Ideology and Foreign Policy in Early Modern Europe (1650-1750) Gijs

Rommelse, Dr David Onnekink, 2013-07-28 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism materialism and power political nature of international relations In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political scientists and international relations theorists As such it offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe s development **Antiquarianism and Intellectual Life in Europe and China,**

1500-1800 Peter N. Miller, Francois Louis, 2012-06-13 This book is a project in comparative history but along two distinct axes one historical and the other historiographical Its purpose is to constructively juxtapose the early modern European and Chinese approaches to historical study that have been called antiquarian As an exercise in historical recovery the essays in this volume amass new information about the range of antiquarian type scholarship on the past on nature and on peoples undertaken at either end of the Eurasian landmass between 1500 and 1800 As a historiographical project the book challenges the received and often very much under conceptualized use of the term antiquarian in both European and Chinese contexts Readers will not only learn more about the range of European and Chinese scholarship on the past and especially the material past but they will also be able to integrate some of the historiographical observations and corrections into new ways of conceiving of the history of historical scholarship in Europe since the Renaissance and to reflect on the impact of these European terms on Chinese approaches to the Chinese past This comparison is a two way street with the European tradition clarified by knowledge of Chinese practices and Chinese approaches better understood when placed alongside the European ones *A global history of early modern violence* Erica Charters, Marie Houllemare, Peter H. Wilson, 2021-01-26

This electronic version has been made available under a Creative Commons BY NC ND open access license This is the first extensive analysis of large scale violence and the methods of its restraint in the early modern world Using examples from Asia Africa the Americas and Europe it questions the established narrative that violence was only curbed through the rise of western style nation states and civil societies Global history allows us to reframe and challenge traditional models for the history of violence and to rethink categories and units of analysis through comparisons By decentring Europe and exploring alternative patterns of violence the contributors to this volume articulate the significance of violence in narratives of state and empire building as well as in their failure and decline while also providing new means of tracing the transition from the early modern to modernity

Redefining William III David Onnekink, Esther Mijers, 2016-04-08 William III 1650 1702 was Stadholder in the United Provinces and King of England Scotland and Ireland His reign has always intrigued historians as it encompassed such defining events as the Dutch year of Disaster 1672 the Glorious Revolution 1688 and the ensuing wars against France Although William has played a pivotal role in the political and religious history of his countries the significance and international impact of his reign is still not very well understood This volume contains a number of innovative essays from specialists in the field which have evolved from papers delivered to an international conference held at the University of Utrecht in December 2002 By focusing on the entire period 1650 1702 from an international perspective the volume moves historical discussion away from the traditional analysis of single events to encompass William's entire reign from a variety of political religious intellectual and cultural positions In so doing it offers a new perspective on the British and Dutch reigns of William III as well as the wider European milieu

Defending Judaism David H. Price, 2025-10-07 Defending Judaism Jewish Writing and Religious Toleration in Early Modern Europe explores the decisive contributions of Jewish writers to the expansion of religious toleration during the period 1600-1789 A key breakthrough for this development was the emergence of charismatic Jewish scholars who galvanized Christian audiences garnering sufficiently broad recognition as trusted authorities that they were able to improve public perceptions of Judaism and in some cases motivate liberalization of governmental policies They were Jewish experts whom Christians judged worthy of cultivating and whose writings became central elements in the larger Christian discourse on Judaism and toleration Educated Christians not only listened to these Jewish voices but also began to amplify their perspectives The resulting harmony audible in a new collaborative Christian Jewish discourse had a significant impact on the expansion of religious toleration The book describes how successful Jewish writers from Leon Modena to Moses Mendelssohn wrote works addressed to Gentile readers to foster new understandings of the integrity of Judaism and the value of religious toleration This study underscores the pivotal contributions of Jewish and Christian thinkers working in dialogue with one another to counter antisemitic stereotypes through rational defenses of Judaism These interactions despite challenges advanced cultural appreciation and modern perceptions of Judaism as a

religion of reason tolerance and ethical universalism supporting the trajectory of Jewish emancipation in Europe

Selling and Rejecting Politics in Early Modern Europe Martin Gosman, Joop W. Koopmans, 2007 Power in the early modern age as in the present age is an important subject for debate What is power Who has it or should have it What are the underlying reasons for this And especially how is this power exercised legitimised and accepted The issue of power in Europe in the early modern age is all the more significant because the demarcation line between the worldly and the religious component of power is not always clearly drawn The fact is that power can only exist in a structured context where there is a measure of approval and consensus on the way that power is constituted and exercised It is actually about the relationship between those who have or crave power and those who find themselves in subordinate positions Many means of persuasion are deployed in propaganda mechanisms to underscore the rightness or superiority of this relationship The reverse side of this phenomenon is equally important the extent to which criticism is being voiced and other opinions are being proclaimed is at least as relevant to an evaluation of the relationship between both groups i e rulers and subordinates In societies where pomp and circumstance bear the brunt of the persuasive process since not everyone can read or write visual elements are crucial painting sculpture architecture urban planning court parties and ceremonies play a major role as do all the products issued by the printing presses tracts and pamphlets illustrated or unillustrated The essays in this volume deal not so much with theories of power but rather with the ways that rulers attempt to motivate the legitimation of their power and convey their own superiority be it genuine or spurious They focus on the persuasive production emanating from governments as well as on the reactions of other parties which show both confirmative and contesting tendencies

Louis XIV Outside In Tony Claydon, Charles-Édouard Levillain, 2016-04-22 Louis XIV the Sun King casts a long shadow over the history of seventeenth and eighteenth century Europe Yet while he has been

the subject of numerous works much of the scholarship remains firmly rooted within national frameworks and traditions Thus in France Louis is still chiefly remembered for the splendid baroque culture his reign ushered in and his political achievements in wielding together a strong centralised French state whereas in England the Netherlands and other protestant states his memory is that of an aggressive military tyrant and persecutor of non Catholics In order to try to break free of such parochial strictures this volume builds upon the approach of scholars such as Ragnhild Hatton who have attempted to situate Louis legacy within broader pan European context But where Hatton focused primarily on geo political themes Louis XIV Outside In introduces current interests in cultural history integrating aspects of artistic literary and musical themes In particular it examines the formulation and use of images of Louis XIV abroad concentrating on Louis neighbours in north west Europe This broad geographical coverage demonstrates how images of Louis XIV were moulded by the polemical needs of people far from Versailles and distorted from any French originals by the particular political and cultural circumstances of diverse nations Because the French regime s ability to control the public image of its leader was very limited the collection highlights how at least in the sphere of public presentation his power was frequently denied subverted or appropriated to very different purposes questioning the limits of his absolutism which has also been such a feature of recent work

Graphic History Philip Benedict, 2007 The suite of forty prints published in Geneva in 1570 depicting the wars massacres and troubles of the French Wars of Religion may have been the first picture history made in woodcuts or etchings that promised a general public a true view of great events of the recent past This richly illustrated study reconstructs the gradual elaboration of this experimental work situating it within the previously untold story of the use of the graphic arts to report the news in the first centuries of European printmaking Successive chapters explore the pictorial traditions that inspired the printmakers examine how they gathered their information assess the reliability of the scenes and analyze the historical vision informing the series Part 2 reproduces the full suite with commentary in double page fold outs Through the study of a single print series lost chapters in the history of journalism of the graphic arts and of Protestant historical consciousness re emerge
