

THE ORIGIN OF THE BUDDHA IMAGE*

BY ANANDA K. COOMARASWAMY

"Nothing beyond what is self-developed in the brain of a race is permanently gained, or will survive the changes of time."

—THOMAS PERTON, in *Social Life in Ancient Egypt*

INTRODUCTION

THE question of the origin of the Buddha image is, of course, but a part of the general problem of the origin of Indian iconography and plastic types. In view of the thoroughly Indian character of mediæval works it was natural in the first place to suppose that these types had been created and developed on Indian soil, and by Indian sculptors. This might well have seemed most obvious in the case of the Buddha figure, representing as it does, a conception of spiritual attainment altogether foreign to European psychology, and a formula quite un-European in its indifference to natural fact.

But it was soon realized, on the one hand, that the Buddha (Gautama, Śākya-Muni), in early Indian art, say before the first century A. D., is never represented in human form but only by symbols; and, on the other hand, that the Graeco-Buddhist or Indo-Hellenistic art of Gandhāra in the period immediately following presents us with an innumerable series of anthropomorphic images, certainly with some peculiarities of their own, but resembling in a general way the later Gupta and mediæval images of India proper, not to speak of those of Farther India and the Far East. At once it was taken for granted that the idea of making such images had been suggested to the Indian mind from this outside source, and that Greek or at any rate Eurasian craftsmen had created the first images of the Buddha for Indian patrons on the foundation of a Hellenistic Apollo; and that the later images were not so much Indian as Indianized versions of the Hellenistic or, as it was more loosely expressed, Greek prototypes. This view was put forward, as M. Foucher himself admits, in a manner best calculated to flatter the prejudices of European students and to offend the susceptibilities of Indians: the creative genius of Greece had provided a model which had later been barbarized and degraded by races devoid of true artistic instincts, to whom nothing deserving the name of fine art could be credited.

From the standpoint of orthodox European scholarship the question was regarded as settled, and all that remained was to work out the details, a study which was undertaken by the founder of the theory in his already classic *L'art gréco-bouddhique du Gandhāra*, and continued by Grünwedel and others, with this result at least, that the art of Gandhāra is now very thoroughly known. When, a little later, doubts were expressed from various quarters external to the circle of orthodox scholarship, doubts suggested rather by stylistic and *a priori* psychological considerations, than by purely archaeological evidence, M. Foucher, the author most committed to the Greek theory, did not hesitate to suggest in

The Origin of the Buddha Image Ananda Kentish Coomaraswamy, 1972 **The Origin of the Buddha Image & Elements of Buddhist Iconography** Ananda Kentish Coomaraswamy, 2006 Two foundational texts enhanced by a third *The Nature of Buddhist Art* are concerned not only with providing a language for reading the artistic and linguistic symbols for Buddhism but also show how these symbols are conducive to self realization which is the aim of all sacred art Providing a schema of what is of the utmost value in all the world's great spiritual traditions as they pertain to transforming the understanding life and the spiritual process clear expositions on the significance of the most profound Buddhist symbols are offered including the poses the Lotus the ground of manifestation the Bodhi Tree the Tree of Life synonymous with all existence and the Wheel the operation of principles The portrayal of the Kingdom of Heaven Within in Buddhist etymology iconography and metaphysics is explored and this whole cosmology which would appear to be outward is revealed to be located within the human heart itself This work demonstrates that art is not solely for instruction or visual mental pleasure but intends to liberate the beholder from the restless activity that obscures reality and inhibits inner peace

Image Problems Robert Daniel DeCaroli, 2015-03-01 This deft and lively study by Robert DeCaroli explores the questions of how and why the earliest verifiable images of the historical Buddha were created In so doing DeCaroli steps away from old

questions of where and when to present the history of Buddhism's relationship with figural art as an ongoing set of negotiations within the Buddhist community and in society at large. By comparing innovations in Brahmanical Jain and royal artistic practice, DeCaroli examines why no image of the Buddha was made until approximately five hundred years after his death and what changed in the centuries surrounding the start of the Common Era to suddenly make those images desirable and acceptable. The textual and archaeological sources reveal that figural likenesses held special importance in South Asia and were seen as having a significant amount of agency and power. Anxiety over image use extended well beyond the Buddhists, helping to explain why images of Vedic gods, Jain teachers, and political elites also are absent from the material record of the centuries BCE. DeCaroli shows how the emergence of powerful dynasties and rulers who benefited from novel modes of visual authority was at the root of the changes in attitude toward figural images. However, as DeCaroli demonstrates, a strain of unease with figural art persisted even after a tradition of images of the Buddha had become established.

Ganges Sudipta Sen, 2019-01-08. A sweeping interdisciplinary history of the world's third largest river, a potent symbol across South Asia and the Hindu diaspora. Originating in the Himalayas and flowing into the Bay of Bengal, the Ganges is India's most important and sacred river. In this unprecedented work, historian Sudipta Sen tells the story of the Ganges from the communities that arose on its banks to the merchants that navigated its waters and the way it came to occupy center stage in the history and culture of the subcontinent. Sen begins his chronicle in prehistoric India, tracing the river's first settlers, its myths of origin in the Hindu tradition, and its significance during the ascendancy of popular Buddhism. In the following centuries, Indian empires, Central Asian regimes, European merchants, the British Empire, and the Indian nation state all shaped the identity and ecology of the river. Weaving together geography, environmental politics, and religious history, Sen offers in this lavishly illustrated volume a remarkable portrait of one of the world's largest and most densely populated river basins.

In Search of the Sacred Seyyed Hossein Nasr, Ramin Jahanbegloo, 2010-07-14. In this book, a series of interviews offers an accessible, revealing human and intellectual biography of leading Islamic scholar Seyyed Hossein Nasr. Seyyed Hossein Nasr is one of the preeminent philosophers writing today. Sure to be a key resource for decades to come, *In Search of the Sacred: A Conversation with Seyyed Hossein Nasr on His Life and Thought* illuminates Nasr's experiences and shares his insights on topics from religion and philosophy to science and the arts. Based on a series of interviews, the book combines traditional autobiography with an exploration of

the intellectual and spiritual trajectories of the author's thought during key periods of his life. In doing so it presents a fascinating panorama not only of the life and ideas of one man but also of major events ranging from intellectual life in Iran during the Pahlavi period and the Iranian Revolution to some of the major religious and intellectual debates between Islam and modernism. Nasr writes that his whole life has been a quest for the sacred. This work connects that quest with some of the most important issues of the day in encounters between Islam and the West.

Gandharan Buddhism Kurt Behrendt, Pia Brancaccio, 2011-11-01 The ancient region of Gandhara with its prominent Buddhist heritage has long fascinated scholars of art history, archaeology and textual studies. Discoveries of inscriptions, text fragments, sites and artworks in the last decade have added new pieces to the Gandharan puzzle, redefining how we understand the region and its cultural complexity. The essays in this volume reassess Gandharan Buddhism in light of these findings, utilizing a multidisciplinary approach that illuminates the complex historical and cultural dynamics of the region. By integrating archaeology, art history, numismatics, epigraphy and textual sources, the contributors articulate the nature of Gandharan Buddhism and its practices along with the significance of the relic tradition. Contributions by several giants in the field, including Shoshin Kuwayama, John Rosenfield and the late Maurizio Taddei, set the geographical, historical and archaeological parameters for the collection. The result is a productive interdisciplinary conversation on the enigmatic nature of Gandharan Buddhism that joins together a number of significant pieces in a complex cultural mosaic. It will appeal to a large and diverse readership, including those interested in the early Buddhist religious tradition of Asia and its art as well as specialists in the study of South and Central Asian Buddhist art, archaeology and texts.
