Origins Of Agriculture:

The Origins of Agriculture David Rindos, 2013-10-22 The Origins of Agriculture An Evolutionary Perspective presents an alternative approach to understanding cultural variation and change It aims to demonstrate that domestication and the origin of agricultural systems are best understood by attempting to explicate the evolutionary forces that affected that development of domesticates and agricultural systems The book begins by discussing cultural change the domestication of plants and the origin of agricultural systems in the most general of terms It considers Darwinism in some depth concentrating on the relationship between natural selection and cultural change Subsequent chapters examine the world of domestication and agriculture and present a series of concepts that may permit a more natural explanation for these processes These include concepts such as incidental domestication specialized domestication and agricultural domestication The final two chapters present models for the origin and spread of agricultural systems based upon Darwinian evolutionary theory *The Origins*

of Agriculture C. Wesley Cowan, Nancy L. Benco, Patty Jo Watson, 2006-05-18 The eight case studies in this book each a synthesis of available knowledge about the origins of agriculture in a specific region of the globe enable scholars in diverse disciplines to examine humanity's transition to agricultural societies Contributors include Gary W Crawford Robin W Dennell and Jack R Harlan **The History of Agriculture** Britannica Educational Publishing, 2012-12-01 Agriculture that is using

and managing natural resources has a long and complex history For thousands of years societies have relied on plants and animals for food and other items making agriculture as vital to their survival as it is to ours The cultivation of various crops and livestock over time and throughout the world are examined revealing the history behind and importance of much of the food we eat today Also covered are the techniques and equipment that have been developed over time to facilitate agricultural production

Origins of Agriculture Charles A. Reed, 2011-06-03 No detailed description available for Origins of Agriculture **ORIGINS OF AGRICULTURE PB** Nancy L. Benco, 1992-08-17 The eight case studies in this book each a

synthesis of available knowledge about the origins of agriculture in a specific region of the globe enable scholars in diverse disciplines to examine humanity's transition to agricultural societies *First Farmers* Peter Bellwood, 2004-11-30 First Farmers the Origins of Agricultural Societies offers readers an understanding of the origins and histories of early agricultural populations in all parts of the world Uses data from archaeology comparative linguistics and biological anthropology to cover developments over the past 12 000 years Examines the reasons for the multiple primary origins of agriculture Focuses on agricultural origins in and dispersals out of the Middle East central Africa China New Guinea Mesoamerica and the northern Andes Covers the origins and dispersals of major language families such as Indo European Austronesian Sino Tibetan Niger Congo and Uto Aztecan *Plant Domestication and the Origins of Agriculture in the Ancient Near East* Shahal Abbo, Avi

Gopher, Gila Kahila Bar-Gal, 2022-03-24 The Agricultural Revolution including the domestication of plants and animals in the Near East that occurred 10 500 years ago ended millions of years of human existence in small mobile egalitarian

communities of hunters gatherers This Neolithic transformation led to the formation of sedentary communities that produced crops such as wheat barley peas lentils chickpeas and flax and domesticated range of livestock including goats sheep cattle and pigs All of these plants and animals still play a major role in the contemporary global economy and nutrition This agricultural revolution also stimulated the later development of the first urban centres This volume examines the origins and development of plant domestication in the Ancient Near East along with various aspects of the new Man Nature relationship that characterizes food producing societies It demonstrates how the rapid geographically localized knowledge based domestication of plants was a human initiative that eventually gave rise to Western civilizations and the modern human condition

The Origins of Agriculture in Europe I. J. Thorpe, 1996 This study takes a look at current ideas on the development of the farming economy and is an extremely valuable resource for students of European prehistory

The Social History of Agriculture Christopher Isett, Stephen Miller, 2016-11-09 This innovative text provides a compelling narrative world history through the lens of food and farmers Tracing the history of agriculture from earliest times to the present Christopher Isett and Stephen Miller argue that people rather than markets have been the primary agents of agricultural change Exploring the actions taken by individuals and groups over time and analyzing their activities in the wider contexts of markets states wars the environment population increase and similar factors the authors emphasize how larger social and political forces inform decisions and lead to different technological outcomes Both farmers and elites responded in ways that impeded economic development Farmers when able to trade with towns used the revenue to gain more land and security Elites used commercial opportunities to accumulate military power and slaves The book explores these tendencies through rich case studies of ancient China precolonial South America early modern France England and Japan New World slavery colonial Taiwan socialist Cuba and many other periods and places Readers will understand how the promises and problems of contemporary agriculture are not simply technologically derived but are the outcomes of decisions and choices people have made and continue to make

A History of World Agriculture Marcel Mazoyer, Laurence Roudart, 2006-06 Only once we understand the long history of human efforts to draw sustenance from the land can we grasp the nature of the crisis that faces humankind today as hundreds of millions of people are faced with famine or flight from the land From Neolithic times through the earliest civilizations of the ancient Near East in savannahs river valleys and the terraces created by the Incas in the Andean mountains an increasing range of agricultural techniques have developed in response to very different conditions These developments are recounted in this book with detailed attention to the ways in which plants animals soil climate and society have interacted Mazoyer and Roudart's *A History of World Agriculture* is a path breaking and panoramic work beginning with the emergence of agriculture after thousands of years in which human societies had depended on hunting and gathering showing how agricultural techniques developed in the different regions of the world and how this extraordinary wealth of knowledge tradition and natural variety is endangered today by global

capitalism as it forces the unequal agrarian heritages of the world to conform to the norms of profit During the twentieth century mechanization motorization and specialization have brought to a halt the pattern of cultural and environmental responses that characterized the global history of agriculture until then Today a small number of corporations have the capacity to impose the farming methods on the planet that they find most profitable Mazoyer and Roudart propose an alternative global strategy that can safeguard the economies of the poor countries reinvigorate the global economy and create a livable future for mankind *A History of Agriculture in Europe and America* Norman Scott Brien Gras,1925

The Origin and Evolution of Cultures Los Angeles Robert Boyd Professor of Anthropology University of California,Davis Peter J. Richerson Professor of Environmental Science and Policy University of California,2004-12-22 Oxford presents in one convenient and coherently organized volume 20 influential but until now relatively inaccessible articles that form the backbone of Boyd and Richerson's path breaking work on evolution and culture Their interdisciplinary research is based on two notions First that culture is crucial for understanding human behavior unlike other organisms socially transmitted beliefs attitudes and values heavily influence our behavior Secondly culture is part of biology the capacity to acquire and transmit culture is a derived component of human psychology and the contents of culture are deeply intertwined with our biology Culture then is a pool of information stored in the brains of the population that gets transmitted from one brain to another by social learning processes Therefore culture can account for both our outstanding ecological success as well as the maladaptations that characterize much of human behavior The interest in this collection will span anthropology psychology economics philosophy and political science **The Beginnings of Agriculture in America** Lyman Carrier,1923 *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin,1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa *Food and Evolution* Marvin Harris,Eric B. Ross,2009-01-28 An unprecedented

interdisciplinary effort suggests that there is a systematic theory behind why humans eat what they eat History of Agriculture in the Northern United States, 1620-1860 Percy Wells Bidwell, John Ironside Falconer, 1973 **The Origins of Agriculture** Nancy L. Benico, 2006 *The Oxford Handbook of Agricultural History* Jeannie M. Whayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor *Origin of Cultivated Rice* H.-I. Oka, 2012-12-02 This book aims to update our present understanding of the origin of cultivated rice and in doing so involves different disciplines of biology and the archaeological historical sciences Various recent discoveries are reviewed and questions posed for further consideration by the reader The book covers a wide range of studies on problems relative to the origin of cultivated rice placing emphasis on ecological and genetical aspects Comparisons are made between two cultivated rice species independently evolved in Asia and Africa from respective wild progenitors Phenomena are observed during mixed planting and hybrids discussed Detailed information is presented about Asian common wild rice thought to be the ancestor of common rice The dynamics of domestication are considered with regard to hybridization selection formation of weedy types and the accumulation of genetic diversity Also included are recent archaeological findings in relation to the beginnings of rice culture leading to the hypothesis of diffused origins Cultivars of common rice fall into one of two types called Indica and Japonica The dynamics of differentiation are discussed giving evidence and different hypotheses Information on the genetic bases and functions of various reproductive barriers found between the cultivated and wild taxa is presented and discussed The practical aspects of crop evolutionary studies concerned with the breeding philosophy and germplasm conservation are briefly commented on and arguments for rediversification of crop germplasm and conservation of the environment given Senior scientists and post graduate students interested in rice genetics crop evolution and related sciences will find this book invaluable *Maps of Time* David Christian, 2004-02-23 A history of the world from the big bang to the present Big history is a new approach to world history that joins the history of the world as a physical entity to human history David Christian is the leading proponent of this approach to world history
