Rose Of Consciousness:

East-West Studies on the Problem of the Self Poola Tirupati Raju, 2012-12-06 The general characteristics of the decades after the last World War so far as the human situation goes include two phenomena these decades are marked by man's dissatisfaction with himself his confession of ignorance of himself his anxiety about his future and also his earnest search for the ground of his being which can give him a feeling of security with reference to his life here and hereafter they are also marked by man's pride about his achievements in science and technology a hope of a better life on earth and a faith in himself as capable of engineering the individual and society for realizing peace harmony and happiness for all men The contemporary thinking man is conscious of the predicament these two kinds of characteristics have created for him admits failures hopes for improvements and works for them In carrying out this work he has to and wants to know what human life is what the meaning and purpose of life are and why his struggles and achievements have not succeeded in giving every man a reasonable amount of comfort and happiness He has come to realize also that the accumulation of material comforts does not necessarily lead to happiness although happiness for man except for the monk fakir or sannyasi is not possible without material comforts Here we have the problem *Consciousness and Intentionality: Models and Modalities of Attribution* D. Fisette, 2013-03-14 Philosophy of mind has been one of the most active fields in philosophy for the past three decades One of the most significant factors in the development of this discipline has been the emergence of cognitive science and the interest philosophers have taken in the empirical study of mind Another equally important factor has been the naturalism brought about by W V Quine His proposal that normative epistemology be replaced by empirical psychology marked a radical departure from the Fregean anti-psychologism and apriorism that had characterized much of the analytic tradition in philosophy But while Quine's program of naturalization called the attention of philosophers to empirical psychology his conception of psychology was inspired by an austere behaviorism which shunned the mentalism of intentional psychology in the Brentanian and phenomenological tradition Thus while agreeing with Brentano that the intentional idiom could not be reduced to that of the natural sciences Quine argued that it is of a piece with the indeterminacy of translation Most contributors of this collection share the cognitivist stance and believe that the mind needs to be explained rather than eliminated Three main questions are actually confronting current philosophers of mind each addressed by one or another of the contributors to the present collection **Consciousness** Jeffrey Alan Gray, 2004 How does consciousness arise out of the functioning of the human brain This work presents an analysis of our conscious lives with profound implications for human nature Brentano's Mind Mark Textor, 2017-08-11 Mark Textor presents a critical study of the work of Franz Brentano one of the most important thinkers of the nineteenth century His work has influenced analytic philosophers like Russell as well as phenomenologists like Husserl and Sartre and continues to shape debates in the philosophy of mind Brentano made intentionality a central topic in the philosophy of mind by proposing that directedness is the distinctive

feature of the mental The first part of the book investigates Brentano's intentionalism as well as attempts to improve or develop it Textor argues that there is no plausible version of this doctrine and rejects it in favour of a mark of the mental proposed by Brentano's student Husserl mental phenomena have no appearances The second part of the book develops and defends Brentano's view about the structure of perceptual awareness Awareness of a mental activity and this mental activity are not distinct mental acts the first representing the second They are one and the same activity that has several objects Textor shows that Brentano held that intentionality is plural directedness is directedness on some objects and shows how the plural conception solves thorny problems The third part of the book is devoted to Brentano's view of pleasure and pain Textor draws out parallels between enjoying an activity and awareness of it and argues that enjoying an activity and the activity enjoyed are not distinct The final part of the book extends the plural view to the conscious mental life of a thinker at a time the unity of synchronic consciousness it is one mental act with many objects

The Constitution of Phenomenal Consciousness Steven M. Miller, 2015-06-15 Philosophers of mind have been arguing for decades about the nature of phenomenal consciousness and the relation between brain and mind More recently neuroscientists and philosophers of science have entered the discussion Which neural activities in the brain constitute phenomenal consciousness and how could science distinguish the neural correlates of consciousness from its neural constitution At what level of neural activity is consciousness constituted in the brain and what might be learned from well studied phenomena like binocular rivalry attention memory affect pain dreams and coma What should the science of consciousness want to know and what should explanation look like in this field How should the constitution relation be applied to brain and mind and are other relations like identity supervenience realization emergence and causation preferable

Building on a companion volume on the constitution of visual consciousness AiCR 90 this volume addresses these questions and related empirical and conceptual territory It brings together for the first time scientists and philosophers to discuss this engaging interdisciplinary topic

Structural Depths of Indian Thought P. T. Raju,1985-01-01 No other work treating Indian philosophy on a comparable scale contains the illuminating comparisons between doctrines of Indian schools and the thought of Western philosophy ranging from Plato to Sartre and Wittgenstein It will moreover contribute to the understanding of Western philosophy by Indian thinkers and vice versa Raju has an intimate acquaintance with a remarkable range of Western thinkers and this distinguishes his work from most of what has gone before Raju moreover is himself a critical thinker and consequently although he has written a history he treats the ideas and doctrines in a philosophical mode and his assessments of positions are often original and illuminating John E Smith Clark Professor of Philosophy Yale University Purpose To deal with Indian philosophy in a fashion reflecting the way the best German historians of philosophy deal with Western philosophy The book is remarkable for its comprehensiveness in combination with extensive critical discussions Raju s book is more critical than Radhakrishnan s and more philosophical than Dasgupta s Radhakrishnan s comments are far less philosophically sophisticated and interesting than Raju s a monument to a senior Indian philosopher s lifelong study and thoughtful critical consideration of the great classical systems of his tradition Karl H Potter Professor of Philosophy University of Washington Raju s credentials are impeccable He is one of the few scholars in the world who could presume to write a major work on Indian thought Accordingly his knowledge of the Indian schools is accurate and impressive To the extent that one of his intentions is to cast those schools in terms which make them more intelligible to western readers his work measures up very well Harold H Oliver Professor of Philosophy Boston University

Jane Austen and the Buddha Kathryn Duncan,2021-11-23 Jane Austen wrote six books that were published at the beginning of the 19th century all with happy endings Yet below the courtship novels sparkling wit and dance scenes flows an undercurrent of suffering Austen had a deep understanding of the sources and cure for suffering that shares much in common with Buddhism Though not intentionally writing through the lens of Buddhism Austen intuitively understood the Buddha s most fundamental teaching of the Four Noble Truths that life contains suffering that we can discover the causes of suffering and that we can stop suffering by following the Eightfold Path described by the Buddha In this book Austen fans or those who wish for a deeper understanding of how stories can alleviate suffering will discover a combination of psychology and Buddhism alongside accessible close

Moments of Disruption Kris Sealey, 2013-12-01 Explores the ethical and political implications of Levinas's and Sartre's accounts of human existence In *Moments of Disruption* Kris Sealey considers Emmanuel Levinas and Jean Paul Sartre together to fully realize the ethical and political implications of their similar descriptions of human existence Focusing on points of contact and difference between their writings on transcendence identity existence and alterity Sealey presents not only an understanding of Sartrean politics in which Levinas's somewhat apolitical program might be taken into the political but also an explicitly political reading of Levinas that resonates well with Sartre's work In bringing together both thinkers accounts of disrupted existence in this way a theoretical place is found from which to question the claim that politics and ethics are mutually exclusive

Critical Neuroscience Suparna Choudhury, Jan Slaby, 2016-08-08 *Critical Neuroscience* A Handbook of the Social and Cultural Contexts of Neuroscience brings together multi disciplinary scholars from around the world to explore key social historical and philosophical studies of neuroscience and to analyze the socio cultural implications of recent advances in the field This text's original interdisciplinary approach explores the creative potential for engaging experimental neuroscience with social studies of neuroscience while furthering the dialogue between neuroscience and the disciplines of the social sciences and humanities *Critical Neuroscience* transcends traditional skepticism introducing novel ideas about how to be critical in and about science

The Philosophical Traditions of India P T Raju, 2013-05-13 This volume conveys that Indian philosophy has intricate and complex metaphysical and epistemological theories as other philosophies and that these disciplines epistemology and metaphysics are an essential part of Indian philosophy

A New Look at New Realism Eric P. Charles, 2011-12-31 This volume brings to the attention of contemporary readers a tradition of psychological thought that has received little attention over the last century Psychology's history has been unimaginatively presented as a fight between behaviorists and mentalists A third alternative the New Realism which cuts through that dichotomy has been lost The New Realism was indeed once new This volume provides a glimpse of how this school of thought attempted to redefine the notion of mental processes including consciousness in psychological theorizing Holt's rejected the nativity of iconoclastic Watsonian behaviorists and thus the New Realism was thoughtful in ways that behaviorist social engineering was not The implications of these innovations in psychological theorizing are traced from the beginning of the twentieth century to the contemporary period The contributors provide these intellectual links along with efforts to look at the relatedness of the human organism and its world At their beginning these ideas are embedded in a reverence for William James's work particularly his later Radical Empiricism In contemporary psychology this legacy has given us the framework of ecological psychology as we know it today and provides the basis for several modern critiques of cognitive psychology The present volume opens the door for future historical inquiries This is an exemplary addition to the series on the History of Psychological Ideas
