## **Oriental Medicine And Cancer:**

### **Bridging The Gap: Integrative Oncology And The Practice Of Traditional Chinese Medicine** Bianca Di

Giulio, James Munson, 2020-08-24 The book's inherent value currently is in its uniqueness. There are few books on Integrative Oncology (IO). There are few books on the entirety of traditional Chinese medicine in the treatment of cancer. There are even fewer if any books that deal with the topics of Integrative Oncology and the use of traditional Chinese medicine as a whole in the treatment of people with cancer. While very broad and deep topics, this makes for a varied audience of interest that includes not just the TCM practitioner or student but Western health practitioners and patients as well as laypeople interested in the topic of oncology. For those interested in the topic of IO, it gives one of the few non-biased, honest, and critical views of the state of IO in contrast to what is promoted by various institutions and societies. For the Western health practitioner and/or patient, many of whom are completely unfamiliar with TCM and how it works or can be used, it provides information on the breadth of TCM and how it can be applied in various ways to help improve outcomes. For the TCM practitioner or student, it provides much needed information on how to go about caring for a patient with cancer to include clinical pearls and important Western medical information and terminology.

**Integrating Conventional and Chinese Medicine in Cancer Care** Tai Lahans, 2007-06-05 This new clinical resource clearly explains how to approach integrated care in a way that combines Chinese herbal medicine with Western medicine to enhance and improve medical care for patients with cancer without undermining or negatively impacting patients' medical treatment. Each chapter covers a different type of cancer, first introducing the conventional medical understanding of that cancer, including its etiology, diagnosis, and treatment according to staging and type. The chapter then covers that cancer from the perspective of Oriental medicine. Case studies illustrate the integration of treatment for each cancer type, raising important issues and considerations associated with specific cancers and treatments. Formulas are presented within the context of conventional treatment, intended to enhance the effectiveness of treatment and/or treat side effects without undermining the treatment's function. Each formula is followed by a discussion of how and why the herbs are used, including classical Chinese theory and relevant pharmaceutical studies. Staging and the age and performance status of various patients is used as a means by which to explain how formulas are changed. Case studies explore issues related to the integration of treatment for each type of cancer.

**Supportive Cancer Care with Chinese Medicine** William C.S. Cho, 2010-01-08 Cancer is a chronic disease. There are increasing cancer survivors after curative cancer treatment, and this makes supportive cancer care an important area that more attention is needed. Chinese medicine has a long history of practice; it has aroused much interest from both Oriental and Western countries. A number of laboratory evidences and clinical trials demonstrated the effectiveness and efficacies of Chinese medicine for supportive cancer care. This book attempts to take a comprehensive approach to overview the different areas of Chinese medicine for supportive cancer care. This book not only serves as an introduction to novices to the area and a useful

reference for those already involved but also serves as a stimulus to these and others to employ alternative approaches to current cancer care Hong Kong William C S Cho December 2009 v Contents 1 Supportive Cancer Care Using Chinese Medicine 1 Raimond Wong and Stephen M Sagar 2 Supportive Cancer Care with Acupuncture 39 Jaung Geng Lin and Yi Hung Chen 3 Chinese Medicinal Herbs Use in Managing Cancer 55 Peter Dorsher and Zengfu Peng 4 Supportive Cancer Care with Qigong 77 Myeong Soo Lee Kevin W Chen and Edzard Ernst 5 Traditional Chinese Medicine in the Reduction of Discomfort and Side Effects of Surgery 95 Kok Yang Tan Xiaoxiu Wu and Francis Seow Choen 6 Increasing Therapeutic Gain and Controlling Radiation Induced Injuries with Asian Botanicals and Acupuncture 109 Stephen M Sagar and Raimond K Wong 7 Controlling Chemotherapy Related Side Effects with Chinese Medicine **Traditional Chinese Medicine**
