Organizing Western Europe:

Organizing Western Europe Clive Archer, 1990 Describes and analyses the major West European international organizations established since the Second World War cf foreword **Western Europe in 1977** United States. Congress. House. Committee on International Relations. Subcommittee on Europe and the Middle East, 1977 *An Introduction to European Intergovernmental Organizations* Marc Cogen, 2016-04-15 An Introduction to European Intergovernmental Organizations provides an up to date and accessible reference to European intergovernmental organizations other than the European Union The EU is so dominant that people often overlook the multitude of older and newer smaller and larger intergovernmental organizations rooted in the history of contemporary Europe which continue to help shape its future The specialized character of these organizations adds value to cooperation in Europe as a whole creates permanent channels of communication regardless of EU membership and allows the possibility for non European involvement through organizations such as the European Bank for Reconstruction and Development and NATO It also allows sub regional groups of states such as the Nordic countries or the Benelux countries to exist and express their own identity via their own organizations This book looks at the history of Non EU organizations their decision making characteristics membership policies legal powers actions and interactions with each other and the European Union A uniform scheme of analysis is used to make European intergovernmental organizations comparable and by studying them we gain a deeper understanding and insight into European affairs **Unpublished Research on Western Europe, Completed and in Progress** United States Department of State. External Research Division, 1960 Beginning in 1954 Apr issue lists studies in progress Oct issue completed studies *Comparative Politics: Western Europe and the United States: foundations of comparative politics*, 2005 *Western Europe 2012* Wayne C. Congress. Senate. Committee on Finance, 1947 **The Extreme Right in Western Europe** Elisabeth Carter, 2005-10-07 This book examines the reasons behind the variation in the electoral fortunes of the West European parties of the extreme Right in the period since the late 1970s It proposes a number of different explanations as to why certain parties of the extreme Right have performed better than others at the polls and it investigates each of these different explanations systematically and in depth Coalitions Between Terrorist Organizations Ely Karmon, 2005-06-01 This volume proposes some theories on the conditions that favor the formation of coalitions between terrorist organizations and how they function within the changing international system These theories are tested against empirical data on actual cooperation

between European and Palestinian terrorist organizations from 1968 to 1990 and cooperation between European left wing terrorist organizations the phenomenon known as Euro terrorism from 1984 to 1988 These findings form the basis of a broader theory concerning cooperation and coalitions between organizations involved in international terrorism Finally an attempt is made to verify whether the new terrorist players driven at least theoretically by religious motivation will imitate the behavior of the ideological or nationalist organizations and to test whether the theories concerning cooperation and coalitions developed in this volume apply to the new reality

Guide to Foreign Trade Statistics, 1967

Statistical Sources for Social Research on Western Europe 1945-1995 Franz Rothenbacher, 2013-11-11 The intention of this book is to

give a picture of the complex material that has been published in the field of social and economic statistics in Western Europe. Although there are many guides, bibliographies and reference books on special topics of this broad theme, a general overview has been missing. With this book, I hope to fill this gap. The frame of reference is a scientific one, enabling and facilitating comparative social research on Western Europe. In some respect, this book enlarges and updates the bibliography written by Peter Flora, *Quantitative Historical Sociology*, published in *Current Sociology* in 1975. In principle, this guide is an annotated bibliography of the most important printed material in the field of official statistics. The legitimacy of such an approach lies in the fact that even today, printed statistics are the most important form of dissemination of statistical results, although microcomputers, CD-ROMs and the Internet have changed this situation. In any case, a special section on statistical databases is included for every country, describing the main databases of the statistical offices. Furthermore, the Internet address of each international or national statistical institute is provided in the introductory paragraph. This enables the reader to get fast access to online databases and supplementary online information on statistics via the Internet.

National Interest Organizations in the EU Multilevel System Rainer Eising, Daniel Rasch, Patrycja Rozbicka, 2020-05-21. Political scientists have always accorded interest organizations a prominent place in European Union (EU) policy making because they connect the EU institutions to citizens, provide important information to EU policy makers and control resources that impact on the problem-solving capacity of EU policies. In other words, they are vital to both the input legitimacy and the output legitimacy of the EU. So far, research on interest organizations in EU policy making has concentrated on EU level interest organizations and EU level politics. This edited book draws attention to the role national interest organizations play in the EU multilevel system. All contributions present state-of-the-art research on that subject in the form of theory-driven empirical analyses. The Law of Global and European Organizations Urs Saxer, 2025-08-29. This textbook, which is aimed at students, academics and interested individuals, journalists, representatives of state or civil society institutions, NGOs, deals with institutionalized cooperation based on international organizations and addresses the law and the role of these organizations in international law and politics. This topic is highly relevant as we live in disruptive times. This makes international cooperation all the more important in overcoming the numerous challenges that the international system and mankind face. The book begins with a general section that explains the legal and theoretical bases of international organizations as pivotal institutions of cooperation between states. This is followed by a closer look at the most important global and European organizations. At the global level, the UN as the central institution of the state system with its collective security mechanisms deserves special attention. International economic organizations are also of great importance as they legally constitute and steer the global economy. The WTO is an institution that monitors and, if necessary, enforces compliance.

by states with the central trade agreements GATT GATS and TRIPS The Bretton Woods institutions have special features that make them interesting not only because of their obvious global economic impact but also from a legal perspective This includes their structure and mode of operation which is modelled after private sector companies At the European level the OSCE is a remarkable organization because it is based exclusively on soft law At the same time it is a regional collective security organization under Chapter VIII of the UN Charter The Council of Europe is a traditional organization dedicated to human rights and the rule of law but it has special institutional characteristics due to its close connection to the European Court of Human Rights NATO is the prototype of a collective defense organization and has special characteristics in terms of decision making unanimity institutions and cooperation with third countries The EU is the prototype of a supranational organization as the next higher level of intergovernmental cooperation which is based on the partial integration of powers originally belonging to the member states All organizations covered in this book have their own unique characteristics and together they provide a multi layered picture of the impact of international organizations in the international system The book concludes with a chapter on NGOs as institutions of international civil society that play an important role in the development of global strategies and international legal standards
