Adventures in Archaeology P.J. Capelotti, 2018-09-12 Remnants of the curious and peculiar ways humankind has marked the archaeological landscape are abundant but often ignored wrecked aircraft abandoned airfields old highway billboards derelict boats movie props and deserted mining operations In this book archaeologist P.J. Capelotti explores places and things that people do not typically think of as archaeological sites and artifacts introducing readers to the most extreme fieldwork taking place today Capelotti shows that even seemingly ordinary objects from the recent past hold secrets about the cultural history of humans He investigates the site where a stunt copy of the Orca the fishing boat used in the movie Jaws was stripped to pieces by fans a revelation of the ways humans relate to popular culture He takes readers to abandoned base camps near the North Pole that are now used as destinations for Arctic tourism Retelling the story of Thor Heyerdahl's research expedition across the Pacific Ocean on a balsa log raft Capelotti shows how experimental archaeology attempts to reveal cultural connections between continents And he doesn't stop at the limits of the planet He discusses debris floating through outer space and equipment left behind on the surface of the moon highlighting current efforts to preserve artifacts that exist beyond the Earth's atmosphere

These discarded materials says Capelotti help archaeologists piece together the sweeping story of human cultural expansion and exploitation He explains how the unusual sites of shorelines sea air and space represent the farthest reaches of human civilization His enthusiasm will inspire readers to set out on their own to investigate the secret meanings of treasures hiding in plain sight
