engagement with social class During the 1960s as neoliberalism perpetuated the idea that fixed classes were a mirage and
status an individual achievement Warhol s work appropriated images techniques and technologies that have long been
described as generically American or middle class Drawing on archival and theoretical research into Warhol s contemporary

cultural milieu Grudin demonstrates that these features of Warhol's work were in fact closely associated with the American working class. The emergent technologies Warhol conspicuously employed to make his work—home projectors, tape recorders, film and still cameras—were advertised directly to the working class as new opportunities for cultural participation. What's more, some of Warhol's most iconic subjects—Campbell's soup, Brillo pads, Coca-Cola—were similarly targeted since working class Americans, under threat from a variety of directions, were thought to desire the security and confidence offered by national brands. Having propelled himself from an impoverished childhood in Pittsburgh to the heights of Madison Avenue, Warhol knew both sides of this equation: the intense appeal that popular culture held for working class audiences and the ways in which the advertising industry hoped to harness this appeal in the face of growing middle class skepticism regarding manipulative marketing. Warhol was fascinated by these promises of egalitarian individualism and mobility, which could be profound and deceptive, generative and paralyzing, charged with strange forms of desire. By tracing its intersections with various forms of popular culture, including film, music, and television, Grudin shows us how Warhol's work disseminated these promises while also providing a record of their intricate tensions and transformations.
