Origins Of The Maritime Strategy The Development Of American Naval Strategy 1945 1955:

Origins of the Maritime Strategy Michael A. Palmer, 1990 This book shows that U S maritime strategy of the 1980s actually originated in the strategic planning of naval thinkers after World War II It is the only book to date to specifically discuss these postwar naval plans in a clear concise manner **The U.S. Navy and Its Cold War Alliances, 1945-1953** Corbin Williamson, 2020-08-12 After World War I the U S Navy s brief alliance with the British Royal Navy gave way to disagreements over disarmament fleet size interpretations of freedom of the seas and general economic competition This go it alone approach lasted until the next world war when the U S Navy found itself fighting alongside the British Canadian Australian and other Allied navies until the surrender of Germany and Japan In **The U S Navy and Its Cold War Alliances 1945 1953** Corbin Williamson explores the transformation this cooperation brought about in the U S Navy s engagement with other naval forces during the Cold War Like the onetime looming danger of Nazi Germany and Imperial Japan growing concerns about the Soviet naval threat drew the U S Navy into tight relations with the British Canadian and Australian navies **The U S Navy and Its Cold War Alliances 1945 1953** brings to light the navy to navy links that political concerns have kept out of the public sphere a web of informal connections that included personnel exchanges standardization efforts in equipment and doctrine combined training and education and joint planning for a war with the Soviets Using a history from the middle approach Corbin Williamson draws upon the archives of all four nations including documents only recently declassified to analyze the actions of midlevel officials and officers who managed and maintained these alliances on a day to day basis His work highlights the impact of domestic politics and security concerns on navy to navy relations even as it integrates American naval history with those of Britain Canada and Australia In doing so the book provides a valuable new perspective on the little studied but critical transformation of the U S Navy s peacetime alliances during the Cold War

Digesting History: The U.S. Naval War College, The Lessons of World War Two, and Future Naval Warfare, 1945-1947 Hal M. Friedman, 2010-12-20 Product Description **Digesting History The U S Naval War College the Lessons of World War II and Future Naval Warfare 1945 1947** by Professor Hal M Friedman studies the contribution of the Naval War College especially in the presidency of Admiral Raymond Spruance to strategic thought during the first critical postwar years that is between the end of the war and the formulation of Containment This transition period is especially valuable as a window through which to explore institutions such as the College in transition from a hot war to a cold one While seminal studies exist of the College s work in the interwar years none have been published on this period Eisenhower's New-Look National Security Policy, 1953-61 S. Dockrill, 1996-05-21 The New Look sought to formulate a more selective and flexible response to Communist challenges The New Look was not simply a bigger bang for a buck nor merely a device for achieving a balanced budget nor did it amount solely to a strategy of massive retaliation as is commonly assumed Dr Dockrill s incisive revisionist analysis of the subject throws new light on US ambitious global strategy during the Eisenhower years *Blue*

Versus Purple Hal M. Friedman, 2017 This book is about the war gaming activities of the Naval War College NWC in the late summer and fall of 1946 in Newport Rhode Island and how the end of World War II and the beginning of the Cold War impacted the Naval War College in terms of changing its focus from Japan to the Soviet Union as the primary enemy in the Pacific Basin From preface

The Royal Navy and German Naval Disarmament, 1942-1947 Chris Madsen, 1998 This book examines the formulation and the implementation of the Royal Navy's policy towards German naval disarmament after the Second World War

Digesting History Hal M. Friedman, 2010-05-20 Product Description Digesting History The U S Naval War College the Lessons of World War II and Future Naval Warfare 1945 1947 by Professor Hal M Friedman studies the contribution of the Naval War College especially in the presidency of Admiral Raymond Spruance to strategic thought during the first critical postwar years that is between the end of the war and the formulation of Containment This transition period is especially valuable as a window through which to explore institutions such as the College in transition from a hot war to a cold one While seminal studies exist of the College's work in the interwar years none have been published on this period

Warfare in the Western World, 1882-1975 Jeremy Black, 2014-12-18 In this companion volume to *Western Warfare 1775 1882* Jeremy Black takes his analysis of modern warfare into the twentieth century As before a distinctive feature of the author's approach is the coverage

of both land and naval warfare as well as conflict within the West and between Western and non Western powers Beginning with the British conquest of Egypt in 1882 this book goes on to examine the Spanish American War of 1898 the Boer War and the Balkan conflicts leading to world war in 1914 A revisionist account of the First World War is followed by a discussion of Western expansionism in the period to 1936 Chapters on the interwar years and the Second World War lead on to a discussion of the retreat from empire and the advent of Cold War The narrative closes with the end of the Vietnam War in 1975 and a discussion of the limitations of Western military technique doctrine and technology Throughout the themes of military change and modernization are brought into sharp focus and the revolutionary characteristics of the machination of war in this period are questioned Jeremy Black offers a new and challenging interpretation of modern warfare that will be required reading not only for students of military history but for all those interested in the impact of war in the making of the modern world

War since 1945 Jeremy Black, 2005-04-01 Most writing on modern warfare begins with the French Revolutionary Wars and continues through World Wars I and II giving post 1945 conflicts only a cursory glance through the lens of Cold War politics Distinguished military historian Jeremy Black corrects that imbalance with War since 1945 a comprehensive look at the many large and small scale wars fought around the world in the past sixty years Black argues strenuously that in order fully to understand recent warfare we must discard the Cold War narrative that has until now framed the majority of historical inquiry By treating conflicts especially those in and between developing nations on their own terms he is able to bring proper attention to the wide varieties of force structures methods goals and military cultures that have been employed in post World War II battles Rather than recapitulate the familiar assessments that consider improvements in weaponry or increases in the size of armies without adequately weighing the wider context of their uses in specific wars Black presents an account of warfare that focuses on the actual tasks the military is ordered to undertake His global coverage of warfare is unparalleled and his insistence on the centrality of developing nations to this period of military history brings new knowledge to bear on understudied aspects of recent history Black brings the book up to date with considerations of the current war on terror and the U S led war in Iraq Timely and accessible War since 1945 will be essential to anyone who wants to understand the state of warfare in the present day

Airborne Maritime Surveillance in the North Atlantic John O. Birkeland, 2025-07-17 This book offers a comprehensive examination of historical Norwegian and allied airborne maritime surveillance operations in the North Atlantic after World War II until the present Russia's resurgent naval and submarine activity in the High North needs to be closely observed Norway together with her closest allies have monitored such activity in the High North since the end of World War II One of the key instruments in that effort has been Maritime Patrol Aircraft MPA with their Anti Submarine Warfare ASW capabilities However after the Cold War in many nations an atrophy took place within the MPA communities of knowledge resources and experience with airborne ASW This occurred just as the concept of intelligence surveillance and reconnaissance ISR came to play an increasingly important

role in modern warfare but without sufficient attention being paid to the specific challenges of maritime airborne surveillance and reconnaissance This book addresses that gap and examines the entwined evolution of airborne maritime surveillance by MPA and ASW in the High North both during and after the Cold War with the main focus being on Norway The discussion identifies the fundamental building blocks of these historical surveillance operations through a portrayal of the development of airborne surveillance and reconnaissance operations These building blocks are then applied to make recommendations for the future for maritime surveillance in the High North This book will be of much interest to students of naval history strategic studies intelligence studies Nordic studies and International Relations **Constructing Empire** Bill Sewell, 2019-02-15 Civilians play crucial roles in building empires Constructing Empire shows how Japanese urban planners architects and other civilians contributed often enthusiastically to constructing a modern colonial enclave in northeast China their visions shifting over time Japanese imperialism in Manchuria before 1932 developed in a manner similar to that of other imperialists elsewhere in China but the Japanese thereafter sought to surpass their rivals by transforming the city of Changchun into a grand capital for the puppet state of Manchukuo putting it on the cutting edge of Japanese propaganda Providing a thematic assessment of the evolving nature of planning architecture economy and society in Changchun Bill Sewell examines the key organizations involved in developing Japan's empire there as part of larger efforts to assert its place in the world order This engaging book sheds light on evolving attitudes toward empire and perceptions of national identity among Japanese in Manchuria in the first half of the twentieth century *Security Studies in a New Era of Maritime Competition* Jonathan D. Caverley, Peter Dombrowski, 2023-06-06 How do two conventionally powerful nuclear armed but commercially oriented great powers reliant on sea lanes and global maritime infrastructure engage in a long term strategic rivalry When do such competitions lead to crisis instability and even war This book presents a research agenda using a variety of methods to explore this unique competitive environment for China and the United States The most likely great power friction points today are located at sea Any shots fired between China and the United States will likely be between navies and air forces rather than armies While much security studies understandably concentrates on land forces basic concepts such as the importance of territory the offense defense balance technological competition economic warfare and crisis stability do not comfortably apply to maritime competition The chapters in this volume consider the use of naval power including blockades naval diplomacy fleet engagements and nuclear escalation across the spectrum of global politics and international conflict The volume encourages applying the many classic approaches of security studies to this high stakes relationship while considering maritime conflict as distinct from other forms such as land and nuclear that have traditionally occupied the field This work will be of great interest to students of strategic studies international relations maritime security and Asian American politics The chapters in this book were originally published as a special issue of Security Studies *By More Than Providence* Michael J. Green, 2017-03-21 Soon after the American Revolution certain of the founders began to

recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there Over the coming generations the United States continued to ask how best to expand trade with the region and whether to partner with China at the center of the continent or Japan looking toward the Pacific Where should the United States draw its defensive line and how should it export democratic principles In a history that spans the eighteenth century to the present Michael J Green follows the development of U S strategic thinking toward East Asia identifying recurring themes in American statecraft that reflect the nation s political philosophy and material realities Drawing on archives interviews and his own experience in the Pentagon and White House Green finds one overarching concern driving U S policy toward East Asia a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade values and forward defense By More Than Providence works through these problems from the perspective of history s major strategists and statesmen from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America s stakes in the region especially when compared with those of Europe and the Middle East

Creating an American Lake Hal M. Friedman, 2000-11-30 Many historians of U S foreign relations think of the post World War II period as a time when the United States as an anti colonial power advocated collective security through the United Nations and denounced territorial aggrandizement Yet between 1945 and 1947 the United States violated its wartime rhetoric and instead sought an imperial solution to its postwar security problems in East Asia by acquiring unilateral control of the western Pacific Islands and dominating influence throughout the entire Pacific Basin This detailed study examines American foreign policy from the beginning of the Truman Administration to the implementation of Containment in the summer and fall of 1947 As a case study of the Truman Administration s Early Cold War efforts it explores pre Containment policy in light of U S security concerns vis a vis the Pearl Harbor Syndrome The American pursuit of a secure Pacific Basin was inconsistent at the time with its foreign policy toward other areas of the world Thus the consolidation of power in this region was an exception to the avowed goal of a multilateral response to the policies of the Soviet Union This example of national or strategic security went much further than simple military control it included the cultural assimilation of the indigenous population and the unilateral exclusion of all other powers Analyzing traditional archival records in a new light Friedman also investigates the persisting American notions of a Westward moving frontier that stretches beyond North American territorial bounds

Friedman,2009 Hal M Friedman analyzes the major issues concerning the Pacific Basin that confronted the executive branch departments between 1945 and 1947 Charting America's Cold War Waters in East Asia Kuan-Jen Chen,2024-05-30 A comprehensive assessment of the contours of maritime East Asia and its importance on the world stage
