

ELEMENTS OF PANTHEISM

A Spirituality of Nature
and the Universe
Third edition

Richard Dawkins has called pantheism "sexed-up atheism." At the heart of modern scientific pantheism is reverence for Nature and the Universe. It offers a challenging alternative, beyond theism and atheism, with a joyful approach to our lives and a caring concern for all life on this earth. Pantheism is a 2,500 year-old belief system espoused by many famous thinkers and artists including Lao Tzu, Heraclitus, Spinoza, Wordsworth, Whitman, Emerson, Einstein and Carl Sagan.

Today pantheism is seeing a revival as the underlying world view of many environmentalists, of leading scientists, of nature-revering pagans, and of non-theists looking for a more embracing perspective. This accessible and authoritative handbook is the only available introduction to the history, theory and practice of pantheism.

Reviews from Amazon

Surely one of the most extraordinary books written in recent years about the subject of religion. If you are concerned about the Earth and the way we are treating it in our culture you will want to read this book.

Dr Bill Brund

Probably the best book to recommend to someone who is no longer comfortable living with the intellectual compromises necessary to maintain a traditional "faith."

George R. Paulner

I strongly recommend it to all who feel a profound connection with nature and the universe.

G. Looney

Explains in a clear, informative style why pantheism is a verifiable, honest, and appropriate philosophy and way of life for our times.

Sam Brown

Dr Paul Harrison is the founder and president of the World Pantheism Movement and a laureate of the UN Environment Programme's Global 500 award for his books on environment, population and development.

Oriental Pantheism:

The Reception of Blake in the Orient Steve Clark, Masashi Suzuki, 2006-04-01 This volume brings together research from international scholars focusing attention on the longevity and complexity of Blake's reception in Japan and elsewhere in the East. It is designed as not only a celebration of his art and poetry in new and unexpected contexts but also to contest the intensely nationalistic and parochial Englishness of his work and in broader terms the inevitable passivity with which Romanticism and other Western intellectual movements have been received in the Orient.

Hegel: Lectures on the Philosophy of Religion: Volume I: Introduction and the Concept of Religion Peter C. Hodgson, 2008-01-24 The Hegel Lectures Series. Series Editor Peter C. Hodgson. Hegel's lectures have had as great a historical impact as the works he himself published. Important elements of his system are elaborated only in the lectures, especially those given in Berlin during the last decade of his life. The original editors conflated materials from different sources and dates, obscuring the development and logic of Hegel's thought. The Hegel Lectures series is based on a selection of extant and recently discovered transcripts and manuscripts. Lectures from specific years are reconstructed so that the structure of Hegel's argument can be followed. Each volume presents an accurate new translation accompanied by an editorial introduction and annotations on the text which make possible the identification of Hegel's many allusions and sources. Hegel's Lectures on the Philosophy of Religion represent the final and in some ways the decisive element of his entire philosophical system. His conception and execution of the lectures differed significantly on each of the occasions he delivered them in 1821, 1824, 1827, and 1831. The older editions introduced insoluble problems by conflating these materials into an editorially constructed text. The present volumes establish a critical edition by separating the series of lectures and presenting them as independent units on the basis of a complete re-editing of the sources by Walter Jaeschke. The English translation has been prepared by a team consisting of Robert F. Brown, Peter C. Hodgson, and J. Michael Stewart with the assistance of H. S. Harris. Now widely recognized as the definitive English edition, it is being reissued by Oxford in the Hegel Lectures Series. The three volumes include editorial introductions, critical annotations on the text, textual variants, and tables, bibliography, and glossary. Hegel's Introduction establishes the new discipline of philosophy of religion and positions it vis-à-vis the philosophical, theological, cultural, and epistemological issues of the time. The Concept of Religion sets forth a speculative definition of religion and discusses the experience, concept, knowledge, and worship of God.

The Philosophy of Beauty James Henry Cousins, 1925

American Transcendentalism and Asian Religions Arthur Versluis, 1993 Arthur Versluis offers a comprehensive study of the relationship between the American Transcendentalists and Asian religions. He argues that an influx of new information about these religions shook nineteenth-century American religious consciousness to the core. With the publication of ever more material on Buddhism, Hinduism, and Taoism, the Judeo-Christian tradition was inevitably placed as just one among a number of religious traditions. Fundamentalists and conservatives denounced this influx as a threat, but the

Transcendentalists embraced it poring over the sacred books of Asia to extract ethical injunctions admonitions to self transcendence myths taken to support Christian doctrines and manifestations of a supposed coming universal religion

The Idea of Semitic Monotheism Guy G. Stroumsa,2021-05-20 The Idea of Semitic Monotheism examines some major aspects of the scholarly study of religion in the long nineteenth century from the Enlightenment to the First World War It aims to understand the new status of Judaism and Islam in the formative period of the new discipline Guy G Stroumsa focuses on the concept of Semitic monotheism a concept developed by Ernest Renan around the mid nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples cultures and religions This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages at the time of the Enlightenment and Romanticism Together with the rise of scholarly Orientalism this discovery offered new perspectives on the East as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations This innovative work studies a central issue in the modern study of religion Doing so however it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century up to the present day *The Journal of Speculative Philosophy* ,1878

Shepherds of Pan on the Big Sur-Monterey Coast Elayne Wareing Fitzpatrick,2006-08-22 SHEPHERDS OF PAN ON THE BIG SUR MONTEREY COAST is a medley of lively literate essays about the Nature wisdom linking some unlikely bedfellows Robert Louis Stevenson Gertrude Atherton Jack London Robinson Jeffers Jaime de Angulo John Steinbeck Eric Barker D H Lawrence Henry Miller and others with a pertinent postscript on William James father of American psychology All these luminaries came to perceive divinity in the awesome double dealing power of Nature symbolized by the Greek god Pan Many became pantheists or nature mystics under the spell of the alternately soft and violent landscape of Californias central coast The book is a multicolored meditation on a deeply rooted and often overlooked human need to reconnect with Nature wellspring of our inner joy and psychic wholeness **First Lines of Christian Theology** John Pye Smith,William Farrer,1854

Hegel's Interpretation of the Religions of the World Jon

Stewart, 2018-09-12 In his Lectures on the Philosophy of Religion Hegel treats the religions of the world under the rubric the determinate religion This is a part of his corpus that has traditionally been neglected since scholars have struggled to understand what philosophical work it is supposed to do In Hegel's Interpretation of the Religions of the World Jon Stewart argues that Hegel's rich analyses of Buddhism Hinduism Zoroastrianism Judaism Egyptian and Greek polytheism and the Roman religion are not simply irrelevant historical material as is often thought Instead they play a central role in Hegel's argument for what he regards as the truth of Christianity Hegel believes that the different conceptions of the gods in the world religions are reflections of individual peoples at specific periods in history These conceptions might at first glance appear random and chaotic but there is Hegel claims a discernible logic in them Simultaneously a theory of mythology history and philosophical anthropology Hegel's account of the world religions goes far beyond the field of philosophy of religion The controversial issues surrounding his treatment of the non European religions are still very much with us today and make his account of religion an issue of continued topicality in the academic landscape of the twenty first century

Whispering the Secrets of Language: An Mental Quest through **Oriental Pantheism**

In a digitally-driven earth wherever monitors reign supreme and instant connection drowns out the subtleties of language, the profound strategies and emotional nuances concealed within words usually move unheard. Yet, situated within the pages of **Oriental Pantheism** a captivating fictional prize sporting with raw emotions, lies an exceptional journey waiting to be undertaken.
