Handbook of Dutch Church History Herman J. Selderhuis,2014-12-10 Herman Selderhuis as editor of this volume has brought together a team of experts resulting in a unique approach since each chapter is co written by a catholic and a protestant author who have all integrated the latest research results Each section begins with a brief historiographical overview The same time ecclesiastical events are always set within a greater framework of political social and cultural developments for which reason each author has taken the liberty to describe its own method The user will find in this book tables diagrams and illustrations Also many source texts are integrated in the narration Theses texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words The name of the book as Handbook of the church history of the Netherlands immediately brings to mind three problematic complexes which are relevant to its user First there is the nature of a handbook that is intended to be a good tool but also has its limitations it stimulates and necessitates the use of further books Second the area The Netherlands is a plurality and that is also noticeable in its church history for each region town and village has its own church history Third the history of the church for sure is the most important aspect but this history can only be understood if it is described in the context of political and social developments

The Clash of Ideas in World Politics John M. Owen IV, 2010-07-19 Some blame the violence and unrest in the Muslim world on Islam itself arguing that the religion and its history is inherently bloody Others blame the United States arguing that American attempts to spread democracy by force have destabilized the region and that these efforts are somehow radical or unique Challenging these views The Clash of Ideas in World Politics reveals how the Muslim world is in the throes of an ideological struggle that extends far beyond the Middle East and how struggles like it have been a recurring feature of international relations since the dawn of the modern European state John Owen examines more than two hundred cases of forcible regime promotion over the past five centuries offering the first systematic study of this common state practice He looks at conflicts between Catholicism and Protestantism between 1520 and the 1680s republicanism and monarchy between 1770 and 1850 and communism fascism and liberal democracy from 1917 until the late 1980s He shows how regime promotion can follow regime unrest in the eventual target state or a war involving a great power and how this can provoke elites across states to polarize according to ideology Owen traces how conflicts arise and ultimately fade as one ideology wins favor with more elites in more countries and he demonstrates how the struggle between secularism and Islamism in Muslim countries today reflects broader transnational trends in world history
