produccion mundial de pescado y aunque en general requieren una mayor intensidad de mano de obra que las grandes actividades pesqueras industriales se ven cada vez mas afectadas por los costos de la energia Los costos de los combustibles tienen una influencia creciente no solo en los precios al consumidor sino tambien en los ingresos netos de los pescadores y los propietarios de embarcaciones Esta obra se divide en dos secciones principales la primera se refiere a los cambios de las tecnicas operativas en lugar de a los cambios tecnologicos la segunda presenta informacion pertinente para los armadores que esten pensando en construir una nueva embarcacion o revisar y reacondicionar una ya existente
