William James, Moral Philosophy, and the Ethical Life Jacob L. Dialectics of the Concrete K. Kosik,2012-12-06 Kosik writes that the history of a text is in a certain sense the history of its interpretations In the fifteen years that have passed since the fust Czech edition of

his *Dialectics of the Concrete* this book has been widely read and interpreted throughout Europe in diverse centers of scholarship as well as in private studies A faithful English language edition is long overdue This publication of Kosik's work will surely provoke a range of new interpretations For its theme is the characterization of science and of rationality in the context of the social roots of science and the social critique which an appropriately rational science should afford Kosik's question is How shall Karl Marx's understanding of science itself be understood And how can it be further developed In his treatment of the question of scientific rationality Kosik drives bluntly into the issues of gravest human concern not the least of which is how to avoid the pseudo concrete the pseudo scientific the pseudo rational the pseudo historical Starting with Marx's methodological approach of ascending from the abstract to the concrete Kosik develops a critique of positivism of phenomenalist empiricism and of metaphysical rationalism counter posing them to dialectical rationalism He takes the category of the concrete in the dialectical sense of that which comes to be known by the active transformation of nature and society by human purposive activity

Emerging Civil Society in China, 1978-2008 Ming Wang, 2011-01-07 *Emerging Civil Society in China 1978 2008* is translated from the original Chinese to provide a look into how scholars in China have been assessing the development of civil organizations and analyzing them based on system reforms the public sphere and collective action This volume and the others in the SSRC series provide western scholars with an accessible English language look at the state of current scholarship in China and as such does not simply provide information for the direct study of socio political issues but also for meta level analysis of how the domestic scholarship in China is developing and assessing the interplay of the country

s political and economic reforms with the society and daily life of its people *The Outlook* Lyman Abbott, Hamilton Wright Mabie, Ernest Hamlin Abbott, Francis Rufus Bellamy, 1904 *Values in Higher Education Teaching* Tony Harland, Neil Pickering, 2010-10-18 *Values in Higher Education Teaching* explores the way in which teaching research learning and higher education are a values enterprise and that an exploration of values is necessary to work out the full purposes of a higher education to guide practices and help academics understand academic work Values inform thinking and actions and although this is well recognized values are seldom brought to the forefront of inquiries as practices in higher education are developed This book argues that by putting values firmly on the agenda of those who teach work and learn in higher education the academic profession can open up new spaces for value conversations and potentially transform the way in which they practice Values in Higher Education Teaching is key reading for university lecturers those with responsibility for leadership and management of higher education and postgraduates studying for higher degrees in higher education There are few books that directly address the broad and complex question of values in teaching in higher education yet at the same time values are widely recognised as permeating all our practices In this sense an accepted part of academic life remains in the realm of taken for granted rather than being consciously and explicitly explored and practiced The book deals with the idea of values in both a philosophical and practical manner It is based on original research and uses both empirical data and theory to address teaching values in higher education and the current values of the higher education system It explores what academics have valued historically in teaching and also addresses the major reforms of the last 20 years Reforms have essentially changed the nature of western higher education but have made little real difference to the outcomes for student learning and society whereas teaching with values in all subjects has the potential to radically alter student experiences
