Building Walls and Dissolving Borders Max O. Stephenson,2016-05-23 Walls play multiple social political economic and cultural roles and are linked to the fundamental question of how human beings live together Globalization and urbanization have created high population density rapid migration growing poverty income inequality and frequent discontent and conflict among heterogeneous populations The writers in this volume explore how walls are changing in this era when social containers have become porous proximity has been redefined circulation has intensified and the state as a way of organizing political life is being questioned The authors analyze how walls articulate with other social boundaries to address feelings of vulnerability and anxiety and how they embody governmental processes public and social contestation fears and notions of identity and alterity This book s authors explore walls as the consequence of a changing web of social relationships Whether walls are

physical objects on the landscape or metaphors for difference among specific groups or communities the writers consider them as heterotopias powerful sites around which ways of living together are contested and transformed They also investigate how architectural planning concerning walls may de facto become a means of waging war as well as how demolishing walls may give way to new ways of imagining security

but partly uncomfortable with it drawing on the powerful discourse of cooperation and trying to escape from it Their practices can also inform the practices of border studies

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state's territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how **Placing the Border in Everyday Life** complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization

Citizens and borderwork in contemporary Europe Chris Rumford, 2013-10-31 The extent to which ordinary people can construct shift and dismantle borders is seriously neglected in the existing literature The book explores the ability of citizens to participate in the making of borders and the empowerment that can result from this bordering and debordering activity Borderwork is the name given to the ways in which ordinary people can make and unmake borders Borderwork is no longer only the business of nation states it is also the business of citizens and indeed non citizens This study of borderwork extends the recent interest in forms of bordering which do not necessarily occur at the state's external borders However the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity To date little research has been conducted on the role of ordinary people in envisioning constructing maintaining shifting and erasing borders creating borders which facilitate mobility for some while creating barriers to mobility for others appropriating the political resources which bordering offers contesting the legitimacy of or undermining the borders imposed by others This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies This book was published as a special issue of *Space and Polity*

Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations **Old Cultures, New Institutions** Ann Kennard, 2010 Border
