World Agriculture: Towards 2015/2030 Jelle Bruinsma, 2017-09-25 This report is FAO's latest assessment of the long term outlook for the world's food supplies nutrition and agriculture It presents the projections and the main messages The projections cover supply and demand for the major agricultural commodities and sectors including fisheries and forestry This analysis forms the basis for a more detailed examination of other factors such as nutrition and undernourishment and the

implications for international trade The report also investigates the implications of future supply and demand for the natural resource base and discusses how technology can contribute to more sustainable development One of the report's main findings is that if no corrective action is taken the target set by the World Food Summit in 1996 that of halving the number of undernourished people by 2015 is not going to be met Nothing short of a massive effort at improving the overall development performance will free the developing world of its most pressing food insecurity problems The progress made towards this target depends on many factors not least of which are political will and the mobilization of additional resources Past experience underlines the crucial role of agriculture in the development process particularly where the majority of the population still depends on this sector for employment and income

Benefits and Potential Risks of the Lactoperoxidase System of Raw Milk Preservation Food and Agriculture Organization of the United Nations, World Health Organization, 2006-01-01 This technical meeting was jointly organised by the Animal Production and the Food Quality and Standards Services of the FAO of the United Nations in cooperation with the Department of Food Safety Zoonoses and Foodborne Disease WHO to obtain the best available scientific advice on issues related to the use of the lactoperoxidase system LP's in raw milk preservation After reviewing the available scientific information References Appendix A and B the technical meeting concluded that the LP's is a safe method of preventing milk losses due to microbial spoilage when used according to the Codex guidelines either alone or in combination with other approved procedures The LP's is particularly suitable for application in situations where technical economical and or practical reasons do not allow the use of cooling facilities for maintaining the quality of raw milk Use of the LP's does not preclude or replace the need for the pasteurization of raw milk to improve safety for human consumption

Antioxidants in Vegetables and Nuts - Properties and Health Benefits Gulzar Ahmad Nayik, Amir Gull, 2020-12-01. This book covers the nutritional and nutraceutical profiles of a wide range of popularly consumed vegetables and nuts. The first half of the book focuses on popular vegetables and describes how higher vegetable consumption reduces the risk of diseases ranging from diabetes to osteoporosis, diseases of the gastrointestinal tract, cardiovascular diseases, autoimmune diseases and cancer. The book also includes an interesting section on the antioxidant potential of mushrooms. In turn, the second half discusses the nutritional value of various nuts. Nuts are nutrient dense foods with complex matrices rich in unsaturated fats, high quality protein, fiber, minerals, tocopherols, phytosterols and phenolics. The respective chapters illustrate how the consumption of nuts could ward off chronic diseases like hypertension, cancer, inflammation, oxidative stress, high blood pressure, coronary heart disease, etc. In order to effectively promote vegetable and nut consumption, it is necessary to know and understand the nutritional and nutraceutical profiles of vegetables and nuts. Given its scope, the book will be of interest to students, researchers, food scientists, olericulturists, dietitians and agricultural scientists alike. Those working in the vegetable and nut processing industries, horticultural departments and other agricultural departments will also find the comprehensive information relevant to their work.

Food habits and consumption in developing countries Adel P. den Hartog, Wija A. van Staveren, Inge D.

Brouwer,2023-09-04 During the last decade the food and nutrition situation in developing countries has changed dramatically For better or worse urbanization and globalization have altered the diet and nutrition in both rural and urban areas In many developing countries a persistent level of under nutrition exists both in rural areas and in urban slums due to less access to food needed for an active and healthy life On the other hand over nutrition or eating too much has emerged among the middle income groups It is essential to have a better understanding of how people deal with their food in developing countries in order to plan and implement food and nutrition programmes This manual deals with the process of changing food habits and consumption patterns in developing countries Nutritional implications together with practical information is discussed in relationship to conducting field surveys Part one of the manual provides insight into the dynamics of food habits and consumption and its socio economic and cultural dimensions Part two gives practical information on small scale surveys to be carried out within the framework of a nutrition issue including data collecting on food habits and the measurement of food intake This manual addresses professionals with practical or academic training and those who are involved in various types of food and nutrition programmes or related activities It can also be used as a handbook in food and nutrition training courses at higher and at academic level *African Technology Forum* ,1993 **Wild Edible**
