Roman Civilization Naphtali Lewis, Meyer Reinhold, 1990      **A History of the Laws of War: Volume 2** Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself      **Ancient Rome** Matthew Dillon, Lynda Garland, 2013-10-28 A companion volume to the highly successful and widely used Ancient Greece this Sourcebook is a valuable resource for students at all levels studying ancient Rome Lynda Garland and Matthew Dillon present an extensive range of material from the early Republic to the assassination of Julius Caesar Providing a comprehensive coverage of all important documents pertaining to the Roman Republic Ancient Rome includes source material on political developments in the Roman Republic 509 44 BC detailed chapters on social phenomena such as Roman religion slavery and freedmen women and the family and the public face of Rome clear precise translations of documents taken not only from historical sources but also from inscriptions laws and decrees epitaphs graffiti public speeches poetry private letters and drama concise up to date bibliographies and commentaries for each document and chapter a definitive collection of source material on the Roman Republic All students of ancient Rome and classical studies will find this textbook

In the Shadow of the Temple Oskar Skarsaune, 2025-08-04 Oskar Skarsaune makes a fresh contribution to our understanding of the development of the early church in its practice e g worship baptism and Eucharist and doctrine e g Scripture Christology pneumatology This book offers the new perspective that Christians were in ongoing and deep conversation with Jews during the early centuries leading up to Constantine The common perception of a drastic parting of the ways after the destruction of Jerusalem in 70 A D has tended to distort our understanding of the succeeding decades and centuries of Jewish and Christian history Notwithstanding the fact that there were points of bitterness and strife the relationship is better viewed as that of a younger and older sibling There is much evidence of interaction between the early Christians and rabbinic Judaism both at the level of leadership and laypeople and this left its impression on the church Skarsaune gives us numerous fascinating episodic and topical glimpses into this untold story

**Sources of The Making of the West, Volume I: To 1750**, 2012 Thoroughly revised and expanded this two volume primary source collection provides written and visual sources to accompany each chapter of The Making of the West and The Making of the West A Concise History Each chapter features five to six sources both classic and lesser known that reinforce the major political economic social and cultural developments covered in the textbook

**A History of the Laws of War: Volume 1** Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as

they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Populus Guy de la Bédoyère, 2024-04-24 Living in ancient Rome was one of the most intense experiences in human history It was also superbly and vividly recorded by Rome's historians and poets who were acutely aware of the seething and voluptuous nature of the city that ruled the known world Populus takes the reader on a compelling journey through the landscape of politics crime domestic life faith sex entertainment cuisine disease and inequality experienced daily by Roman people of all social strata Revealing what it meant to eke out an existence in servitude live in luxury in the imperial palaces enjoy a day at the races riot in the streets make do in a tenement block plot to assassinate an emperor worship any one of a multitude of gods witness an imperial triumph and commemorate the dead this powerful story of the people of ancient Rome is Guy de la Bédoyère's homage to a civilization that has fascinated him for half a century

**Sources for the History of Western Civilization** Michael Burger, 2024-05-01 Sources for the History of Western Civilization is a primary source reader designed specifically to allow undergraduate students to interact with historical documents Michael Burger provides only the editorial guidance that students truly require without unnecessary interventions The third edition gives special stress to certain genres including letters and biographical writings to facilitate comparisons across time Introductions to sources are brief encouraging students to make their own assessments and giving instructors the freedom to supplement where desired The third edition features substantive revisions

and additional coverage of key topics throughout as well as new material on the Crusades Jewish persecution and European expansion

**The Causes of War** Alexander Gillespie, 2013-10-16 This is the first volume of a projected four volume series charting the causes of war from 3000 BCE to the present day written by a leading international lawyer and using as its principal materials the documentary history of international law largely in the form of treaties and the negotiations which led up to them These volumes seek to show why millions of people over thousands of years slayed each other In departing from the various theories put forward by historians anthropologists and psychologists Gillespie offers a different taxonomy of the causes of war focusing on the broader settings of politics religion migrations and empire building These four contexts were dominant and often overlapping justifications for the first four thousand years of human civilisation for which written records exist

**A History of the Laws of War: Volume 3** Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a

story which throws fascinating new light on the history of international law and on the history of warfare itself Two Sides to the Coin Adam Wasserman, 2010 Traces the history of gold throughout the world from antiquity to the early twenty first century describing its value to humanity and discussing its usage in art jewelry palaces temples and tombs along with the role it has played in historic events
