**Pro-Family Politics and Fringe Parties in Canada** Chris MacKenzie,2014-05-14 Pro Family Politics and Fringe Parties in Canada explores the organizational and ideological nature of political parties that are initially formed to do the work of social movements Specifically it examines the development of the Family Coalition Party of British Columbia FCP from its origins as a group of alienated Social Credit Party members to its rebirth as the Unity Party of British Columbia and through its struggles as a marginal political entity along the way While addressing the FCP s relationship to the larger North American pro family movement Chris MacKenzie also deftly demonstrates how the party can be seen as organizationally congruent with its ideological antithesis the Green Party Basing his findings on seven years of field research he identifies the obstacles that political parties involved in social movement work must overcome in order for them to achieve their goals He concludes that despite their invaluable contribution to democracy such party movements have limited political institutionalization Consequently their only realistic goal may be to merge their ideals with those of another larger political body This book makes a substantial contribution to our understanding of the genesis development and impact of political party movements in Canada Moreover it provides useful insight into the dynamics and issues that make up the current pro family movements in Canada and the United States

the literature laying out an entry point to an African centered account of learning in struggle on the continent However this entry point quickly turns to an in depth sharing of one particular case of African social movement learning Based on 9 years of research with the Ada Songor salt movement in Ghana the book provides a detailed account of learning through defending communal access to West Africa s largest salt yielding lagoon in the face of local national and global efforts to expropriate this resource The book shares the knowledge production of the movement as well as the ways in which the movement has restored its struggle to meet new challenges Songs tapestries demonstrations manifestoes popular education approaches and book production all feature in these efforts

*The Power of Persuasion* Kirsten Kozolanka, 2007 Explores the relationship between the politics of the New Right the media and democracy

*The Good-natured Feminist* Catriona Sandilands, 1999 Annotation Heroic mothers defending home and hearth against a nature deformed by multinationalist corporate practice this may be a compelling story but it is not necessarily the source of valid feminist or ecological critique What s missing is the democratic element an insistence on bringing to public debate all the relations of gender and nature that such a view takes for granted This book aims to situate a commitment to theory and politics that is to democratic practice at the center of ecofeminism and thus to move toward an ecofeminism that is truly both feminist and ecological The Good Natured Feminist inaugurates a sustained conversation between ecofeminism and recent writings in feminist postmodernism and radical democracy Starting with the assumption that ecofeminism is a body of democratic theory the book tells how the movement originated in debates about nature in North American radical feminisms how it then became entangled with identity politics and how it now seeks to include nature in democratic conversation and especially to politicize relations between gender and nature in both theoretical and activist milieus

*Peacebuilding and NGOs* Ryerson Christie, 2013 Analysing the relationship between civil society and the state this book lays bare the assumptions informing peacebuilding practices and demonstrates through empirical research how such practices have led to new dynamics of conflict The drive to establish a sustainable liberal peace largely escapes critical examination When such attention is paid to peacebuilding practices scholars tend to concentrate either on the military components of the mission or on the liberal economic reforms This means that the roles of Non Governmental Organizations NGOs and the impact of attempting to nurture Northern forms of civil society is often overlooked Focusing on the case of Cambodia this book seeks to examine the assumptions underlying peacebuilding policies in order to highlight the reliance on a particular linear reading of European North American history The author argues that such policies in fostering a particular form of civil society have affected patterns of conflict dictating when and where politics can occur and who is empowered to participate in such practices Drawing on interviews with NGO representatives and government representatives this volume will assert that while the expansion of civil society may resolve some sources of conflict its introduction has also created new dynamics of contestation This book will be of much interest to students of peacebuilding conflict resolution development studies S E Asian politics and IR in general

Esmée Sinéad Hanna, 2014-01-16 Student Power The Radical days of the English Universities is an original contribution to the exploration and understanding of the radicality of the English student movement of the 1960s This movement was significant and widespread within English universities and occurred within the context of global student unrest The research on which this book is founded brings together two key data sources documents and oral history interviews presenting previously unpublished and original research to detail the events of this important social movement The book's central focus is the exploration of the key events within the movement detailing the type of actions that occurred across the duration of the movement so as to paint a picture of what the movement was like Key insight is offered from those who were involved in the protests giving a voice to those who know first hand what it was like to be a student at the height of the Swinging Sixties The significance of the 1960s student movement is also refocused through a contemporary lens In light of recent renewals in student activism comparisons and contrasts between the current situation of students within the higher education system in England and those who were students in the Sixties are discussed By exploring what can be learnt from students of the Sixties focusing upon how they were able to create and sustain a social movement of this scale we can understand the constraints and influences on political action by students today This book is therefore relevant not only to our understanding of the past but also for thinking about social movements in the present The book therefore offers a rich narrative of a fascinating social movement telling previously untold stories of what it was like to be part of the biggest rebellion of English students at the height of the dramatic decade of change that was the Sixties This title will be of interest to academics students activists as well as those with a general interest in the history of the Sixties

*Expanding the Boundaries of Transformative Learning* E. O'Sullivan, A. Morrell, M. O'Connor, 2016-04-30 Transformative learning involves experiencing a deep structural shift in the basic premises of thought feelings and actions It is a shift of consciousness that dramatically and permanently alters our way of being in the world Such a shift involves our understanding of ourselves and our self locations our relationships with other humans and with the natural world our understanding of relations of power in interlocking structures of class race and gender our body awarenesses our visions of alternative approaches to living and our sense of possibilities for social justice and peace and personal joy The editors of this collection make several challenges to the existing field of transformative learning the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning The editors argue that transformative learning theory cannot be constructed in a content neutral or context free way Their second challenge which assumes the importance

content for transformative learning is to educators as practitioners The editors argue that transformative learning requires new educational practices consistent with the content Arts based research and arts based teaching learning practices are one example of such new educational practices Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples forms of teaching learning is another example Each article in the collection presents a possible model of these new practices
