Organizing Democracy In Eastern Germany Interest Groups In Post Communist Society:

Organizing Democracy in Eastern Germany Stephen Padgett, 2000 The emergence of interest group politics is one of the decisive factors in democratic transformation in post communist society Stephen Padgett argues that evidence from eastern Germany suggests that market transition produces rather open and fluid societies in which group interests and identities are tenuous Lacking a supportive social infrastructure interest groups operate on entrepreneurial lines a form of associational activity which falls far short of pluralist ideals With its accelerated transition to a market economy eastern Germany provides a fast forward study of an advanced post communist society which enables us to anticipate the social structures and issues shaping interest group politics in the newly democratizing states of east central Europe Examining a number of different interest groups and comparing a number of countries across east central Europe this book may also offer a vision of the future of interest group politics in the West

The Weakness of Civil Society in Post-Communist Europe Marc Morjé Howard, 2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia

Deserved Till Hilmar,2023-07-04 After the fall of the Iron Curtain people across the former socialist world saw their lives transformed In just a few years labor markets were completely disrupted and the meanings attached to work were drastically altered How did people who found themselves living under state socialism one day and capitalist democracy the next adjust to the changing social order and its new system of values Till Hilmar examines memories of the postsocialist transition in East Germany and the Czech Republic to offer new insights into the power of narratives about economic change Despite the structural nature of economic shifts people often interpret life outcomes in individual terms Many are deeply attached to the belief that success and failure must be deserved Emphasizing individual effort responsibility and character they pass moral judgments based on a person s fortunes in the job market Hilmar argues that such frameworks represent ways of making sense of the profound economic and social dislocations after 1989 People craft narratives of deservingness about themselves and others to solve the problem of belonging in a new social order Drawing on in depth interviews with engineers and care workers as well as historical and comparative analysis of the breakdown of communism in Eastern Europe Deserved sheds new light on the moral imagination of capitalism and the experience of economic change This book also offers crucial perspective on present day politics showing how notions of deservingness and moral worth have propelled right wing populism

Creating Cooperation Pepper D. Culpepper,2018-07-05 In Creating Cooperation Pepper D Culpepper explains the successes and failures of human capital reforms adopted by the French and German governments in the 1990s Employers and employees both stand to gain from corporate investment in worker skills but uncertainty and mutual distrust among companies doom many policy initiatives to failure Higher skills benefit society as a whole so national governments want to foster them However business firms often will not invest in training that makes their workers more attractive to other employers even though they would prefer having better skilled workers Culpepper sees in European training programs a challenge typical of contemporary problems of public policy success increasingly depends on the ability of governments to

convince private actors to cooperate with each other In the United States as in Europe he argues policy makers can achieve this goal only by incorporating the insights of private information into public policy Culpepper demonstrates that the lessons of decentralized cooperation extend to industrial and environmental policies In the final chapter he examines regional innovation programs in the United Kingdom and the clean up of the Chesapeake Bay in the United States a domestic problem that required the coordination of disparate agencies and stakeholders

Donatella della Porta, 2016-11-28 *Where Did the Revolution Go* considers the apparent disappearance of the large social movements that have contributed to democratization Revived by recent events of the Arab Spring this question is once again paramount Is the disappearance real given the focus of mass media and scholarship on electoral processes and normal politics Does it always happen or only under certain circumstances Are those who struggled for change destined to be disappointed by the slow pace of transformation Which mechanisms are activated and deactivated during the rise and fall of democratization This volume addresses these questions through empirical analysis based on quantitative and qualitative methods including oral history of cases in two waves of democratization Central Eastern European cases in 1989 as well as cases in the Middle East and Mediterranean region in 2011

Governance in Contemporary Germany Simon Green, William E. Paterson, 2005-06-02 Throughout the 1970s and 1980s West Germany was considered to be one of the world's most successful economic and political systems In his seminal 1987 analysis of West Germany's semisovereign system of governance Peter Katzenstein attributed this success to a combination of a fragmented polity consensus politics and incremental policy changes However unification in 1990 has both changed Germany's institutional

configuration and created economic and social challenges on a huge scale This volume therefore asks whether semisovereignty still exists in contemporary Germany and crucially whether it remains an asset in terms of addressing these challenges By shadowing and building on the original study an eminent team of British German and American scholars analyses institutional changes and the resulting policy developments in key sectors with Peter Katzenstein himself providing the conclusion Together the chapters provide a landmark assessment of the outcomes produced by one of the world's most important countries

If Money Talks, What Does it Say? Iain McMenamin, 2013-01-31 Why do businesses contribute to political parties Is money a universal language Do business contributions to political parties convey different messages in different countries This book answers these questions based on intensive case studies of Australia Canada and Germany as well as data from other countries Business money does talk politics In liberal Australia and Canada the competitive short term focus of firms generated substantial demand for private goods that could help firms develop an advantage over their rivals Thus business financing of parties conveyed a pragmatic message in exchange for small but certain financial benefits contributing businesses expect as a reciprocation to receive special consideration of their lobbying efforts Australia's left right party system created an awareness of policy risk which motivated ideological payments but there was no ideological bias in business financing of politics in centrist Canada In Germany's coordinated economy the most important policies for firms tend to be the public goods defined championed and delivered by their business associations In this context the pragmatic motivation for contributions to political parties is weak The combination of consensual political institutions and constrained parties means there is a very low risk of major policy change from election to election So there is also little interest in ideological financing of political parties If money talks what does it say places business financing of political parties in the context of debates about political corruption and offers advice on political reform Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecpr.net <http://www.ecpr.net> The Comparative Politics series is edited by Professor David M Farrell School of Politics and International Relations University College Dublin Kenneth Carty Professor of Political Science University of British Columbia and Professor Dirk Berg Schlosser Institute of Political Science Philipps University Marburg
