Roman Frontier Studies Oxbow Monographs In Archaeology:

Archaeology in Confrontation Hugo Thoen, 2004 This collection of papers focuses on the Provincial Roman archaeology of Northern Gaul Germany and Britain **Roman Frontier Archaeology - in Britain and Beyond** Nick Hodgson, Bill Griffiths, 2022-11-25 Contributions by leading archaeologists and historians pay tribute to Paul Bidwell admired for his ground breaking work both in the south west and the military north of Roman Britain This collection will be essential reading for anyone with an interest in either the civil or military aspects of Roman Britain or the frontiers of the Roman empire

An Archaeology of Identity Andrew Gardner, 2016-09-16 What happened to Roman soldiers in Britain during the decline of the empire in the 4th and 5th centuries Did they withdraw defect or go native More than a question of military history this is the starting point for Andrew Gardner's incisive exploration of social identity in Roman Britain in the Roman Empire and in ancient society Drawing on the sociological theories of Anthony Giddens and others Gardner shapes an approach that focuses on the central role of practice in the creation and maintenance of identities nationalist gendered class and ethnic This theory is then tested against the material remains of Roman soldiers in Britain to show how patterning of stratigraphy architecture and artifacts supports his theoretical construct The result is a retelling of the story of late Roman Britain sharply at odds with the traditional text driven histories and a theory of human action that offers much to current debates across the social sciences Roman Frontier Studies 2009 Nick Hodgson, Paul Bidwell, Judith Schachtmann, 2017-06-30 Proceedings of the 21st International Congress of Roman Frontier Studies LIMES XXI hosted by Tyne Wear Archives Museums Newcastle upon Tyne UK in August 2009 *Blood of the Provinces* Ian Haynes, 2013-10-03 This is the first fully comprehensive study of the auxilia a non citizen force which constituted more than half of Rome's celebrated armies Diverse in origins character and culture they played an essential role in building the empire sustaining the unequal peace celebrated as the pax Romana and enacting the emperor's writ **The Oxford Handbook of Roman Britain** Martin Millett, Louise Revell, Alison Moore, 2016-09-01 This book provides a twenty first century perspective on Roman Britain combining current approaches with the wealth of archaeological material from the province This volume introduces the history of research into the province and the cultural changes at the beginning and end of the Roman period The majority of the chapters are thematic dealing with issues relating to the people of the province their identities and ways of life Further chapters consider the characteristics of the province they lived in such as the economy and settlement patterns This Handbook reflects the new approaches being developed in Roman archaeology and demonstrates why the study of Roman Britain has become one of the most dynamic areas of archaeology The book will be useful for academics and students interested in Roman Britain **The Archaeology of the Early Islamic Settlement in Palestine** Jodi Magness, 2003 CD ROM consists of Interactive site map **People and Spaces in Roman Military Bases** Penelope M. Allison, 2013-10-31 This study uses artefact distribution analyses to investigate the activities that took place inside early

Roman imperial military bases Focusing especially on non combat activities it explores the lives of families and other support personnel who are widely assumed to have inhabited civilian settlements outside the fortification walls Spatial analyses in GIS type environments are used to develop fresh perspectives on the range of people who lived within the walls of these military establishments the various industrial commercial domestic and leisure activities in which they and combat personnel were involved and the socio spatial organisation of these activities and these establishments The book includes examples of both legionary fortresses and auxiliary forts from the German provinces to demonstrate that more material cultural approaches to the artefact assemblages from these sites give greater insights into how these military communities operated and demonstrate the problems of ascribing functions to buildings without investigating the full material record

International Congress of Roman Frontier Studies 20 Ángel Morillo Cerdán, Norbert Hanel, Esperanza Martín, 2009 This massive three volume set publishes the proceedings of the 2006 Limes conference which was held in Leon a total of 138 contributions Naturally these cover a vast range of topics related to Roman military archaeology and the Roman frontiers The archaeology of the Roman military in Spain and contributions by Spanish scholars are prominent whilst other themes include the internal frontiers the end of the frontiers and the barbarians in the empire the fortified town in the late Roman period soldiers on the move and the early development of frontiers Further sessions had a regional focus Majority of essays in English some in Spanish German and Italian *Archaeology and Ancient History* Eberhard W. Sauer, 2004-07-31 Challenging both traditional and fashionable theories this collection of pieces from an international range of contributors explores the separation of the human past into history archaeology and their related sub disciplines Each case study challenges the validity of this separation and asks how we can move to a more holistic approach in the study of the relationship between history and archaeology While the focus is on the ancient world particularly Greece and Rome the lessons learned in this book make it an essential addition to all studies of history and archaeology **Armed Batavians** Johan Nicolay, 2007 Using a life cycle model for Roman soldiers Johan Nicolay interprets the large quantity of first century finds as personal memorabilia brought home by ex soldiers as a reminder of their twenty five years of service and a symbol of their newly acquired veteran status Underpinning Nicolay's research is an extensive inventory of militaria from urban centers rural settlements rivers and graves presented in nearly one hundred individual color plates Introducing a considerable body of unpublished data as well as offering a perspective on daily life in the northern frontier of the Roman Empire this volume is a valuable addition to Roman military and material history *Archaeology and Ancient History* Jordan. Dā'irat al-Āthār al-Āmmah, 2003 *London in the Roman World* Dominic Perring, 2022-01-27 inc An original authoritative survey of the archaeology and history of Roman London London in the Roman World draws on the results of latest archaeological discoveries to describe London's Roman origins It presents a wealth of new information from one of the world's richest and most intensively studied archaeological sites and a host of original ideas concerning its economic and political

history This original study follows a narrative approach setting archaeological data firmly within its historical context London was perhaps converted from a fort built at the time of the Roman conquest where the emperor Claudius arrived to celebrate his victory in AD 43 to become the commanding city from which Rome supported its military occupation of Britain London grew to support Rome's campaigning forces and the book makes a close study of the political and economic consequences of London's role as a supply base Rapid growth generated a new urban landscape and this study provides a comprehensive guide to the industry and architecture of the city The story traced from new archaeological research shows how the city was twice destroyed in war and suffered more lastingly from plagues of the second and third centuries These events had a critical bearing on the reforms of late antiquity from which London emerged as a defended administrative enclave only to be deserted when Rome failed to maintain political control This ground breaking study brings new information and arguments to our study of the way in which Rome ruled and how the empire failed Kingdom, Civitas, and County Stephen

Rippon,2018-04-19 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English reconquest and replaced with the counties with which we are familiar today

Challenging Preconceptions of the European Iron Age Wendy Morrison,2022-06-20 This collection of essays by leading researchers in the archaeology of the European Iron Age pays tribute to Professor John Collis who since the 1960s has been involved in investigating and enriching our understanding of Iron Age society and crucially questioning the status quo of our narratives about the past **The City by the Pool** Michael J. Jones,D. A. Stocker,A. G. Vince,2003 CD Rom in rear pocket Londinium: A Biography Richard Hingley,2018-08-23 Winner of the PROSE Award 2019 for Classics This

major new work on Roman London brings together the many new discoveries of the last generation and provides a detailed overview of the city from before its foundation in the first century to the fifth century AD Richard Hingley explores the archaeological and historical evidence for London under the Romans assessing the city in the context of its province and the wider empire He explores the multiple functions of Londinium over time considering economy industry trade status and urban infrastructure but also looking at how power status gender and identity are reflected through the materiality of the terrain and waterscape of the evolving city A particular focus of the book is the ritual and religious context in which these activities occurred Hingley looks at how places within the developing urban landscape were inherited and considers how the history and meanings of Londinium built upon earlier associations from its recent and ancient past As well as drawing together a much needed synthesis of recent scholarship and material evidence Hingley offers new perspectives that will inspire future debate and research for years to come This volume not only provides an accessible introduction for undergraduate students and anyone interested in the ancient city of London but also an essential account for more advanced students and scholars

Performing the Sacra: Priestly roles and their organisation in Roman Britain Alessandra Esposito, 2019-02-15 This book addresses a range of cultural responses to the Roman conquest of Britain with regard to priestly roles The approach is based on current theoretical trends focussing on dynamics of adaptation multiculturalism and appropriation and discarding a sharp distinction between local and Roman cults

A Study of the Deposition and Distribution of Copper Alloy Vessels in Roman Britain Jason Lundock, 2015-08-31 This book collects together data concerning copper alloy vessels from Roman Britain and relates this evidence to prevailing theories of consumption identity and culture change in Britain during this time

The Roman Lower Danube Frontier Emily Hanscam, John Karavas, 2023-11-16 Over the past few decades there has been a significant amount of research on the Roman Lower Danube frontier by international teams focusing on individual forts or broader landscape survey work collectively this volume represents the best of this collaboration with the aim of elevating the Lower Danube within broader Roman frontier scholarship
