Maxwell,Martha Smith-Blackmore,2023-07-18 Animal abuse is well established as a gateway crime linked to other forms of antisocial behaviors and broader criminal violence Increased awareness of the link between animal abuse and criminal behavior has led

many states to mandate cross reporting between agencies overseeing the welfare of families and of animals Investigating Animal Abuse Crime Scenes A Field Guide is designed for first responders such as animal control officers and police officers as well as forensic scientists and other criminal justice professionals who are tasked with processing and analyzing animal crime scenes and evidence The book serves equally as a useful resource for those in the field and laboratory in addition to those professionals who are further along in the investigative and judicial process The book addresses the key areas that must be considered in a thorough investigation of an animal abuse crime This starts with general crime scene procedures that include securing and releasing the scene search and seizure issues chain of custody documentation searching for evidence and the use of enhancement technologies While many readers may already be familiar with such concepts they are addressed in the context of unique factors relating to animals and animal abuse cases The book then addresses the recognition collection and preservation of different types of evidence that may be located at animal abuse scenes with examples of the most important evidence for specific case types The critical role of the veterinarian and the key aspects of veterinary forensic medicine receives in depth consideration This includes issues such as examining animal victims of crime determining cause of injury or death through the forensic clinical exam or necropsy and techniques for evidence documentation collection and preservation The physical and emotional abuse of animals is outlined throughout a series of chapters focused on specific types of animal abuse Finally report writing and testimony from the perspectives of both the crime scene investigator and forensic veterinarian are addressed Further three appendices provide useful checklists and templates for all animal abuse crime scene responders and veterinarians Investigating Animal Abuse Crime Scenes fills the growing need for a handy comprehensive field reference that specifically focuses on the crime scene processing investigation analysis of evidence and the subsequent adjudication of animal abuse cases within the court system

Shooting (Trajectory) Reconstruction Workbook N. Leroy Parker, 2013-01-08 This workbook is designed to assist the Crime Scene Analyst Technician or Investigator in documenting any bullet holes and or indentations that may be present at the crime scene This documentation could be accomplished with overall midrange and close up photographs rough sketches with the required measurement and notes The workbook is also designed to assist the Crime Scene Analyst Technician or Investigator in understanding the different ways of determining a The upward inclined or downward sloped bullet impact angles to the horizontal plane and the horizontal bullet impact angles to the left or right when facing the surface with the bullet hole that would be needed to reconstruct the shooting incident b The approximate location s of the muzzle of the gun at the time of the shooting The determined or calculated bullet impact angle s to the horizontal plane could be used by the Crime Scene Analyst Technician or Investigator to determine the horizontal distance s below the path of the bullet and the distance s the bullet s traveled from the muzzle of the gun to the hole s in the victim or object These distances could then be used to determine calculate the location of the shooter for any known or assumed muzzle height s based on the orientation of the

shooter Also having the horizontal bullet impact angle the Crime Scene Analyst Technician or Investigator could determine the perpendicular horizontal distance s from the muzzle of the gun to the surface with the bullet hole s and or indentation s A trajectory or shooting reconstruction could be accomplished by the utilization of one or more of the following methods The emphasis of this workbook would be on the reconstruction of crime scene shooting incidents utilizing these methods Strings and dowels rods Scaled drawings Calculations using the trigonometric ratios Computers programs The workbook would also provide the Crime Scene Analyst Technician or Investigator with an opportunity to reconstruct and review fifteen real cases More emphasis was placed on solution of these cases which are located in the back of the book by calculations using the trigonometric ratios and the Pythagorean Theorem since this method could be utilized to verify the accuracy of the other methods Potentially very valuable investigative information could be developed through a trajectory or shooting reconstruction of the crime scene that would assist the Analyst Technician or Investigator when interviewing a subject to determine if he or she is truthful in the sequence of events or the manner in which the incident took place Specific information may be logically inferred if the Crime Scene Analyst Technician or Investigator is knowledgeable about trajectory or shooting reconstruction
