Orthofix External Fixation In Trauma And Orthopaedics:

Orthofix External Fixation in Trauma and Orthopaedics Giovanni De Bastiani, Alan G. Apley, Anthony A.J.

Goldberg, 2012-12-06 *Orthofix External Fixation in Trauma and Orthopaedics* provides the scientific basis behind the success of the Orthofix system of external fixators which are now widely used throughout the world. These devices are used in the treatment of serious fractures, limb lengthening and limb reconstruction. This book covers comprehensively the wide range of scenarios in which such devices can be used. Each topic is dealt with by the appropriate international expert in the field. *Orthofix External Fixation in Trauma and Orthopaedics* should be read by all those involved in elective or traumatic

orthopaedics. **External Fixation in Orthopedic Traumatology** David Seligson, Cyril Mauffrey, Craig S.

Roberts, 2011-11-04 *External fixation in Orthopedic traumatology* is a textbook that focuses on the use of external fixation in the acute management of patients with serious orthopedic injuries. The book highlights the indications for external fixation and provides an evidenced-based guide to both the specialist orthopedic surgeon and the trainee. The manuscript is organised in 15 chapters covering the indications and surgical techniques for pelvis, lower limb and upper limb injuries, including detailed illustrations and clinical photographs that will enable the reader to rapidly visualise the structure of the construct and to plan the surgery accordingly. More general topics such as damage control orthopedics, the biomechanics of external fixation and medico-legal considerations surrounding the injured patients are also included to provide an overall picture of the Orthopedic trauma patient. The combined experience of the editors and authors, their involvement in a number of external fixation system designs and their international reputation in the field contribute to making this textbook an essential tool that should be available to all orthopedic surgeons dealing with injured patients.
