Origins Of The French Welfare State:

The Birth of Solidarity François Ewald, 2020-05-08 François Ewald's landmark *The Birth of Solidarity* first published in French in 1986 revised in 1996 with the revised edition appearing here in English for the first time is one of the most important historical and philosophical studies of the rise of the welfare state Theorizing the origins of social insurance Ewald shows how the growing problem of industrial accidents in France throughout the nineteenth century tested the limits of classical liberalism and its notions of individual responsibility As workers and capitalists confronted each other over the problem of workplace accidents they transformed the older practice of commercial insurance into an instrument of state intervention thereby creating an entirely new conception of law the state and social solidarity What emerged was a new system of social insurance guaranteed by the state *The Birth of Solidarity* is a classic work of social and political theory that will appeal to all those interested in labor power the making and dismantling of the welfare state and Foucauldian notions of governmentality security risk and the limits of liberalism Origins of the French Welfare State Paul V. Dutton, 2002-05-16 This is the first comprehensive analysis of public and private welfare in France available in English or French which offers a deeply researched explanation of how France's welfare state came to be and why the French are so attached to it The author argues that France simultaneously pursued two different paths toward universal social protection Family welfare embraced an industrial model in which class distinctions and employer control predominated By contrast protection against the risks of illness disability maternity and old age followed a mutual aid model of welfare The book examines a remarkably broad cast of actors that includes workers unions employers mutual leaders the parliamentary elite haut fonctionnaires doctors pronatalists women's organizations both social Catholic and feminist and diverse peasant organisations It also traces foreign influences on French social reform particularly from Germany's former territories in Alsace Lorraine and Britain's Beveridge Plan **Origins of the French Welfare State** Paul V. New Directions in Policy History Julian E. Zelizer, 2010-11-01 *The Oxford Handbook of European History, 1914-1945* Nicholas Doumanis, 2016 The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. *The Oxford Handbook of European History, 1914-1945* reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

Radical History Review: Volume 69, 1998-04-02 *Radical History Review* presents innovative scholarship and commentary that looks critically at the past and its history from a non-sectarian, left perspective.

The Origins of the Welfare State Lisa DiCaprio, 2007-07-09 In May 1790 the French National Assembly created spinning workshops (*ateliers de filature*) for thousands of unemployed women in Paris. These *ateliers* disclose new aspects of the process which transformed Old Regime charity into revolutionary welfare initiatives characterized by secularization, centralization, and entitlements based on citizenship. This study is the first to examine women and the welfare state in its formative period at a time when modern concepts of human rights were elaborated.

The Colonial Origins of Modern Social Thought George Steinmetz, 2025-02-25 A new history of French social thought that connects postwar sociology to colonialism and empire. In this provocative and original retelling of the history of French social thought, George Steinmetz places the history and development of modern French sociology in the context of the French empire after World War II. Connecting the rise of all the social sciences with efforts by France and other imperial powers to consolidate control over their crisis-ridden colonies, Steinmetz argues that colonial research represented a crucial core of the nascent academic discipline of sociology, especially between the late 1930s and the 1960s. Sociologists who became favored partners of colonial governments were asked to apply their expertise to such social problems as detribalization, urbanization,

poverty and labor migration This colonial orientation permeated all the major subfields of sociological research Steinmetz contends and is at the center of the work of four influential scholars Raymond Aron Jacques Berque Georges Balandier and Pierre Bourdieu In retelling this history Steinmetz develops and deploys a new methodological approach that combines attention to broadly contextual factors dynamics within the intellectual development of the social sciences and sociology in particular and close readings of sociological texts He moves gradually toward the postwar sociologists of colonialism and their writings beginning with the most macroscopic contexts which included the postwar reoccupation of the French empire and the turn to developmentalist policies and the resulting demand for new forms of social scientific expertise After exploring the colonial engagement of researchers in sociology and neighboring fields before and after 1945 he turns to detailed examinations of the work of Aron who created a sociology of empires Berque the leading historical sociologist of North Africa Balandier the founder of French Africanist sociology and Bourdieu whose renowned theoretical concepts were forged in war torn late colonial Algeria

Communities Under Fire Alex Dowdall,2020 Between 1914 and 1918 the Western Front passed through some of Europe s most populated and industrialised regions such as the towns of Nancy Reims Arras and Lens This is the story of how war shaped the civilian identities of people who suffered intense artillery bombardment military occupation and forced displacement

Boundaries of the State in US History James T. Sparrow,William J. Novak,Stephen W. Sawyer,2015-09-07 The question of how the American state defines its power has become central to a range of historical topics from the founding of the Republic and the role of the educational system to the functions of agencies and America s place in the world Yet conventional histories of the state have not reckoned adequately with the roots of an ever expanding governmental power assuming instead that the American state was historically and exceptionally weak relative to its European peers Here James T Sparrow William J Novak and Stephen W Sawyer assemble definitional essays that search for explanations to account for the extraordinary growth of US power without resorting to exceptionalist narratives Turning away from abstract metaphysical questions about what the state is or schematic models of

how it must work these essays focus instead on the more pragmatic historical question of what it does By historicizing the construction of the boundaries dividing America and the world civil society and the state they are able to explain the dynamism and flexibility of a government whose powers appear so natural as to be given invisible inevitable and exceptional

Native to the Republic Minayo Nasiali, 2016-10-20 In *Native to the Republic* Minayo Nasiali traces the process through which expectations about living standards and decent housing came to be understood as social rights in late twentieth century France These ideas evolved through everyday negotiations between ordinary people municipal authorities central state bureaucrats elected officials and social scientists in postwar Marseille Nasiali shows how these local level interactions fundamentally informed evolving ideas about French citizenship and the built environment namely that the institutionalization of social citizenship also created new spaces for exclusion Although everyone deserved social rights some were supposedly more deserving than others From the 1940s through the early 1990s metropolitan discussions about the potential for town planning to transform everyday life were shaped by colonial and later postcolonial migration within the changing empire As a port and the historical gateway to and from the colonies Marseille's interrelated projects to develop welfare institutions and manage urban space make it a particularly significant site for exploring this uneven process Neighborhood debates about the meaning and goals of modernization contributed to normative understandings about which residents deserved access to expanding social rights Nasiali argues that assumptions about racial social and spatial differences profoundly structured a differential system of housing in postwar France *Native to the Republic* highlights the value of new approaches to studying empire membership in the nation and the welfare state by showing how social citizenship was not simply constituted within imagined communities but also through practices involving the contestation of spaces and the enjoyment of rights

Migration, Settlement and Belonging in Europe, 1500-1930s Steven King, Anne Winter, 2013-11-01 The issues around settlement belonging and poor relief have for too long been understood largely from the perspective of England and Wales This volume offers a pan European survey that encompasses Switzerland Prussia Belgium the Netherlands and Britain It explores how the conception of belonging changed over time and space from the 1500s onwards how communities dealt with the welfare expectations of an increasingly mobile population that migrated both within and between states the welfare rights that were attached to those who belonged and how ordinary people secured access to welfare resources What emerged was a sophisticated European settlement system which on the one hand structured itself to limit the claims of the poor and yet on the other was peculiarly sensitive to their demands and negotiations

Democratic Crisis and Global Constitutional Law Christopher Thornhill, 2021-01-28 *Democratic Crisis and Global Constitutional Law* explains the current weakness of democratic polities by examining antinomies in constitutional democracy and its theoretical foundations This book argues that democracy is usually analysed in a theoretical lens that is not adequately sensitive to its historical origins The author proposes a new sociological framework for understanding

democracy and its constitutional preconditions stressing the linkage between classical patterns of democratic citizenship and military processes and arguing that democratic stability at the national level relies on the formation of robust normative systems at the international level On this basis he argues that democracy is frequently exposed to crisis because the normative terms in which it is promoted and justified tend to simplify its nature These terms create a legitimising space in which anti democratic movements typically with a populist emphasis can take shape and flourish *To Heal Humankind* Adam Gaffney,2017-07-06 The Right to Health in the International Bill of Rights Latin America and the Right to Healthcare Alma Ata and the Advent of Primary Care in the Cold War Return to the US From Medicare to Universal Healthcare Return to Latin America Alma Ata in Nicaragua 7 The Right to Health in the Age of Neoliberalism Exit Alma Ata Enter the World Bank Healthcare and Neoliberalism A Return to Chile Nicaragua China Russia and Cuba HIV AIDS and the Human Right to Health Movement The Right to Health in Law International and Domestic Medicines and the Rights Commodity Dialectic The Case of South Africa Rights Litigation and Privatization Brazil Colombia India and Canada The Healthcare Rights Commodity Dialectic in a Time of Austerity and Reaction Conclusion Index The Cambridge History of Twentieth-Century Political Thought Terence Ball,Richard Bellamy,2003-08-14 Table of contents *The Democracy That Never Was* Gary Teeple,2025-02-28 Liberal democracy is usually treated as an independent variable as possessing the absolutes of democratic rule Its variable forms changing principles and practice and conscious destruction by its own advocates in particular the United States however suggest that it is not what it appears to be This book argues that it is a dependent variable the political form required by the changing configurations of national capital and their countervailing forces The forms of liberal democracy have always shifted in concert with the mode of production as their premise The absolutes of liberal democracy the author contends have never been anything but the abstracted principles of the marketplace Their nature has now become especially visible for what they have been because the premise as national capital development has changed leaving liberal democracy as a form without its original content and its present content out of keeping with a national jurisdiction As a political form it persists but its role has been transformed from the regulation of national capital accumulation to the enforcer of the demands of global configurations of capital It is a role that its citizens implicitly understand as revealed in widespread political cynicism decreasing electoral participation and declining legitimacy that require ever greater measures of deceit from political leaders and increased means of coercive social control including militarized police forces and pervasive electronic surveillance There can be no going back to the stage of national politics because the neoliberal content of liberal democratic policies represents the necessities of global capital And it is the contradictions of global capital that define the character of early 21st century political conflict **Family, Dependence, and the Origins of the Welfare State** Susan Pedersen,1993 A comparative analysis of social policies in Britain and France between 1914 and 1945
