Royal Navy Trawlers:

Royal Navy Trawlers Gerald Toghill, 2003 *British Naval Trawlers and Drifters in Two World Wars* Steve Dunn, 2021-12-30 John Lambert was a renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts. By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published. These were acquired by Seaforth and this title is the fourth of a planned series of albums on selected themes reproducing complete sheets at a large page size with expert commentary and captioning. Trawlers and drifters served in both world wars in their thousands and in their tens of thousands so did their fishermen crews. Indeed these humble craft were the most numerous vessel type used by the Royal Navy in both wars and were the answer to the strategic or tactical conundrums posed by new technology of mines and submarines. In his accompanying text Steve Dunn examines the ships themselves, their design, construction, arming operations and development, and he also relates how the trawlermen and skippers from the age-old fishing ports of Grimsby, Hull, Lowestoft and Great Yarmouth, Aberdeen and Fleetwood came to be part of the Royal Navy and describes the roles they played, the conditions they served under and the bravery they showed. The book takes some 30 large sheets of drawings which John Lambert completed of these vessels and divides into two sections. The first part tells how the fishing fleet came to be an integral part of the Royal Navy's pre-1914 plans and details some of the activities and actions of trawlers and drifters at war in 1914-18. And the second investigates the armed fishing fleet in the struggle of 1939-45. These wonderfully detailed drawings, which are backed by a selection of photographs and a detailed complementary text, offer a superb technical archive for enthusiasts and ship modellers, but the book also tells a fascinating story of the extraordinary contribution the vessels and their crews made to the defeat of Germany in two world wars.

The Royal Navy and Fishery Protection Jon Wise, 2023-10-12 From the first recorded mention of British ships protecting fishing vessels in the late fourteenth century through to recent controversies over the change in emphasis to border patrols and overseas deployments, the story of the Royal Navy's Cinderella Fleet involves many dramatic incidents, until now, however, there has never been a book dedicated to the subject. Naval historian Jon Wise's new work will rectify this omission. Historically, there have been two main reasons why protecting fishing vessels was so important: first, fish have always constituted an essential part of the nation's diet, while secondly, fishermen have been an important source of skilled personnel for the Royal Navy itself. It is claimed that the Fishery Protection Squadron (FPS) is the oldest in the fleet, pre-dating the formal creation of the Navy itself in the early part of the sixteenth century, yet it still remains comparatively little known. The Squadron's most famous operations were the Cod Wars of 1958-76, but for six centuries it has been engaged in the many important tasks of protection and policing of fishing fleets, though more recently it has turned its attention to patrolling oil and gas fields, overseeing quotas and sustainability, and policing the ongoing disagreements over who can fish where and when. The author covers subjects as diverse as the battles with the Dutch for dominance in the North Sea, the protection of

fishing on the eastern seaboard of America and the role of the Squadron in the two World Wars Containing many first hand accounts this thought provoking narrative will be of particular interest to all those RN personnel who have served in the Squadron and is set to become the definitive account of this vital but often unsung component of Britain's naval forces and its impact on national life

Royal Navy Trawlers, 2003 **Ships of the Royal Navy: Major ships (excluding trawlers, drifters, tugs, etc.)** J. J. Colledge, 1969 **R. N. Trawlers** Gerald Toghill, 2003-08-01 **The Royal Navy in the Cold War Years, 1966-1990** Edward Hampshire, 2024-07-30

During the period covered by this new book the Royal Navy faced some of its greatest challenges both at sea confronting the increasingly capable and impressive Soviet Navy and on shore when it faced policy crises that threatened the survival of much of the fleet During this remarkable period the Navy had rarely been so focussed on a single theater of war the Eastern Atlantic but also rarely so politically vulnerable The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines the Navy's role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios individual operations from the Falklands and the 1990-91 Gulf War to the Beira and Armilla patrols the development of advanced naval technologies to counter Soviet capabilities policy making controversies as the three services fought for resources including the controversial 1981 Nott defense review and what life was like in the Cold War navy for ratings and officers The book the first to cover this subject in depth for more than thirty years will make use of the full range of archival sources that have been publicly available over the last two decades but of which little use has been made by historians This work is destined to become a definitive naval history of the period and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered winning a remarkable victory in the far South Atlantic more than 7 000 miles from its expected battleground in the North Atlantic Elegantly written for a wide audience it will be a very significant volume for professional and enthusiast alike

Fishermen Against the Kaiser Douglas d'Enno, 2010-06-15 British fishermen are among the unsung heroes of the First World War The conflict with Germany had an immediate and enduring impact on their lives and livelihood They were immediately caught up in the sea war against the Kaiser's navy confronting the threats presented by the submarines minelayers gunboats and capital ship of the High Seas Fleet Often they found themselves thrust into strange dangerous situations which put their lives at risk and tested to the limit their bravery and skill as seamen This is their fascinating story For the first time in this two volume study Douglas d'Enno provides a comprehensive and lasting record of the services rendered by the fishermen and their vessels both under naval

control and on their own account His pioneering history shows the full extent of their contribution to the British war effort from minesweeping and submarine detection to patrol escort and counterattack duties The areas of action were not limited to the home waters of the Channel the North Sea and the Western Approaches but ranged as far as the Arctic and the Mediterraneans Aegean and Adriatic seas Extraordinary stories are recounted here of the hazards of minesweeping battles with U boats decoy missions patrols blockades rescues and capture by the enemy First hand accounts make up the essence of the material Reports from the leading trade journals specialist literature and personal manuscripts vividly recall the fishermens experiences and the hardships and dangers they faced throughout the war

Report of the Re-opened Formal Investigation Into the Loss of the FV Gaul David Steel, Great Britain. Department for Transport, 2004 This publication sets out the report of the re opened formal investigation into the loss of FV Gaul a fishing trawler last seen off the Norwegian coast in February 1974 resulting in the loss of its 36 crewmen The original formal inquiry concluded that the vessel had foundered and capsized without making any distress calls after being battered by heavy seas The report is divided into two sections The first part includes a brief historical account of the loss of FV Gaul and the concerns surrounding its loss the vessel s design features the regulatory measures in place at the time it was built and its service history the experience of its skipper and crew a detailed account of its last voyage and the search and investigation undertaken after it went down and examination of concerns that its loss was due to involvement in espionage activities during the Cold War including evidence from two members of the Security Services The second section looks at the findings of the maritime accident investigation undertaken in 1998 and the underwater survey undertaken in 2002 including technology used examination of possible theories to explain the cause of the loss including whether the vessel was fishing at the time of the loss whether a snagged submarine cable could have caused the incident and the prevailing weather and sea conditions The report concludes that it is probable FV Gaul capsized amid heavy seas when water ran down open waste chutes and flooded its lower decks rapidly disabling the crew who were subsequently unable to send a distress call The report therefore rules out other explanations for the loss of the vessel such as collision seizure by the Russians or any other hostile force or being pulled down by a submarine due to a snagged fishing net
