Organizing For Political Victory:

Organizing for Political Victory Loren B. Belker, 1982-11-01

Rudi Batzell, 2025-04-23 An original analysis of the relationship between slavery and the labor movement in the late nineteenth and early twentieth centuries During the rise of the labor movement in the late nineteenth century why were American workers unable to organize inclusive trade unions like those formed by their counterparts in the United Kingdom Comparing American and British capitalism in the port cities of Baltimore and Liverpool and the steel cities of Pittsburgh and Sheffield Rudi Batzell reveals that the answer lies in the legacies of slavery and entrenched structures of racial inequality Strikebreaking succeeded more often in the United States because landless Black Americans were out of economic desperation more likely to become scabs and fracture the class solidarity of any union movement Batzell shows in short how racism was and is deeply connected to class migration and capitalism in a global economy marked by slavery and empire In emphasizing the geography of economic inequality this book offers new clarity on the late nineteenth century successes and failures of working class formation More broadly *Organizing Workers in the Shadow of Slavery* makes it clear that the pursuit of justice today will require sustained economic reparations for slavery and colonialism Self Control J. Institutional Transformations

Danielle Celermajer, Millicent Churcher, Moira Gatens, 2021-05-13 Formal and informal institutions structure our social interactions by giving rise to normative expectations and patterns of collective behaviour This collection grapples with how affect imagination and embodiment can operate to either constrain or enable the justice of institutions and the experiences of specific social identities This anthology explores the myriad ways institutions work to systematically disadvantage people with particular identities whilst privileging others and considers the legal political and normative interventions that might serve to promote a more just society Taken together the chapters represent the scope of existing research within institutional theory affect theory race theory and theories of social imaginaries Across a range of topics human rights racial and sexual violence transitional justice and democratic movements this collection critically assesses the extent to which theorists have attended to the conjoined influence of the imagination embodiment and affective phenomena on processes of institutional change that aim to achieve social justice The chapters in this book were originally published as a special issue of the journal *Angelaki*

Victory in War William C. Martel, 2006-12-25 For millennia policymakers and statesmen have grappled with questions about the concept of victory in war How long does it take to achieve victory and how do we know when victory is achieved And as highlighted by the wars against Afghanistan and Iraq is it possible to win a war and yet lose the peace The premise of this book is that we do not have a modern theory about victory and that in order to answer these questions we need one This book explores historical definitions of victory how victory has evolved and how it has been implemented in war

It also subsequently develops the intellectual foundations of a modern pre theory of victory and discusses the military instruments necessary for victory in the twenty first century using case studies that include US military intervention in Panama Libya Persian Gulf War Bosnia Kosovo Afghanistan and Iraq *Judging State-Sponsored Violence, Imagining Political Change* Bronwyn Leebaw, 2011-04-18 How should state sponsored atrocities be judged and remembered This controversial question animates contemporary debates on transitional justice and reconciliation This book reconsiders the legacies of two institutions that transformed the theory and practice of transitional justice Whereas the Nuremberg Trials exemplified the promise of legalism and international criminal justice South Africa s Truth and Reconciliation Commission promoted restorative justice and truth commissions Leebaw argues that the two frameworks share a common problem both rely on criminal justice strategies to investigate experiences of individual victims and perpetrators which undermines their critical role as responses to systematic atrocities Drawing on the work of influential transitional justice institutions and thinkers such as Judith Shklar Hannah Arendt Jos Zalaquett and Desmond Tutu Leebaw offers a new approach to thinking about the critical role of transitional justice one that emphasizes the importance of political judgment and investigations that examine complicity in and resistance to systematic atrocities *Caring for America* Eileen Boris, Jennifer Klein, 2015 Caring for America is the definitive history of care work and its surprisingly central role in the American labor movement and class politics from the New Deal to the present Authors Eileen Boris and Jennifer Klein create a narrative of the home care industry that interweaves four histories the evolution of the modern American welfare state the rise of the service sector based labor movement the persistence of race class and gender based inequality and the aging of the American population and considers their impact on today s most dynamic social movements **The Nonpartisan Leader**, 1922 **Rekindling the Movement** Lowell Turner, Harry C. Katz, Richard W. Hurd, 2018-05-31 From gloomy times in the 1980s the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes Experts from a wide variety of disciplines industrial relations political science economics and sociology identify the central developments analyze the strengths and weaknesses of the new initiatives and assess the progress made and the prospects for the future Though all agree on the importance of unions their opinions of the success of current renewal efforts diverge greatly The interdisciplinary and comparative approach of Rekindling the Movement is both challenging and enlightening Rather than merely trumpeting pet opinions contributors provide hard evidence and causal analysis grounded in realistic perspectives to back up suggestions for the improvement of the new labor movement Their straightforward observations about what is and is not possible what does and does not work will be of great practical value for policymakers and union leaders **The Berlin Operation 1945** Soviet General Staff, 2016-08-19 A study of the Red Army s penultimate offensive operation in the war in Europe The forces of three fronts Second and First Belorussian and First Ukrainian reached

the Oder River and surrounded the defenders of the German capital reduced the city and drove westward to link up with the Western allies in central Germany This is another in a series of studies compiled by the Soviet Army General Staff which during the postwar years gave itself the task of gathering and generalizing the experience of the war for the purpose of training the armed forces higher staffs in the conduct of large scale offensive operations The study is divided into three parts The first contains a brief strategic overview of the situation as it existed by the spring of 1945 with special emphasis on German preparations to meet the inevitable Soviet attack This section also includes an examination of the decisions by the Stavka of the Supreme High Command on the conduct of the operation As usual materiel technical and other preparations for the offensive are covered in great detail These include plans for artillery and engineer support as well as the work of the rear services and political organs and the strengths capabilities and tasks of the individual armies Part two deals with the Red Army s breakthrough of the Germans Oder defensive position up to the encirclement of the Berlin garrison This covers the First Belorussian Front s difficulty in overcoming the defensive along the Seelow Heights which has a direct path to Berlin as well as the First Ukrainian Front s easier passage over the Oder and its secondary attack along the Dresden axis The Second Belorussian Front s breakthrough and its sweep through the Baltic littoral is also covered Part three recounts the intense fighting to reduce the city s defenders from late April until the garrison s surrender on May 2 as well as operations in the area up to the formal German capitulation This section contains a number of detailed descriptions of urban fighting at the battalion and regimental level closing with conclusions about the role of the various combat arms in the operation

Machinists' Monthly Journal ,1923 *The New Republic* Herbert David Croly,1926 **The Batt-Dannenberg Debate on Resolved, that by Political Action Alone, Without the Assistance of the Socialist Industrial Union, the Workers Can Emancipate Themselves ... Between Dennis E. Batt, Representing the Socialist Party, and Karl Dannenberg, Representing the Workers' International Industrial Union** Dennis E. Batt,1919 *Fannie Mae and Freddie Mac* James R. Cristie,2007 In the late 1980s and 1990s Fannie Mae grew rapidly into the largest firm in the U S housing finance system and a major global financial institution The Enterprise achieved double digit growth in earnings per common share EPS for 15 straight years and leveraged its extraordinary financial success into enormous political influence That financial and political success gave rise to a corporate culture at Fannie Mae in which senior management promoted the Enterprise as one of the lowest risk financial institutions in the world and as best in class in terms of risk management financial reporting internal control and corporate governance This book describes the development and extent of the problems with Fannie Mae s accounting policies internal controls financial reporting and corporate governance that led to the restatement of the Enterprise s financial reports and the actions to remedy that situation that the Office of Federal Housing Enterprise Oversight OFHEO has directed the Enterprise to take to date The book also recommends that actions be taken to enhance the goal of maintaining the safety and soundness of Fannie Mae The Future of Organized Labor in American Politics

Peter L. Francia, 2006-02-01 In 1995 promising a more active political presence for unions John Sweeney was elected president of the AFL CIO Labor would develop a new voice one that could not be ignored or taken for granted by Democratic and Republican politicians However by the summer of 2005 opposition to Sweeney s leadership threatened to divide the labor movement In *The Future of Organized Labor in American Politics* Peter L Francia discusses the effects of Sweeney s controversial tenure as president and assesses labor s influence on American political elections and legislation Drawing on interviews with union and business leaders as well as campaign finance and public opinion data Francia argues that Sweeney has employed a more effective and expansive grassroots political operation than his predecessors He challenges critics who dismiss Sweeney s efforts as a failure but cautions that the decline in union membership presents a serious crisis for the labor movement When unions emphasize grassroots strategies they can effectively compete against the financial power of big business and can make a significant difference in congressional politics Francia analyzes organized labor s political activities its coalitions with other interest groups and its influence on voter turnout election results and votes in Congress He also examines the effects of Sweeney s embrace of progressive causes and labor s increasing willingness to challenge Democrats who vote against labor s interests For all his successes Sweeney s tenure has not been without its problems Labor s presence in American politics is threatened by shrinking membership in unions Francia suggests that if unions want to remain a viable political force in congressional politics they must devote more resources to organizing workers *If You Want to Win, You've Got to Fight*

Communist Eastern Europe will be a comprehensive and invaluable resource accessible to undergraduates of politics and European studies as well as the non specialist reader **Locomotive Engineers Journal** ,1927 **The Politics of Controlling Organized Crime in Greater China** Sonny Shiu-Hing Lo,2015-12-14 In China the central government has the political will to control organized crime which is seen as a national security threat The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments The development of prostitution underground gambling and narcotics production has become so serious that the central government has to rely on anti crime campaigns to combat these three evils This book explores the specific role of government institutions and agencies notably the police in controlling organised and cross border crime in Greater China Drawing heavily on original empirical data it compares the both the states of the People s Republic of China and Taiwan as well as city states Hong Kong and Macao This region has become increasingly economically integrated and human interactions have been enhanced through improved trade relations tourism and increased individual freedom The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti crime campaigns It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political criminal nexus Focusing on regime capacity in crime control regime autonomy from crime groups and regime legitimacy in the fight against organized crime this thought provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly
