Mahnmale Des Holocaust:

Seelenarbeit an Deutschland ,2016-08-09 The last decade has undoubtedly been the most controversial in the long literary career of Martin Walser This volume presents a review of this career going far beyond short lived arguments to present an insightful overview of much of his work It considers not only major aspects of his writing covering both his literary beginnings and the most recent works but also different previously neglected features of his persona and his writing namely his activity as a university teacher and his art criticism In addition fruitful comparisons are made with other writers such as Proust Grass and Uwe Johnson At the same time recent controversies are also considered with major attention being paid to Walser s public speeches and those works of fiction which have been seen by some as demanding the end of German self recriminations over the Nazi past This volume is unique in that much space is devoted to both sides of the argument It will provide stimulating reading to all those interested in Germany and German literature

The Nazi Genocide of the Roma Anton Weiss-Wendt,2013-06-01 Using the framework of genocide this volume analyzes the patterns of persecution of the Roma in Nazi dominated Europe Detailed case studies of France Austria Romania Croatia Ukraine and Russia generate a critical mass of evidence that indicates criminal intent on the part of the Nazi regime to destroy the Roma as a distinct group Other chapters examine the failure of the West German State to deliver justice the Romani collective memory of the genocide and the current political and historical debates As this revealing volume shows however inconsistent or geographically limited over time the mass murder acquired a systematic character and came to include ever larger segments of the Romani population regardless of the social status of individual members of the community

Victims and Perpetrators: 1933-1945 Laurel Cohen-Pfister,Dagmar Wienroeder-Skinner,2012-03-12 This volume examines the politics of history and memory in Germany today through a review and analysis of seminal developments in the current discourse on 1933 1945 An interdisciplinary work this book examines questions of representing the past from the perspective of literary studies social psychology film studies history and cultural studies Themes include transgenerational memory and remembrance the air war and German literature commemoration and silences transnational reconciliation and historical consciousness in the German present The collected essays make clear that as the current discourse contributes toward an historically informed differentiated understanding of individuals roles in the Third Reich and World War Two victim and perpetrator identities cannot be defined as exclusive from one another The discourse emphasizes personal over collective experience and answers questions of responsibility and guilt on the individual level

The Queer Art of History Jennifer V. Evans,2023-03-17 In *The Queer Art of History* Jennifer V Evans examines postwar and contemporary German history to broadly argue for a practice of queer history that moves beyond bounded concepts and narratives of identity Drawing on Black feminism queer of color critique and trans studies Evans points out that although many rights for LGBTQI people have been gained in Germany those rights have not been enjoyed equally There remain fundamental struggles around whose bodies behaviors and

communities belong Evans uses kinship as an analytic category to identify the fraught and productive ways that Germans have confronted race gender nonconformity and sexuality in social movements art and everyday life Evans shows how kinship illuminates the work of solidarity and intersectional organizing across difference and offers an openness to forms of contemporary and historical queerness that may escape the archive's confines Through forms of kinship queer and trans people test out new possibilities for citizenship love and public and family life in postwar Germany in ways that question claims about liberal democracy the social contract and the place of identity in rights based discourses *Politics and Culture in Germany and Austria Today* Frauke Matthes, Dora Osborne, Katya Krylova, Myrto Aspioti, 2021 Examines the heightened role of politics in contemporary German and Austrian cultural productions and institutions and what it means for German Studies

Memorials in Berlin and Buenos Aires Brigitte Sion, 2014-12-01 The Memorial to the Murdered Jews in Berlin inaugurated in 2005 and the Monument to the Victims of State Terrorism within the Memory Park Parque de la Memoria in Buenos Aires partially unveiled in 2007 have been controversial from start to finish While these sites differ in many respects Germany and Argentina share a history of dictatorial regimes that murdered civilians on a massive scale The Nazis implemented the genocide of millions of Jews and other minorities during World War II In Argentina the junta led state repression was responsible for the disappearance and subsequent murder of thousands of civilians between 1976 and 1983 Decades later new governments in Germany and Argentina acknowledged the responsibility of their respective states for these mass murders by memorializing the victims with a national monument in the capital city for the first time This study of two memorials develops a model and method for analyzing the memorialization of recent tragedies that share several basic characteristics the state creates a self indicting national memorial to the victims of state sponsored mass murder in the absence of their bodies Analyzed as sites of conflicting performances and as performances themselves these memorials illuminate the ways in which people engage with them and how an architecture of absence triggers embodied memory through somatic experience While death tourism and architourism are a key to their success in attracting visitors they also pose a threat to their commemorative role Besides assessing the success and failure of these memorials Sion explores the ways in which these sites are paradigmatic and offers a model for analyzing a transnational circuit of commemorative practices

Disputed Memory Tea Sindbæk Andersen, Barbara Törnquist-Plewa, 2016-06-20 The world wars genocides and extremist ideologies of the 20th century are remembered very differently across Central Eastern and Southeastern Europe resulting sometimes in fierce memory disputes This book investigates the complexity and contention of the layers of memory of the troubled 20th century in the region Written by an international group of scholars from a diversity of disciplines the chapters approach memory disputes in methodologically innovative ways studying representations and negotiations of disputed pasts in different media including monuments museum exhibitions individual and political discourse and electronic social media Analyzing memory disputes in various local national and transnational contexts the chapters demonstrate the

political power and social impact of painful and disputed memories The book brings new insights into current memory disputes in Central Eastern and Southeastern Europe It contributes to the understanding of processes of memory transmission and negotiation across borders and cultures in Europe emphasizing the interconnectedness of memory with emotions mediation and politics *Re-presenting the Shoah for the 21st Century* Ronit Lentin, 2004-02-01 Despite Adorno's famous dictum the memory of the Shoah features prominently in the cultural legacy of the 20th century and beyond It has led to a proliferation of works of representation and re memorialization which have brought in their wake concerns about a holocaust industry and banalization This volume sheds fresh light on some of the issues such as the question of silence and denial of the formation of contemporary identities German East European Jewish or Israeli the consequences of the legacy of the Shoah for survivors and for the second generation and the political ideological and professional implications of Shoah historiography One of the conclusions to be drawn from this volume is that the Auschwitz code invoked in relation to all unspeakable catastrophes has impoverished our vocabulary it does not help us remember the Shoah and its victims but rather erases that memory

Museum Transformations Annie E. Coombes, Ruth B. Phillips, 2020-11-17 MUSEUM TRANSFORMATIONS DECOLONIZATION AND DEMOCRATIZATION Edited By ANNIE E COOMBES AND RUTH B PHILLIPS Museum Transformations Decolonization and Democratization addresses contemporary approaches to decolonization greater democratization and revisionist narratives in museum exhibition and program development around the world The text explores how museums of art history and ethnography responded to deconstructive critiques from activists and poststructuralist and postcolonial theorists and provided models for change to other types of museums and heritage sites The volume's first set of essays discuss the role of the museum in the narration of difficult histories and how altering the social attitudes and political structures that enable oppression requires the recognition of past histories of political and racial oppression and colonization in museums Subsequent essays consider the museum's new roles in social action and discuss experimental projects that work to change power dynamics within institutions and leverage digital technology and new media
