Organized Interests And Self Regulation An Economic Approach:

Organized Interests and Self-regulation Bernardo Bortolotti, Gianluca Fiorentini, 1999 This collection studies the role of organized interests in collective decision making and the emergence of self regulation It provides a balanced mix of theoretical and empirical papers in traditional public choice addressing the issues of how organized interest affect legislation and self regulation investigating the incentives and the problems related to the private enforcement of law The Anticompetitive Impact of Regulation Giuliano Amato, Laraine L. Laudati, 2001-01-01 This timely book addresses the important issue of the negative effects of anticompetitive regulation on industry and the massive economic harm it causes The distinguished contributors including economic and legal scholars advocate the need for a review of all anticompetitive laws and address several industry and country case studies with the ultimate aim of providing recommendations to eliminate the impact of anticompetitive regulation The first part of the book considers regulations affecting private business and professions part two covers public utility and public services regulation whilst part three discusses the role of institutions and competition authorities in relation to anticompetitive practices The authors draft guidelines based on economic evidence and legal arguments which they believe would provide a starting point for the European Union to address the problem They go on to propose possible implementation strategies for these guidelines from both an institutional and legal perspective The book also includes a historical perspective on the evolution of anticompetitive regulation complemented by an overview of the actions currently being implemented to address and reverse the problem in other jurisdictions *Regulation of and by Pharmacists in the Netherlands and Belgium* Niels Philipsen, 2003 This book examines the regulation of pharmacists in the Netherlands and Belgium from the perspective of law and economics It starts with an extensive and accessible overview of the economic literature with respect to the regulation including selfregulation of liberal professions Subsequently this book analyses the extent to which the current regulation of Dutch and Belgian pharmacists serves the public interest and the extent to which this regulation is a result of rent seeking behaviour by private interest groups The author concludes that some regulation notably with respect to advertising design of the pharmacy establishment of pharmacies and drug prices does not seem to serve the public interest Moreover he criticises the regulation of reimbursement for the pharmacist which in both countries is still linked to the pharmacist s monopoly in the distribution of drugs despite new tasks of the pharmacist in the field of pharmaceutical care In addition to a theoretical analysis the author carries out an empirical research of rent seeking behaviour in the pharmaceutical market Although the book studies the situation in the Netherlands and in Belgium its conclusions will certainly apply to other countries and other professions The book will therefore be of interest to all economists lawyers and practitioners interested in regulation of the liberal professions as well as practitioners and academics working in the field of health care *Lawyers, Markets and Regulation* Frank H Stephen, 2013-10-31 The book surveys where the most recent and radical liberalization involving the ownership of law firms by non lawyers is likely to lead

and appraises the economic literature on the costs and benefits of regulating markets for professional services It **EU Competition Law and Liberal Professions: an Uneasy Relationship?** Ida E. Wendt, 2012-10-12 Drawing on the fundamental principles of EU competition law this book comprehensively reassesses the authority and democratic legitimacy of self and state regulation of liberal professions and ultimately challenges the use of a diffuse public interest concept in professional regulation

The Governance of Global Industry Associations Ronit, Karsten, 2022-08-09 This insightful book examines the role of micro politics in the life of global industry associations Karsten Ronit addresses the various rules and norms required to administer these associations highlighting the importance of managing variations in complex member demands and responding to expectations in their institutional environment

Professional Services in the EU Internal Market Tinne Heremans, 2012-01-31 Professional services are a key component of the EU internal market economy yet also significantly challenge the legal framework governing this internal market Indeed specific professional regulatory structures which are often the result of a blend of government and self regulation hold clear potential for conflict with EU free movement and competition law rules Hence this book looks at the manner in which both free movement and competition laws might apply to such self and co regulatory set ups and at the leeway given to quality considerations apparently conflicting with free movement or competition objectives In addition since court action will seldom suffice to genuinely integrate a market the book also explores those instruments of EU secondary legislation that are likely to impact the most on the provision of professional services However the book goes beyond a mere inventory to ask how EU Internal Market policy could contribute to the optimal legal environment for professional services A law and economics analysis is employed to investigate the need for specific professional rules the preferred type of regulator self co or government regulation and the level national and or European at which regulation should be adopted As becomes clear the story of the market for professional services is one of market and government failure the author is thus left to compare imperfect situations where market failures compete with rent seeking efforts the tendency towards over centralisation and national protectionism This book offers both an in depth legal analysis of the EU framework as it applies to professional services as well as a more normative evaluation of this framework based on insights from law and economics scholarship It will therefore be a valuable resource for all practitioners policy makers and academics dealing with professional services as well as more generally with questions of quality and self regulation

Welfare Economics Y. Ng, 2003-12-19 Yew Kwang Ng looks to make welfare economics more complete by discussing the recent inframarginal analysis of division of labour and by pushing welfare economics from the level of preference to that of happiness making a reformulation of the foundation of public policy necessary A theory of the third best is provided with extension to the equality efficiency issue The remarkable conclusion of treating a dollar as a dollar provides a powerful simplification of public policy formulation in general and in cost benefit analysis in particular

Regulation of Network Utilities Claude Henry, Michel Matheu, Alain Jeunemaître, 2001 Propelled by deep technical economic and cultural changes network utilities have in the last twenty years entered a new era Since competition has been widely introduced and promoted we have experienced a radical change in the structure of the industries and the role of the state authorities Their role in managing monopolies has evolved into regulating new forms of markets which has resulted in the creation of independent regulatory authorities These new public bodies work with governments to try and reconcile the needs of competition and public service missions This suggests the use of recent developments in economic theory to handle complex problems This volume offers an exploration by scholars and regulators of the new regulatory regimes across Europe The first part presents the pioneering experiences of the United Kingdom and Sweden The United Kingdom has quickly chosen to establish powerful and independent individual regulators Reforms in Sweden have been more gradual and regulators have in the first instance acted mainly as mediators Part two is devoted to second wave developments that took place in various European countries i e France Germany Italy and Spain countries where the legal tradition is less conducive to the concept of independent regulators There the regulators are often but not always less powerful and meet more obstacles in their efforts to prevent either the formation of oligopolies or the resistance of incumbent monopolies In Germany another problem has emerged as the federal tradition prevents the creation of independent regulators in certain key sectors The contributions in the third part of the volume throw some light on the problems of coordinating national regulations One can observe the continuous emergence of modes of cooperation between national regulators as well as European authorities Faced with certain categories of problem the European authorities are themselves led to act as common regulators The countries of central and eastern Europe which are progressively converging towards the general economic model of the West are more and more concerned with the accompanying regulation problems Last but not least the Internet raises worldwide problems of regulation that are beginning to be seriously considered

Limits to Privatization Marianne Beishem, Oran R Young, Ernst Ulrich von Weizsäcker, Matthias Finger, 2012-04-27 Limits to Privatization is the first thorough audit of privatizations from around the world It outlines the historical emergence of globalization and liberalization and from analyses of over 50 case studies of best and worst case experiences of privatization it provides guidance for policy

and action that will restore and maintain the right balance between the powers and responsibilities of the state the private sector and the increasingly important role of civil society The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate

Governing Interests Wolfgang Streeck, Jürgen Grote, Volker Schneider, Jelle Visser, 2006-06-07 In the current period of globalization *Governing Interests* presents new research on the impact of internationalization on the organization and representation of business interests through trade and employer associations By exploring ongoing gradual but nevertheless profound changes in the structures and functions of business interest associations the book develops a precise understanding of the relationship between the national and the international Both conceptual and empirical some papers included in this significant volume adopt a bird's eye view of the topic whilst others concentrate on individual industries or countries and several through examination and analysis consider the effects on interest representation and the repercussions on effective governance Contributed to and edited by leading academics the diversity of research questions and methods used in this volume provide the reader with an excellent understanding of the subject and importantly caution against rash simplifications Comprehensive and scholarly this text will be of particular relevance to political scientists and sociologists

Regulation Anthony I Ogus, 2004-10-15 This is a reprint of Anthony Ogus classic study of regulation first published in the 1990s It examines how since the last decades of the twentieth century there have been fundamental changes in the relationship between the state and industry With the aid of economic theory Anthony Ogus critically examines the ways in which public law has been adapted to the task of regulating industrial activity and provides a systematic overview of the theory and forms of social and economic regulation In particular he explores the reasons why governments regulate for which broadly speaking two

theoretical frameworks exist First public interest theories determine that regulation should aim to improve social and economic welfare Second economic theories suggest that regulation should aim to satisfy the demands of private interests The book also looks at the evolution of the forms of regulation in Britain extending to the policies of privatization and deregulation which were so characteristic of the period The author skilfully evaluates the advantages and disadvantages of the different forms of regulation particularly in the light of the two theoretical frameworks but also by involving an analysis of how firms respond to the various kinds of incentives and controls offered by government A significant feature of the book is its analysis of the choices made by governments between the different forms of regulation and the influence exerted by interest groups including bureaucrats and EC law
