researched *On a Farther Shore* reveals a shy yet passionate woman more at home in the natural world than in the literary one that embraced her William Souder also writes sensitively of Carson's romantic friendship with Dorothy Freeman and of Carson's death from cancer in 1964 This extraordinary new biography captures the essence of one of the great reformers of the twentieth century

Great Events from History, 2007 *Modern American Environmentalists* George A. Cevasco, Richard P. Harmond, 2009-06-15 *Modern American Environmentalists* profiles the lives and contributions of nearly 140 major figures during the twentieth century environmental movement Included are iconic environmentalists such as Rachel Carson E O Wilson Gifford Pinchot and Al Gore and important but less expected names including John Steinbeck and Allen Ginsberg The entries recount how each individual became active in environmental conservation detail his or her significant contributions trace the influence of each on future efforts and discuss the person's legacy The individuals selected for the book displayed either an unparalleled commitment to the conservation preservation restoration and enhancement of the natural environment or made a major contribution to the growth of environmentalism during its first century With a foreword by environmental historian Everett I Mendelsohn a time line of key environmental events a bibliography of groundbreaking works and an index organized by specialization this biographical encyclopedia is a handy and complete guide to the major people involved in the modern American environmental movement

Bibliography of Natural History Travel Narratives Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel

narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author s name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography
