Organization Of Hypocrisy Talk Decisions And Actions In Organizations:

The Organization of Hypocrisy Nils Brunsson,1992-03-26 Based on a series of empirical studies spanning several years this book explores the ways in which organizations produce ideology and how the tension between ideology and action can actually benefit organizational legitimacy and survival Through interviews with managers and analysis of numerous organizations the author examines the roles that individuals play in legitimizing the role of institutions and how the relationship between action and politics within institutional environments determines their structure and policies

African Hosts & Their Guests W. E. A. van Beek,Annette M. Schmidt,2012 Africa is a theme park for Western tourists to experience untouched wilderness untamed nature and truly authentic cultures where the hosts too are part of a discourse about the other and ourselves about wildness danger and roots Tourism is important for Africa international tourist arrivals to Africa continue to grow income from tourism is crucial to national economies and tourism investments are considered among the most profitable This edited volumedeals with the interaction of local communities with tourists coming into their areas and villages Based upon a common theoretical approach fourteen cases of African tourism are discussed which involve direct contact between hosts and guests The viewpoint throughout is from the side of the locals establishing how the processes of interaction shape each small scale destination Crucial in Africa is the fact that the large majority of tourism is game oriented and the interaction between locals and visitors is very much tainted by this fact Central is the notion of the tourist bubble the infrastructure that is generated locally and internationally for hosting tourists as it is this institutional interface that tends to impact on the local society and culture not the tourists themselves directly The examples come from all over Africa from the Sahara to the Eastern Cape and from Kenyato Ghana All contributions are based upon original fieldwork Walter van Beek is professor of anthropology at Tilburg University and Senior Researcher at the African Studies Centre Leiden Annette Schmidt is curatorof the African department at the National Museum of Ethnology in Leiden and is an archaeologist with a long experience in cultural management projects **Organization and Decision** NIklas Luhmann,Dirk Baecker,2018-11-08 Luhmann s classic text on how organizations work how they should be designed steered and controlled and how they structure society A Discursive Approach to Organizational and Strategy Consulting Wolfgang Schnelle,2008 People who strive to set things in motion within corporations and organizations be it as managers or consultants encounter stubborn resistance Even though new strategies have been adopted the desired changes do not materialize A reorganization that was intended to finally produce clarity creates only a new round of confusion Wolfgang Schnelle co founder of the consulting firm Metaplan learned from four decades of experience in the field that it pays to think of organizations and strategy within the context of opinions interests and power and trust relationships His approach draws on organizational sociology and helps to shed light on the diverse realities of the players involved If anything is to be accomplished these realities must be moved toward convergence Organizational and strategy consultants using a discursive approach think of

themselves as leaders of processes that create shared understanding This approach allows them to spot resistance early and overcome it through argumentation and discourse New and often surprising opportunities for action emerge The new concepts can then be implemented faster because thought processes have taken place in the minds of those who will subsequently perform the actions **The SAGE Handbook of Organizational Institutionalism** Royston Greenwood,Christine Oliver,Roy Suddaby,Kerstin Sahlin-Andersson,2008-03-18 Institutional theory lies at the heart of organizational theory yet until now no book has successfully taken stock of this important and wide ranging theoretical perspective With insight and clarity the editors of this handbook have collected and arranged papers so readers are provided with a map of the field and pointed in the direction of new and emerging themes The academics who have contributed to this handbook are respected internationally and represent a cross section of expert organization theorists sociologists and political scientists Chapters are a rich mix of theory how to conduct institutional organizational analysis and empirical work The SAGE Handbook of Organizational Institutionalism will change how researchers teachers and advanced students think about organizational institutionalism *Manufacturing Political Trust* Christina Boswell,2018-03 An original account exploring the use of targets and performance measurement as a response to the crisis of political trust Global Themes and Local Variations in Organization and Management Gili S. Mireia Tutusaus,2019-11-28 Whereas the global water community may have reached consensus on the need for water providers to operate on the basis of commercial principles staff of water utilities are faced with the challenge of implementing these principles in their everyday work In the everyday domain these principles appear to directly conflict with the mandate of water operators to provide water services to all Moreover the socio political economic and bio physical context in which these water operate may be ill suited to implement commercialization In pursuing commercialization these operators adapt reinterpret modify deflect alter or betray the original principles of commercialization during implementation This research takes inspiration from the rich literature on policy implementation and policy translation which argues that policy models need to be transformed and modified if they are to be successfully adopted or implemented This research analyzes the alterations visible in the daily implementation of commercial models of water provisioning and in doing so present a better understanding of how water operators implement policy prescriptions of commercialization in practice Based on the analysis of the adaptations and re interpretations of the implemented model of commercialization in the different cases this thesis argues that a new way of speaking about commercialization should be developed   The Changing Governance of the Sciences Richard Whitley,Jochen Gläser,2008-03-20 This book arose from a conversation between Lars Engwall and Richard Whitley during the 2003 European Group for Organization Studies Colloquium in Copenhagen about important topics for future research We agreed then and this has been amply confirmed by subsequent events that the proliferation of research eval tion schemes especially in Europe was an important feature of the changing re tionships

between the state universities and scientific research more generally which needed systematic and comparative analysis With the support of the Bank of Sweden Tercentenary Foundation this discussion led to workshops in Uppsala and Manchester involving colleagues from Australia Germany and the Netherlands at which the main framework for such an analysis was developed This framework then formed the basis for the conference at Bielefeld in 2005 at which earlier versions of most of the papers in this volume were presented and extensively discussed We are very grateful for the support of the PRIME network of the European Commission and the Max Planck Institute for the History of Science for this c ference as well as the invaluable efforts of Peter Weingart of the University of Bielefeld We are also greatly indebted to the members of the Editorial Board who commented on various drafts of these papers as well as to Aant Elzinga Stefan Kuhlmann Philippe Laredo Arie Rip and Nic Vonortas who acted as referees   Perspectives on Strategic Change Luca Zan,Stefano Zambon,Andrew M. Pettigrew,1993-07-31 The theme of this book is the study of strategic change processes with a focus on the European perspective in studying strategic change The 1980s ushered in an era of radical change for many organizations both in Europe and North America and the topics have become dominant academic and policy issues of the 1990s Using a variety of theoretical perspectives and drawing on a number of academic disciplines the book presents some challenging ideas about the theory and practice of the study of strategic change The theoretical and empirical contributions of the book are presented around three key areas the internationalization processes of firms the development of human resources and public sector change The chapters are written by prominent scholars from economics organization theory history sociology accounting and business strategy Enriching this diversity is a mixture of national intellectual traditions emanating from the Anglo Saxon French German Italian and Scandinavian countries
